LAND USE APPLICATION

CITY OF MADISON

215 Martin Luther King Jr. Blvd; Room LL-100
PO Box 2985; Madison, Wisconsin 53701-2985
Phone: 608.266.4635 | Facsimile: 608.267.8739

- All Land Use Applications should be filed with the Zoning Administrator at the above address.
- The following information is required for all applications for Plan Commission review except subdivisions or land divisions, which should be filed using the Subdivision Application.
- This form may also be completed online at:
www.cityofmadison.com/developmentcenter/landdevelopment

FOR OFFICE USE ONLY:	
Amt. Paid _____	Receipt No. _____
Date Received _____	
Received By _____	
Parcel No. _____	
Aldermanic District _____	
Zoning District _____	
Special Requirements _____	
Review Required By:	
<input type="checkbox"/> Urban Design Commission	<input type="checkbox"/> Plan Commission
<input type="checkbox"/> Common Council	<input type="checkbox"/> Other: _____

Form Effective: February 21, 2013

1. **Project Address:** 3520 and 3546 East Washington Blvd, Madison, WI 53704
Project Title (if any): PDQ Food Stores

2. This is an application for (Check all that apply to your Land Use Application):

- Zoning Map Amendment from _____ to _____
- Major Amendment to Approved PD-GDP Zoning Major Amendment to Approved PD-SIP Zoning
- Review of Alteration to Planned Development (By Plan Commission)
- Conditional Use, or Major Alteration to an Approved Conditional Use
- Demolition Permit
- Other Requests: _____

3. Applicant, Agent & Property Owner Information:

Applicant Name: Tate Walker **Company:** OPN Architects
Street Address: 301 North Broom St, Suite 100 **City/State:** Madison, WI **Zip:** 53703
Telephone: (608) 819-0844 **Fax:** (608) 819-0261 **Email:** twalker@opnarchitects.com

Project Contact Person: same as above **Company:** _____
Street Address: _____ **City/State:** _____ **Zip:** _____
Telephone: () _____ **Fax:** () _____ **Email:** _____

Property Owner (if not applicant): Mike Arnold, PDQ Food Stores
Street Address: PO Box 620997 **City/State:** Middleton, WI **Zip:** 53562

4. Project Information:

Provide a brief description of the project and all proposed uses of the site: PDQ Food Stores is proposing a new auto service station, car wash, and convenience store at at 3520 and 3546 East Washington Blvd in Madison, Wisconsin. For a full project description, please refer to project narrative on attached plans.

Development Schedule: Commencement August 2015 Completion December 2015

10-11

5. Required Submittal Information

All Land Use applications are required to include the following:

Project Plans including:*

- Site Plans (fully dimensioned plans depicting project details including all lot lines and property setbacks to buildings; demolished/proposed/altered buildings; parking stalls, driveways, sidewalks, location of existing/proposed signage; HVAC/Utility location and screening details; useable open space; and other physical improvements on a property)
- Grading and Utility Plans (existing and proposed)
- Landscape Plan (including planting schedule depicting species name and planting size)
- Building Elevation Drawings (fully dimensioned drawings for all building sides, labeling primary exterior materials)
- Floor Plans (fully dimensioned plans including interior wall and room location)

Provide collated project plan sets as follows:

- **Seven (7) copies** of a full-sized plan set drawn to a scale of 1 inch = 20 feet (folded or rolled and stapled)
- **Twenty Five (25) copies** of the plan set reduced to fit onto 11 X 17-inch paper (folded and stapled)
- **One (1) copy** of the plan set reduced to fit onto 8 ½ X 11-inch paper

* For projects requiring review by the **Urban Design Commission**, provide **Fourteen (14) additional 11x17 copies** of the plan set. In addition to the above information, all plan sets should also include: 1) Colored elevation drawings with shadow lines and a list of exterior building materials/colors; 2) Existing/proposed lighting with photometric plan & fixture cutsheet; and 3) Contextual site plan information including photographs and layout of adjacent buildings and structures. The applicant shall bring samples of exterior building materials and color scheme to the Urban Design Commission meeting.

Letter of Intent: Provide one (1) Copy per Plan Set describing this application in detail including, but not limited to:

- | | | |
|---|---|--|
| • Project Team | • Building Square Footage | • Value of Land |
| • Existing Conditions | • Number of Dwelling Units | • Estimated Project Cost |
| • Project Schedule | • Auto and Bike Parking Stalls | • Number of Construction & Full-Time Equivalent Jobs Created |
| • Proposed Uses (and ft ² of each) | • Lot Coverage & Usable Open Space Calculations | • Public Subsidy Requested |
| • Hours of Operation | | |

Filing Fee: Refer to the Land Use Application Instructions & Fee Schedule. Make checks payable to: *City Treasurer*.

Electronic Submittal: All applicants are required to submit copies of all items submitted in hard copy with their application as Adobe Acrobat PDF files on a non-returnable CD to be included with their application materials, or by e-mail to pcapplications@cityofmadison.com.

Additional Information may be required, depending on application. Refer to the Supplemental Submittal Requirements.

6. Applicant Declarations

Pre-application Notification: The Zoning Code requires that the applicant notify the district alder and any nearby neighborhood and business associations in writing no later than **30 days prior to FILING this request**. List the alderperson, neighborhood association(s), and business association(s) AND the dates you sent the notices:
David Ahrens, Hawthorne Neighborhood (District 15) April 23, 2015

→ If a waiver has been granted to this requirement, please attach any correspondence to this effect to this form.

Pre-application Meeting with Staff: Prior to preparation of this application, the applicant is required to discuss the proposed development and review process with Zoning and Planning Division staff; note staff persons and date.

Planning Staff: Tim Parks Date: April 6, 2015 Zoning Staff: Matthew Tucker Date: April 6, 2015

The applicant attests that this form is accurately completed and all required materials are submitted:

Name of Applicant Tate Walker Relationship to Property: Architect
Authorizing Signature of Property Owner Tate Walker Date 5/27/15 10-11

PDQ FOOD STORES

3520 EAST WASHINGTON AVE
MADISON, WI 53704

PROJECT NARRATIVE / LETTER OF INTENT

PDQ Food Stores is proposing a new auto service station, detached car wash, and convenience store at 3520 and 3546 East Washington Blvd in Madison, Wisconsin. The parcel's zoning is a Commercial Corridor - Transitional District (CC-T), and borders a Traditional Residential - Varied District 1 (TR-V1). The proposed parcel would remain a CC-T, but will be divided to include a new lot at the northwest end of the property measuring 80' deep and 256' wide and zoned for residential development under TR-C3. The project will consist of demolishing the existing structure on site, and constructing a new auto service station with a 4,000 square foot pump canopy and 1,355 square foot pedestrian canopy, a 2,200 square foot detached car wash, and a 6,120 square foot convenience store. The project is estimated to be substantially complete by January 2016. The hours of operation are 24 hours per day, 7 days per week. See site plan for proposed parking, bike parking and open space calculations. The land is currently valued at \$1.1M. The estimated project cost is \$2.5M. This project is estimated to create 10 full time jobs. There are no public subsidies requested by this project.

GRADING, EC AND
 UTILITY PLAN

C 2.0

Erosion Control Notes/Specifications:

1. Erosion control devices and/or structures shall be installed prior to clearing and grubbing operations. These shall be properly maintained for maximum effectiveness until vegetation is re-established.

2. Erosion control is the responsibility of the contractor until acceptance of this project. Erosion control measures as shown shall be the minimum precautions that will be allowed. The contractor shall be responsible for recognizing and correcting all erosion control problems that are the result of construction activities. Additional erosion control measures, as requested in writing by the state or local inspectors, or the developer's engineer, shall be installed within 24 hours.

3. All erosion control measures and structures serving the site must be inspected at least weekly or within 24 hours of the time 0.5 inches of rain is produced. All maintenance will follow an inspection within 24 hours.

4. Install Type D inlet filters in any street inlet receiving runoff from this site. Refer to WDOT Product Acceptability List at: <http://www.dot.wisconsin.gov/business/engserv/pal.html>

5. Erosion control devices shall adhere to the technical standards found at: <http://dnr.wi.gov/org/water/wm/nps/stormwater/techstds.htm> and comply with all City of Madison ordinances.

6. All debris tracked onto public streets shall be swept or scraped clean by the end of each workday.

7. All disturbed areas shall be seeded immediately after grading activities have been completed.

8. All disturbed areas, except paved areas, shall receive a minimum of four (4) inches of topsoil, fertilizer, seed, and mulch. Seed mixture 40 shall be used on all areas. Mixtures shall be in accordance with section 630 of Wisconsin D.O.T. specifications. Seed mixtures and fertilizer shall be applied at the rate of seven (7) pounds per 1,000 square feet. Mulch shall be applied at the rate of 2 tons per acre and shall be anchored into the soil by disking. Seeding and sodding may only be used from May 1st to September 15th of any year. Temporary seed shall be used after September 15. If temporary seeding is used, a permanent cover shall also be required as part of the final site stabilization.

9. For the first six (6) weeks after the initial stabilization of a disturbed area, watering shall be performed whenever more than seven (7) days of dry weather elapse.

10. Following rough grading, deep tilling will be performed on all graded areas outside of building and street footprints. The operation shall be accomplished using twin straight steel shanks drawn by tracked machinery. Each shank shall be 24 to 36 inches long, positioned over each track.

11. All access point to the project site must have a Stone Construction Entrance

12. If rill erosion becomes problematic, the contractor shall apply soil stabilization polymers on all slopes greater than 10% or in problem areas.

SILT FENCE INSTALLATION DETAIL

INSTALLATION PROCEDURE
STEP 1: EXCAVATE A 4"x4" TRENCH ALONG PATH OF SILT FENCE.
STEP 2: STAKE THE SILT FENCE ON DOWN-SLOPE SIDE OF TRENCH AND EXTEND 9" OF FABRIC INTO THE TRENCH.
STEP 3: WHEN JOINTS ARE NECESSARY, OVERLAP ENDS FOR THE DISTANCE BETWEEN THE STAKES.
STEP 4: BACKFILL AND COMPACT THE EXCAVATED SOIL.

STAKED BALES

INSTALLATION PROCEDURE
STEP 1: PLACE AND STACK STRAW BALES LENGTHWISE TO FORM WALL.
STEP 2: WEDGE LOOSE STRAW BETWEEN BALES.
NOTE: ADDITIONAL EROSION CONTROL MEASURES WILL BE INSTALLED AS NEEDED.

INLET PROTECTION (TYPE HC)

GENERAL NOTES
1. WHEN REMOVING OR MAINTAINING INLET PROTECTION, CARE SHALL BE TAKEN SO THAT THE SEDIMENT TRAPPED ON THE GEOTEXTILE FABRIC DOES NOT FALL INTO THE INLET. ANY MATERIAL FALLING INTO THE INLET SHALL BE REMOVED IMMEDIATELY. THE INSTALLED BAG SHALL HAVE A MINIMUM SIDE CLEARANCE BETWEEN THE INLET WALLS AND THE BAG, MEASURED AT THE BOTTOM OF THE OVERFLOW HOLES, OF 3".
2. SIDE FLAPS SHALL BE A MAXIMUM OF 2" LONG. FOLD THE FABRIC OVER AND REINFORCE WITH MULTIPLE STITCHES.
3. FLAP POCKETS SHALL BE LARGE ENOUGH TO ACCEPT WOOD 2X2. THE 2X2 SHALL BE INSTALLED IN THE REAR FLAP AND SHALL NOT BLOCK THE TOP HALF OF THE CURB FACE OPENING.
4. FRONT LIFTING FLAP IS TO BE USED WHEN REMOVING AND MAINTAINING FILTER BAG.

Silt Sock Detail

INSTALLATION PROCEDURE
Lay full socks in a single row with a 4" end to end overlap.

CLEAR STONE WEEPER

INSTALLATION PROCEDURE
STEP 1: EXCAVATE A 2' WIDE TRENCH.
STEP 2: PLACE 3" CLEAR STONE, TAPERING FROM A 2' WIDE BOTTOM TO A 6" WIDE TOP.
STEP 3: TO PROTECT INLETS, REPEAT IN A CIRCLE AROUND THE ENTIRE INLET.
STEP 4: TO PROTECT DITCHES AND SWALES RUN THE WEEPER PERPENDICULAR TO THE FLOW LINE AND EXTEND TO THE TOP OF THE SIDE SLOPE.
NOTE: ADDITIONAL EROSION CONTROL MEASURES WILL BE INSTALLED AS NEEDED.

CONSTRUCTION ENTRANCE DETAIL

NOTES:
1. CLEAN UP ANY MATERIAL TRACKED OFF SITE DAILY.
2. REPLACE STONE ENTRANCE WHEN IT BECOMES TOO CLOGGED TO PROVIDE ANY CLEANING BENEFIT.

Bioretention with Liner

INSTALLATION PROCEDURE
Engineered Soil Composition:
70 - 85 % Coarse sand
15 - 30 % compost meeting the following requirements:
Sand: USDA coarse sand 0.02 - 0.04 inch diameter, prewashed.
Compost: Shall meet the requirements of DNR S100.
Soil mixture shall be free of rocks, roots, and debris over 1".
Shall be placed to minimize compaction of mixture and subgrade.
Finished basin shall be matted with coconut fabric and planted with native profile plugs spaced 12" on center.

HALO LED ICAT HOUSING for NEW CONSTRUCTION

The H750ICAT is a dedicated LED new construction housing to be used with designated HALO LED modules. The H750ICAT is designed for insulated ceilings and can be in direct contact with ceiling insulation*. This AIR-TITE housing design prevents airflow between conditioned and unconditioned spaces and saves on both heating and air conditioning costs. The LED connector system provides high efficacy code compliance when used with designated HALO LED modules and trims.

		HALO®	
Catalog #	H750ICAT	Type	OA
Project	PDQ Washington Avenue	Date	8-25-15
Comments	ML706830 & 492PS06	Prepared by	KRK

DESIGN FEATURES

Housings
Aluminum construction for greater heat dissipation. H750 ICAT housing is gasketed to prevent airflow from heated or air conditioned spaces.

Plaster Frame
Galvanized steel frame. Housing adjusts in plaster frame to accommodate up to 1" ceiling thickness. Regressed locking screw for securing hanger bars. Cutouts included for easily crimping hanger bars in position.

Slide-N-Side™ Junction Box

- Positioned to accommodate straight conduit runs.
- Seven 1/2" trade size conduit knockouts with true pry-out slots.
- Slide-N-Side wire traps allow non metallic sheathed cable to be installed without tools and without removing knockouts.
- Allows wiring connections to be made outside the box.
- Simply insert the cable directly into the trap after connections are made.
- Accommodates the following standard non-metallic sheathed cable type:
 - U.S. #14/2, #14/3, #12/2, #12/3
 - Canada: #14/2, #14/3, #12/2

GOT NAIL! Pass -N-Thru™ Bar Hangers
Bar Hanger features include

- Pre-installed nail easily installs in regular lumber, engineered lumber and laminated beams.
- Safety and Guidance system prevents snagging, ensures smooth, straight nail penetration and allows bar hangers to be easily removed if necessary.
- Automatic leveling flange aligns the housing and allows holding the housing in place with one hand while driving nails.
- Housing can be positioned at any point within 24" joist spans.
- Score lines allow tool-free shortening for 12" joists and bar hangers do not need to be removed for shortening.
- Bar hangers may be repositioned 90° on plaster frame.
- Integral T-bar clip snaps onto T-bars - no additional clips are required.

LED Module Connection
Halo LED modules simply install with a plug-in 120V-277V rated line voltage wiring connector (UL and CSA Listed Luminaire Disconnect). This non-screw-base connection preserves the high efficacy rating and prevents use of low efficacy incandescent sources (see LED Module specifications).

Caution
Connection is rated for 120V and 277V input. Installer must verify LED module voltage is compatible with the applicable voltage input. If uncertain, consult a qualified electrician.

- Labels**
- UL/cUL Listed 1598 Luminaire
 - CE Marking - "Conformité Européenne" conformity with the Council of European Communities Directives, meeting internationally recognized compliance when used with ML56 Series LED modules
 - UL/cUL Listed for Feed Through
 - UL/cUL Listed for Damp Location
 - UL/cUL Listed for Wet Location with select trims
 - UL/cUL Listed for direct contact with insulation and combustible material*
 - Rated for 20W maximum

Qualification
May be used with qualified Halo LED modules and designated trims for High Efficacy Luminaire Compliance:

- State of California Title 24
- International Energy Conservation Code (IECC)
- Washington State Energy Code
- New York State Energy Conservation Construction Code - AIR-TITE™ Compliant
- Certified under ASTM-E283 standard for air-tight construction

Cooper Lighting
by **EAT-N**

* Not to be used in direct contact with spray foam insulation.

ADV141509
6/17/2014

Description

The Halo LED ML7068xx modules are designed for retrofit applications with an Edison screw base adapter (included with the module) for use in existing housings OR may also be used in new construction with the LED dedicated housing Series H750x. Halo LED 600 Series offers selection of four color temperatures: 2700K, 3000K, 3500K, 4000K. Halo LED offers a superior optical design that yields productive beam lumens, good cutoff and low glare.

Specification Features

Exceeds the light output and distribution of a 65W BR30 incandescent lamp or an 18W compact fluorescent luminaire (lamp and reflector trim), while consuming less than 14 watts.

Dimming
The ML7068xx series is designed for dimming capability to 15% in normal operation with standard 120V LED-Rated, electronic low voltage, and many incandescent dimmers. The LED module may also dim to 5% using dimmers with low end trim adjustment. (Consult dimmer manufacturer for application/compatibility. Note, some dimmers require a neutral in the wallbox).

Quality of Light
Halo 600 Series provides excellent color rendering (80 CRI), and a selection of four color temperatures (2700K, 3000K, 3500K and 4000K). CRI and color temperature performance conform to parameters established by ENERGY STAR® SSL standards (refer to ANSI-C78.377 - 2008 for CCT specifications). LED's have virtually no ultraviolet and minimal infrared wavelengths, and they do not emit heat like conventional lamps.

Optical Design
Optical design yields productive beam lumens, 50° cutoff, and low glare.

Life
Rated for 50,000 hours at 70% lumen maintenance.

Compatibility
The Halo ML7068xx LED modules are designed for use in the dedicated H750x series housings OR for retrofit applications in existing Halo or ALL-PRO™ H7/E7/E17 housings. The Halo LED module is designed for use in either IC (insulated ceiling) or non-IC construction.

Compatible HALO and ALL-PRO housings include model numbers:

- Dedicated LED Housing: H750x Series
- Halo Housings: H7x Series
- ALL-PRO Housings: E7x and E17x Series

Screw Base Adapter
Edison screw-base adapter supplied with module allows simple wiring connection to existing housing.

Module Construction
Durable die-cast and extruded aluminum construction conducts heat away from the LED keeping the junction temperatures below specified maximums even when installed in insulated ceiling environments.

Air-Tite™ Rating
The Halo LED module has passed restricted air flow testing, and now qualifies any housing to meet air-tight building codes. Certified under ASTM-E283 standards.

LED Driver
The LED module is controlled by a high efficiency driver with a power factor of > 90 at an input power of 120V, 50/60Hz. Driver has integral thermal protection in the event of over temperature or internal failure.

Warranty
Cooper Lighting provides a three year limited warranty on the Halo LED Luminaire which includes the LED Module, LED Recessed Housing and LED Trims.

For new construction OR retrofit applications

600 Series LED dimmable module
2700°K, 3000°K, 3500°K, 4000°K correlated color temperature

494WB06 Halo LED series trim
For use in non-insulated ceilings

LED Module in New or Existing Construction - Housings other than Halo or All-Pro
If used in recessed housings other than Halo or All-Pro the Cooper Lighting warranty applies to the LED Module and Trim only. As with any electrical installation, a qualified electrician must ensure compatibility of use with a particular housing; this includes all applicable national and local electrical and building codes. Installer is responsible to securely retain the LED Module and Trim in a housing at time of installation.

Compliance Labels

- UL/cUL Listed
- UL/cUL Damp Location Listed
- UL/cUL Wet Location, Protected Ceiling Listed and IP66 rated with designated trims
- RoHS Compliant
- May be used in IC housings in direct contact with insulation and combustible material* (May also be used in Non-IC housings.)

Qualification
Can be used to meet High Efficacy luminaire requirements (when used with designated trims):

- ENERGY STAR® SSL
- International Energy Conservation Code (IECC) High Efficacy

Air-Tite™ Compliant

- Washington State Energy Code
- Certified Under ASTM-E283

*IC housings not in spray foam insulation.

Dimensions

494WB06 White baffle with white trim ring

- Halo matte white finish die-cast trim ring
- Halo Matte White die-cast baffle
- Trim ring height of .160" at OD and .180" at ID
- Provides clearance for remodeler flange and gasket for Air-Tite™ seal

494WB06 White Baffle with White Trim Ring

Accessory:
494OPTIC - over optic lens

494OPTIC Lens Over-Optic for Open LED Trims

Optional accessory - diffusing lens drops into top of open 494 Series LED trims. Precision formed lens media provides diffusion of LED source brightness.

Compatible with: 494WB06

494OPTIC Lens Over-Optic for Open LED Trims

ML7RAB Retrofit Adapter Band for Housings without Torsion Spring Receivers

In many retrofit installations the existing (6" nominal aperture) housings have Torsion Spring Receivers that are used to install trims. Many of these housings will allow direct installation of the LED Module. In some existing installations housings do not have torsion spring receivers. The ML7RAB was designed for installation into those housings. The ML7RAB kit can retrofit four non-torsion spring housings; the kit includes:

- 4 - Retrofit Adapter Bands (1 per retrofit housing)
- 16 - Metal-piercing screws (4 per adapter)
- 8 - Retrofit Locking Wire Nuts (2 per adapter)

ML7RAB Retrofit Adapter Band (Four Adapters per Box)

Oversize Rings

For use when ceiling opening is irregular or cut too large. The oversized ring is installed behind the Halo LED trim ring to mask irregularities or cutout errors of the ceiling opening.

- OT400P = Oversize White Metal Trim Ring 6" ID x 9-1/4" OD
- OT403P = Oversize White Plastic Trim Ring 6" ID x 8" OD

Oversize LED Trim Ring

For use when ceiling opening is irregular or cut too large.

- OT490WH = LED Oversize White Die-Cast Aluminum Trim Ring 5-1/8" ID x 9-1/4" OD - attaches to LED module, substitute for standard LED trim ring.

OT400, OT403, OT490WH Oversize Trim Rings

ML7068xx

Application Note - H277 and H347 step-down transformers are qualified to drive multiple Halo LED modules on a single circuit in Non-IC construction. Installation of these transformers on individual fixtures on circuits with multiple LED loads is not recommended. H277 is 300VA and qualified to drive up to 15 Halo LED ML706x modules. H347 is 75VA and qualified to drive up to 3 Halo LED ML706x modules. Installation of individual H277 or H347 transformers on each LED downlight fixture in a multiple LED loaded circuit is not recommended due to resulting multiple inductive currents pulled by each transformer; in this situation the majority of the power would then be reactive (VARS) and not real (WATTS). If H277 or H347 transformers should be used individually on each LED fixture in a single circuit, then that circuit should be sized for lowered power factor as well as increased apparent power on the circuit. H277 and H347 are UL/cUL listed for use with Halo housings: H750T, H750TCP, H7T, H7TNB, H7RT, H750TD010, H750RTD010, H750TCPD010 housings.

Step Down Transformers
H277-Steps 277 line voltage down to 120 volts. Attaches to knockout on first fixture's junction box in a circuit and is 300VA rated (15 modules max.). H277 is a UL recognized Component listed under the luminaire UL/cUL listing for Non-IC housings and LED Module.

H347-Steps 347 line voltage down to 120 volts. Attaches to knockout on first fixture's junction box in a circuit and is 75VA rated (3 modules max.). H347 is a CSA/UL Listed Component for use under the luminaire UL/cUL listing with Non-IC housings and a LED Module.

Transformer Load - H277 (300VA)

1. H277 Transformer at full loading consumes a maximum of 16W of power
2. When dimmer or switch is on the secondary (120V) side of the transformer, power is consumed by the transformer when the dimmer or switch is in "OFF" mode at 6.5W and in "ON" mode at 16W maximum with full loading.
3. When a dimmer or switch is on the primary (277V) side of the transformer, power is consumed only in "ON" mode to a maximum of 16W under full loading.

Transformer Load - H347 (75VA)

1. H347 Transformer at full loading consumes a maximum of 15W of power
2. When dimmer or switch is on the secondary (120V) side of the transformer, power is consumed by the transformer when the dimmer or switch is in "OFF" mode at 2.5W and in "ON" mode at 15W maximum with full loading.
3. When a dimmer or switch is on the primary (347V) side of the transformer, power is consumed only in "ON" mode to a maximum of 15W under full loading.

Protected / Non-insulated Soffits, Porches, and Canopies

Halo LED modules when used with Non-IC recessed housings in Non-insulated protected soffits, porches or canopies offers a solution for outdoor accent lighting. Halo LED is rated for operation from -30°C to 40°C when used with H7T, H7TNB, H7RT, ET700, ET700R, H750T, H750TCP, H750TD010, H750RTD010, H750TCPD010 Series non-IC housings.

Ordering Information

Sample number: ML706827 494WB06
Order LED Module and trim separately

Accessories

(see product details for application information)

Oversize Trim Ring

- OT490WH-6" Oversize white die-cast trim ring 9-1/4" O.D. Attaches to LED module, substitute for standard trim ring shipped with trims.
- OT400P-Oversize White Metal Trim Ring 6" ID x 9-1/4" OD
- OT403P-Oversize White Plastic Trim Ring 6" ID x 8" OD

Transformer

- H277-300VA Transformer - Steps 277 line voltage down to 120V (see App. Note)
- H347-75VA Transformer - Steps 347 line voltage down to 120V (see App. Note)

Retrofit

ML7RAB-Retrofit Adapter Band for Housings without Torsion Spring Receivers. The ML7RAB kit supplies parts to retrofit four housings; the kit includes: 4 - Retrofit Adapter Bands with screws and locking wire nuts.

LYONS ELECTRIC IS NOT LIABLE OR HELD RESPONSIBLE FOR THE INSTALLATION OF THE ELECTRICAL SYSTEM ASSOCIATED WITH THIS DRAWING. THE INSTALLING ELECTRICAL CONTRACTOR ASSUMES FULL RESPONSIBILITY FOR A FULLY CODE COMPLIANT ELECTRICAL SYSTEM REGARDLESS OF THE INFORMATION FOUND IN THIS DRAWING SET.

DESCRIPTION: LED Trims

Multiple reflector and baffle options allow the Halo LED recessed luminaire to be used anywhere in the home. Choose the best reflector finish and trim for the interior space. Aesthetically pleasing regressed shower trim is available for applications requiring wet location listings.

HALO®

494P06 White Reflector with White Trim Ring

- Halo matte white finish
- Die-cast trim ring and aluminum reflector
- Trim ring height of .160" at OD and .180" at ID
- Provides clearance for remodeler flange and gasket for AIR-TITE™ seal

494P06
White Reflector
with White Trim Ring

494SC06 Specular Reflector with White Trim Ring

- Halo matte white finish trim ring
- Die-cast trim ring and aluminum reflector
- Trim ring height of .160" at OD and .180" at ID
- Provides clearance for remodeler flange and gasket for AIR-TITE™ seal

494SC06
Specular Reflector
with White Trim Ring

494H06 Haze Reflector with White Trim Ring

- Halo matte white finish trim ring
- Die-cast trim ring and aluminum reflector
- Trim ring height of .160" at OD and .180" at ID
- Provides clearance for remodeler flange and gasket for AIR-TITE™ seal

494H06
Haze Reflector
with White Trim Ring

494WB06 White Baffle with White Trim Ring

- Halo matte white finish
- Die-cast trim ring and aluminum reflector
- Trim ring height of .160" at OD and .180" at ID
- Provides clearance for remodeler flange and gasket for AIR-TITE™ seal

494WB06
White Baffle
with White Trim Ring

492PS06 White Lensed Shower Trim with White Trim Ring

- White trim ring and baffle, regressed lens
- Wet location listed for use in showers and protected canopy applications
- Suggested for use:
 - over tubs and showers
 - eaves and soffits
- Aluminum baffle and die-cast trim ring
- Frosted glass regressed lens
- Trim Height of .160" at OD & .180" at ID
- Provides clearance for remodeler flange and gasket for AIR-TITE™ seal

492PS06
Lensed White Shower Trim
with White Trim Ring

TRM490WH Thin Profile Trim Ring (Optional Accessory)

- Die-cast trim ring
- Thin trim ring provides a more subtle ceiling appearance
- Purchase as accessory and discard ring supplied with trim
- Trim ring height of .120" at OD and .180" at ID

TRM490WH
Optional Accessory
Thin Profile Trim Ring

COOPER LIGHTING

Streetworks

DESCRIPTION

The Galleon™ LED luminaire delivers exceptional performance in a highly scalable, low-profile design. Patented, high-efficiency AccuLED Optics™ system provides uniform and energy conscious illumination to walkways, parking lots, roadways, building areas and security lighting applications. IP66 rated and UL/cUL Listed for wet locations.

Catalog #	GAN-AE-03-LED-U-T3-BZ	Type	OB
Project	PDQ Washington Avenue	Date	8-25-15
Comments	157 Watt Single Head Pole		
Prepared by	KRK		

SPECIFICATION FEATURES

Construction
Extruded aluminum driver enclosure thermally isolated from Light Squares for optimal thermal performance. Heavy-wall, die-cast aluminum end caps enclose housing and die-cast aluminum heat sinks. A unique, patent pending interlocking housing and heat sink provides scalability with superior structural rigidity. 3G vibration tested. Optional tool-less hardware available for ease of entry into electrical chamber. Housing is IP66 rated.

Electrical
LED drivers are mounted to removable tray assembly for ease of maintenance. 120-277V 50/60Hz, 347V 60Hz or 480V 60Hz operation. 480V is compatible for use with 480V Wye systems only. Standard with 0-10V dimming. Shipped standard with Eaton proprietary circuit module designed to withstand 10kV of transient line surge. The Galleon LED luminaire is suitable for operation in -40°C to 40°C ambient environments. For applications with ambient temperatures exceeding 40°C, specify the HA (High Ambient) option. Light Squares are IP66 rated. 90% lumen maintenance expected at 60,000 hours. Available in standard 1A drive current and optional 530mA and 700mA drive currents.

two or more luminaires at 90° and 120° apart, the EA extended arm may be required. Refer to the arm mounting requirement table on page 3. Round pole adapter included. For wall mounting, specify wall mount bracket option. 3G vibration rated.

Finish
Housing finished in super durable TGIC polyester powder coat paint, 2.5 mil nominal thickness for superior protection against fade and wear. Heat sink is powder coated black. Standard colors include black, bronze, grey, white, dark platinum and graphite metallic. RAL and custom color matches available.

Warranty
Five-year warranty.

Optics
Patented, high-efficiency injection-molded AccuLED Optics technology. Optics are precisely designed to shape the distribution maximizing efficiency and application spacing. AccuLED Optics create consistent distributions with the scalability to meet customized application requirements. Offered standard in 4000K (v- 275K) CCT 70 CRI. Optional 6000K CCT and 3000K CCT.

Mounting
Extruded aluminum arm includes internal bolt guides allowing for easy positioning of fixture during assembly. Designed for pole or wall mounting. When mounting

- NOTES:**
- Designlights Consortium¹⁷ Qualified. Refer to www.designlights.org Qualified Products List under Family Models for details.
 - Standard 4000K CCT and minimum 70 CRI.
 - Requires the use of a step down transformer when combined with MS/DIM, MS/X or DIMRE.
 - Only for use with 480V Wye systems. Per NEC, not for use with ungrounded systems, impedance grounded systems or corner grounded systems (commonly known as Three Phase Three Wire Delta, Three Phase High Leg Delta and Three Phase Corner Grounded Delta systems).
 - May be required when two or more luminaires are oriented on a 90° or 120° drilling pattern. Refer to arm mounting requirement table.
 - Factory installed.
 - 2L is not available with MS/X or MS/DIM at 347V or 480V. 2L in AE-02 through AE-04 requires a larger housing, normally used for AE-05 or AE-06.
 - Not available with LumaWatt wireless sensors.
 - Use dedicated IES files for 3000K and 6000K when performing layouts. These files are published on the Galloon luminaire product page on the website.
 - 1 Amp standard. Use dedicated IES files for 530mA and 700mA when performing layouts. These files are published on the Navion luminaire product page on the website.
 - Consult factory for more information.
 - Replace 'U' with specific voltage.
 - The FSIR-100 accessory is required to adjust parameters.
 - Not available with HA option.
 - LumaWatt wireless sensors are factory installed only requiring network components RF-EM-1, RF-GW-1 and RF-ROUT-1 in appropriate quantities. See www.eaton.com/lighting for LumaWatt application information.
 - Sensor mounted externally. Available in 2, 3, 4 or 6 Light Square configurations. Replace 'X' with number of Light Squares in low output mode. For ON/OFF operation, replace 'X' with '0'. Maximum two Light Squares in low output mode. Not available with dimming driver. No terminal block with bi-level operation.
 - Only for use with SL2, SL3, SL4 and AFL distributions. The Light Square trim plate is painted black when the HSS option is selected.
 - This tool enables adjustment of parameters including high and low modes, sensitivity, time delay, cutoff and more. Contact your lighting representative at Eaton for more information.
 - One required for each Light Square.

SSS SQUARE STRAIGHT STEEL

COOPER LIGHTING

Catalog #	SSS4A20SFN1XG	Type	OB
Project	PDQ Washington Avenue	Date	8-25-15
Comments	Single Head Pole		
Prepared by	KRK		

- FEATURES**
- ASTM Grade steel base plate with ASTM A366 base cover
 - Hand hole assembly 3" x 5" on 5" and 6" pole; and 2" x 4" on 4" pole
 - 10'-39" mounting heights
 - Drilled or tenon (specify)

ORDERING INFORMATION

SAMPLE NUMBER: SSS5A20SFN1XG

N=Type N Drilling

- NOTES:** 1. All shaft sizes nominal. 2. Square poles are 3 at 90°, round poles are 3 at 120°. 3. Outlet is located 4" above base and on same side of pole as hand hole, unless specified otherwise. Receptacle not included, provision only. 4. Additional hand hole is located 12" below pole top and 90° from standard hand hole location, unless otherwise specified.

WARNING: The use of unauthorized accessories such as banners, signs, cameras or pennants for which the pole was not designed voids the pole warranty from Eaton's Cooper Lighting business and may result in pole failure causing serious injury or property damage. Upon request, Eaton's Cooper Lighting business will supply information regarding total loading capacity. The pole warranty from Eaton's Cooper Lighting business is void unless poles are used and installed as a complete pole/luminaire combination. This warranty specifically excludes failure as the result of a third party act or omission, misuse, unanticipated uses, fatigue failure or similar phenomena resulting from induced vibration, harmonic oscillation or resonance associated with movement of air currents around the product.

Specifications and dimensions subject to change without notice. Consult your Eaton's Cooper Lighting business representative or visit www.cooperlighting.com for available options, accessories and ordering information.

- NOTES:**
- DesignLights Consortium® Qualified. Refer to www.designlights.org Qualified Products List under Family Models for details.
 - Standard 4000K CCT and minimum 70 CRI.
 - Requires the use of a step down transformer when combined with MS/DIM, MSX or DIMRE.
 - Only for use with 480V Wye systems. For NEC, not for use with ungrounded systems, impedance grounded systems or corner grounded systems (commonly known as Three Phase Three Wire Delta, Three Phase High Leg Delta and Three Phase Corner Grounded Delta systems).
 - May be required when two or more luminaires are oriented on a 90° or 120° drilling pattern. Refer to arm mounting requirement table.
 - Factory installed.
 - 2L is not available with MSX or MS/DIM at 347V or 480V. 2L in AE-02 through AE-04 requires a larger housing, normally used for AE-05 or AE-06.
 - Not available with LumaWatt wireless sensors.
 - Use dedicated ES files for 300K and 6000K when performing layouts. These files are published on the Galleon luminaire product page on the website.
 - 1 Amp standard. Use dedicated ES files for 500mA and 700mA when performing layouts. These files are published on the Navion luminaire product page on the website.
 - Consult factory for more information.
 - Replace 'U' with specific voltage.
 - The FSIR-100 accessory is required to adjust parameters.
 - Not available with HA option.
 - LumaWatt wireless sensors are factory installed only requiring network components RF-EM-1, RF-GW-1 and RF-ROUT-1 in appropriate quantities. See www.eaton.com/lighting for LumaWatt application information.
 - Sensor mounted externally. Available in 2, 3, 4 or 8 Light Square configurations. Replace 'X' with number of Light Squares in low output mode. For ON/OFF operation, replace 'X' with '0'. Maximum two Light Squares in low output mode. Not available with dimming driver. No terminal block with bi-level operation.
 - Only for use with SL2, SL3, SL4 and AFL distributions. The Light Square trim plate is painted black when the HSS option is selected.
 - This tool enables adjustment of parameters including high and low modes, sensitivity, time delay, cutoff and more. Consult your lighting representative at Eaton for more information.
 - One required for each Light Square.

Specifications and dimensions subject to change without notice.

N=Type N Drilling

- NOTES:** 1. All shaft sizes nominal. 2. Square poles are 3 at 90°, round poles are 3 at 120°. 3. Outlet is located 4" above base and on same side of pole as hand hole, unless specified otherwise. Receptacle not included, provision only. 4. Additional hand hole is located 12" below pole top and 90° from standard hand hole location, unless otherwise specified.

DIMENSIONS

WARNING: The use of unauthorized accessories such as banners, signs, cameras or pennants for which the pole was not designed voids the pole warranty from Eaton's Cooper Lighting business and may result in pole failure causing serious injury or property damage. Upon request, Eaton's Cooper Lighting business will supply information regarding total loading capacity. The pole warranty from Eaton's Cooper Lighting business is void unless poles are used and installed as a complete pole/luminaire combination. This warranty specifically excludes failure as the result of a third party act or omission, misuse, unanticipated uses, fatigue failure or similar phenomena resulting from induced vibration, harmonic oscillation or resonance associated with movement of air currents around the product. Specifications and dimensions subject to change without notice. Consult your Eaton's Cooper Lighting business representative or visit www.cooperlighting.com for available options, accessories and ordering information.

DESCRIPTION

The patented Lumark Crosstour™ LED Wall Pack Series of luminaires provides an architectural style with super bright, energy efficient LEDs. The low-profile, rugged die-cast aluminum construction, universal back box, stainless steel hardware along with a sealed and gasketed optical compartment make the Crosstour impervious to contaminants. The Crosstour wall luminaire is ideal for wall/surface, inverted mount for façade/canopy illumination, post/bollard, site lighting, floodlight and low level pathway illumination including stairs. Typical applications include building entrances, multi-use facilities, apartment buildings, institutions, schools, stairways and loading docks test.

SPECIFICATION FEATURES

Construction
Slim, low-profile LED design with rugged one-piece, die-cast aluminum hinged removable door and back box. Matching housing styles incorporate both a small and large design. The small housing is available in 7W and 18W. The large housing is available in the 26W model. Patent pending secure lock hinge feature allows for safe and easy tool-less electrical connections with the supplied push-in connectors. Back box includes three (3) half-inch, NPT threaded conduit entry points. The universal back box supports both the small and large forms and mounts to standard 3-1/2" to 4" round and octagonal, 4" square, single gang and masonry junction boxes. Key hole gasket allows for adaptation to junction box or wall. External fin design extracts heat from the fixture surface. One-piece silicone gasket seals door and back box. Minimum 5" wide pole for site lighting application. Not recommended for car wash applications.

Optical
Silicone sealed optical LED chamber incorporates a custom engineered mirrored anodized reflector providing high-efficiency illumination. Optical assembly includes impact-resistant tempered glass and meets IESNA requirements for full cutoff compliance. Solid state LED Crosstour luminaires are thermally optimized with five (5) lumen packages in cool 5000K or neutral warm 3500K LED color temperature (CCT).

Electrical
LED driver is mounted to the die-cast housing for optimal heat sinking. LED thermal management system incorporates both conduction and natural convection to transfer heat rapidly away from the LED source. 7W models operate in -40°C to 40°C [-40°F to 104°F]. 18W and 26W models operate in -40°C to 40°C [-40°F to 104°F]. High ambient 50°C models available. Crosstour luminaires maintain greater than 90% of initial

light output after 72,000 hours of operation. Three (3) half-inch NPT threaded conduit entry points allow for thru-branch wiring. Back box is an authorized electrical wiring compartment. Integral LED electronic driver incorporates surge protection. 120-277V 50/60Hz or 347V 60Hz models.

Finish
Crosstour is protected with a Super durable TGIC carbon bronze or summit white polyester powder coat paint. Super durable TGIC powder coat paint finishes withstand extreme climate conditions while providing optimal color and gloss retention of the installed life.

Warranty
Five-year warranty.
