- The rule being petitioned reads as follows: (Cite the specific rule number and language. Also, indicate the nonconforming conditions for your project.)
 321.06 All habitable rooms, kitchens, hallways, bathrooms and corridors shall have a ceiling height of at least 7 feet. **Hallway has a sloped ceiling 5' 5.5" - 7' 6.5"**
 321.04 **Stairways shall measure at least 36 inches in width. Our stairway is 32.75"**
 321.04(2)(b)1.a. Risers may not exceed 8 inches in height measured vertically from tread to tread. **Our risers are 8.25" high.**
 321.04(4)(b) The landing shall be at least as wide as the treads and shall measure at least 3 feet in the direction of travel. **Our landing is 26.75" deep.**
 - The rule being petitioned cannot be entirely satisfied because:
We cannot change hallway ceiling height w/out building a dormer. Both door & stair variance were city approved, inspected, & approved again.
We cannot change staircase or landing width or depth; as staircase is located between the load bearing & kitchen walls & would encroach on doorways. And stairway has already been approved for variance originally, and city inspections passed.
 - The following alternatives and supporting information are proposed as a means of providing an equivalent degree of health, safety, and welfare as addressed by the rule:
Providing a POWDER ROOM on the 2nd floor eliminates the need to go up and down the stairs in the dark of night.
The existing bedrooms and the new bathroom will have 32" wide entry doors.
The hallway is wider than the 36" necessary, at 64".
Ensure installation of Interconnected smoke detectors ON ALL 3 LEVELS OF HOME.
Non-slip flooring surfaces such as carpeting & matte luxury tile will cover the entire 2nd floor.
We will install 2 NEW egress windows in both bedrooms. Currently there are no egress windows.
- *** Please see the following attached documents: 1. The Approved variance for the stairway remodel in 1999. 2. The Approved building permit application for the dormer in 1985. 3. The Approved plan set for the dormer in 1985, which includes the bedrooms, stairway and hallway sizes and locations. 4. Our proposed drawings. 5. Photos of the existing spaces. ***
- Note: Please attach any pictures, plans, or required position statements.
