RE: Item 81746 on Jan 31st agenda -- Update on Complete Green Streets Policy and Fire Lanes

It appears that even though the document in question is titled "Complete Green Streets", the green seems to be lost in the shuffle. That is, I do not see any mention of how the various options would have an impact on current trees or the possibility of planting future trees. Please take great care in your deliberations to consider the impact of each option with respect to terrace width, the presence of current trees, and the possibility of future trees.

Thank you for working on this important matter.
