*in progress, releases on Well 29 public meeting on filter and standby status, and
on public participation in siting of facilities SOP (when approved by Common
Council)

Conservation

The updated "Summary of Goals for the Conservation of Water and the Sustainability of
the Groundwater Resource" table was submitted to accompany our rate case at the PSC.

I met with the Conservation and Sustainability Task Force on June 16, and I am working
with them to finalize and polish the Plan. Our goal is to have the Plan's final version
done by July 7. The City's Sustainable Design and Energy Committee has asked for a
presentation on the Plan for their July 14 meeting.

Respectfully submitted,

Gail Gawenda
Public Information Officer
