Subject: 2438 Winnebago Class B Calss C license

I am writing to register my opposition to granting any liquor licenses for the Carbon buildings. I have resided in this complex since last October and can attest that it is already very loud there with resident activity and parking is very limited on the street. Additionally, soon they will begin constructing the Grand Families portion of the development across the street which will include dozens of children, whom I've already deemed at risk, as this stretch of Winnebago has become a common shortcut for speeders trying to save time getting to Milwaukee street.

Please look elsewhere for a business of this sort - this is a family oriented location and not appropriate, or feasible for parking for a business of this nature.
