RE: Letter of Intent
St Vincent de Paul Baldwin-Williamson Project
Multiple Addresses

Dear Landmarks Commission Members,

The text below, along with the application and plans, are submitted for your review and consideration.

The District Council of Madison – Society of St. Vincent de Paul has been helping Dane County neighbors in need at the Baldwin-Williamson location since 1941 when a thrift store opened at 409 S. Baldwin. **From that location, St. Vincent de Paul's retail and service complex grew organically around the Baldwin corner to Williamson Street to become the Society's local flagship thrift store.** Those combined buildings have operated as the thrift store since 1954 and expanded northeastward in 1984. The parcel at the corner of Williamson and Baldwin Streets, purchased in 1990, **has since served as the Society's busy food pantry and then as the office location of the Seton House women's transitional housing program** – as well the site of the adjoining Willy Street store's **book room.**

Redevelopment includes 1303 Williamson, 401 S Baldwin and 409 S. Baldwin in the Third Lake Ridge Historic District. The existing buildings are to be removed and a one and two-story building constructed. The new construction, a 7,190 square foot first floor and 3,876 square foot second floor office community services space, combined with remaining buildings will result in a 26,300 square foot area. The existing facility totals 23,541 square feet. The new addition will include a full basement for storage. As part of the project the several existing parcels need to be combined into a single lot. Historically, approximately the southeast 2/3 of the site was a single parcel occupied by a greenhouse until construction of the JA Brady building at 1309 Williamson in 1921. As noted above, with the exception of the corner buildings (401 S. Baldwin and 1303 Williamson) purchased in 1990, this site has been used as though a single lot since 1954.

The 1303 Williamson Street building to be demolished is a modern building constructed after the historic district period of significance (1850-1929.) The building at 401 Baldwin has undergone façade changes over the years and is not sound enough to salvage and rehabilitate. This building is a balloon frame structure with significant structural deficiencies. The Williamson Street wall has moved, bowing outward.

Removal of existing vertical siding reveals older lap siding and framing in very deteriorated condition. The rubble wall basement walls are in fair to poor condition and framing above is in poor condition, rotting in places at the wall bearing.

6515 Grand Teton Plaza, Suite 120
Madison, Wisconsin 53719

p 608.829.4444

f 608.829.4445

The original St. Vincent de Paul thrift store at 409 S Baldwin construction is cast-in-place concrete basement and first floor structure, masonry walls and columns, and a wood bow-string truss roof with rubber membrane roofing. A small, sloped shingle roof at the front façade was likely originally clay tile shingles. The building has significant structural and other condition issues. Due to safety concerns of a compromised roof structure, the building has been vacated for retail use. Inspection of the wood truss and joist roof structure revealed trusses warped out of plane and the roof assembly sagging and settled. This led to the structural engineer's recommendation to replace the roof structure. Although temporary repairs have stabilized the structure, the building is not considered safe for retail occupancy. Piers supporting the trusses exhibit signs of cracking. Moisture infiltration has led to deterioration of the concrete basement walls, floor and columns supporting the floor above. Various attempts to remedy the moisture migration have had minimal impact and continued basement storage is not feasible. No drawings or other records of the original construction materials and their properties are available. Therefore, capacities of construction compared to current codes are unknown.

After careful consideration, in the interest of safety, code compliance, unintended consequences, and long-term usefulness serving their mission, St. Vincent de Paul seeks to rebuild to continue serving the community at this location.

Nearly the entire first floor of the proposed building will be devoted to retail. The partial second-floor space will be focused on serving neighbors in need through SVdP Madison charitable programming. The proposed building is designed to be compatible with the neighboring structures in the spirit of the historic district standards. The 2-story corner building scale fits the context of other commercial building, including the historic structures opposite on Williamson and S. Baldwin. A corner entrance recalls the existing building as well as other structures at the Williamson/S. Baldwin intersection and as seen elsewhere on Williamson St. The building has large clear glass storefront windows proportioned to fit the character of commercial buildings in the period of significance. Second floor double-hung windows exhibit appropriate style and scale. Walls are masonry with a fiber reinforced cornice.

The S. Baldwin one-story portion differentiates the façade design in keeping with the historic scale of the street. While not attempting to totally mimic the existing building, the design incorporates Mediterranean Revival elements common to both the existing building and other commercial buildings in the Madison area.

The new buildings are designed for rooftop solar panels. Parapet walls will visually screen them and any other roof mounted equipment from street level view.

The buildings will be set back 15' from the curbs meeting the City of Madison zoning ordinance. An 8' terrace and 5' sidewalk are required on the Williamson and S. Baldwin Streets. The terrace will be planted on S. Baldwin. Space between sidewalks and building will feature low-growth plantings. A loading area for city trucks incorporated in the south side of the addition is set back from the street façade.

No façade work is planned for the remaining Williamson Street buildings. The 1309 Williamson building will be repaired and reroofed. The interior modern suspended ceiling will be removed exposing the steel bow-string trusses as they appeared when the building was occupied by the

JA Brady garage. Other minor interior remodeling will be performed. Bicycle racks will be added to the parking lot area. Additional parking could be provided by demolition of the two St. Vincent de Paul houses to the northeast. However, a conditional use parking reduction will be requested which would allow continued use of these buildings for affordable housing.

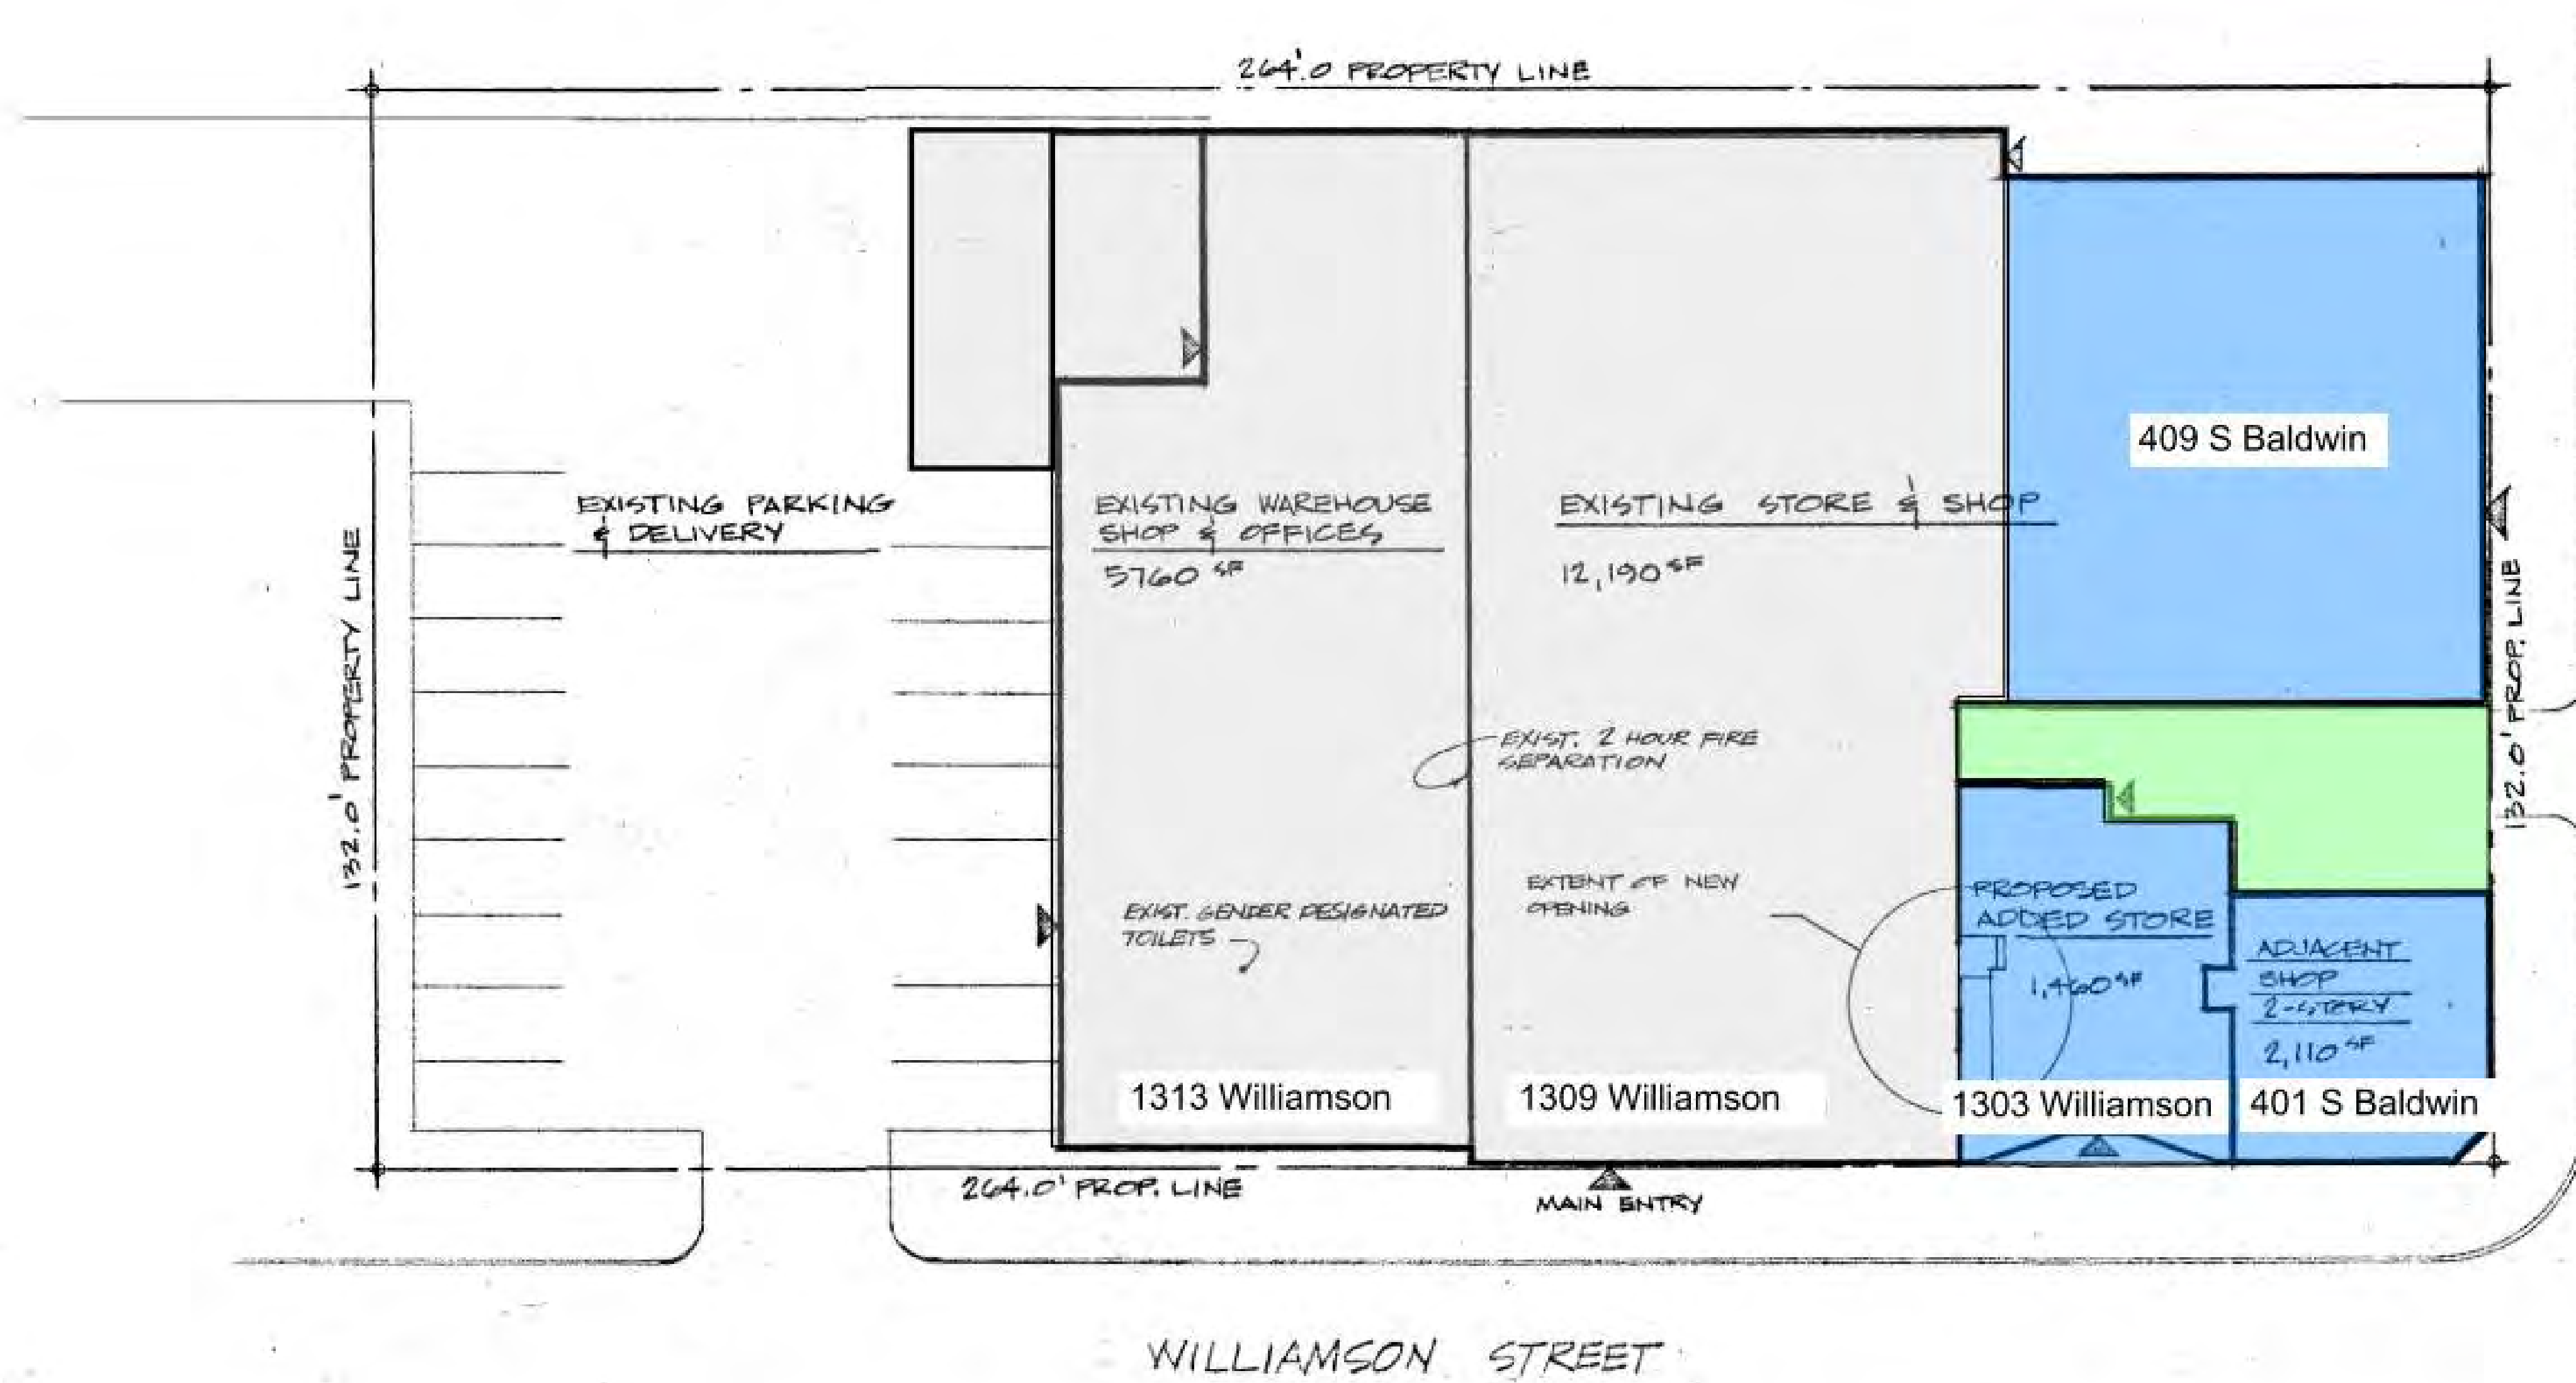

Thank you for reviewing and considering our proposal.

Sincerely,

A handwritten signature in black ink, appearing to read "R. Siggelkow". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
