Subject: Parman Terrace - July 15 Transportation Commission Agenda Items

Hi Ann,

I plan to present (30 min) the construction of Parman Terrace to the commission members.

Here is a description of the project: *“The City is planning a 2027 construction project for Parman Terrace (Odana Road to the cul-de-sac). The project includes replacement of sanitary sewer main and laterals, water main and services, storm sewer main and structures, base course, driveway aprons, asphalt pavement, curb & gutter, pavement markings, signs, improvement on pedestrian crossings, and install sidewalk. Installation of sidewalk south of Odana Road between Parman Terrace and Anthony Lane. Water main connection from Parman Terrace to the Council Crest and Hiawatha Dive intersection. The width of the street for Parman Terrace has three design alternatives considered.”*

Attached are the agenda exhibits.

I am seeking feedback from the commission regarding the street layout design alternatives considered.

Thanks,

Nashaly Gutierrez
