Re: May 15th Habitat Stewardship Committee Meeting

Dear Habitat Stewardship Committee,

Thank you for inviting me to attend the May 15th Habitat Stewardship Committee.

I would like the Committee to issue me a permit to remove the tree located closest to north driveway of my property located at 2405 S. Stoughton Road, Madison. I have designated this tree; "Tree A" in the attached pictures and Site Plan.

The location of Tree A is preventing a safe egress to the north direction along the S. Stoughton Road east frontage road.

Specifically, my employee drivers, and other non-employee drivers, must be exposed the following unsafe work conditions during any attempted egress to the north from my property:

1. Semi-tractor with 53' length trailer must enter on coming traffic, southward bound traffic, to create enough swing space to miss contacting Tree A.
2. The 53' trailer must roll up onto the turf at base of Tree A; thus, causing the trailer to list at a severe angle that could cause a flip over of trailer and/or tractor.

Please understand that Tree A must be removed to provide safe northerly direction egress for tractor trailers.

Thank you for your understanding and cooperation with my request.

Sincerely,

Mike Dwyer
President/Owner
