RE: St. Bernard Parish
2438 Atwood Ave.
Madison, WI 53704

To Whom It May Concern:

It is the intent of the Diocese of Madison and those associated with St. Bernard Parish located in Madison, Wisconsin, to replace the roof on the north west corner of the church. (Please See Photos) The roofing materials proposed for replacement shall consist of .DaVinci brand synthetic slate tiles with an approved color. New 16 oz copper flashings, gutters and downspouts will also be installed.

Krause Konstruction will provide 95% accuracy to the original edifice utilizing the best available materials in order to maintain the historical accuracy of St. Bernard Parish.

Thank You,

Jason Krause

St. Bernard Parish

2438 Atwood Ave.

Madison, WI 53704

WORK AREA 1

Northwest Corner of Church Roof

The roof on the Northwest corner is currently covered with asphalt shingles. Any wood that is structurally unsound and could cause further deterioration to the existing roof will be replaced. Only approved materials will be used to ensure that no further damage will occur to the integrity of the original structure.

Scope of work: Replace asphalt shingles of NW corner of church roof with new synthetic slate tiles.

1. Remove all deteriorated asphalt roofing shingles currently covering the northwest corner of the church.
2. Replace any missing or deteriorated wood on the northwest corner of the church prior to covering the roof area to secure structure.
3. Install High Temp Ice and Water Shield to ensure water tight seal as well as a weather barrier.
4. Install new and approved synthetic tile slate with color to match existing roof profile.
5. All newly replaced tiles will be fastened to church roof with ring shank, galvanized steel screws.

Madison, WI 53704

WORK AREA 2

Northwest Corner of Church Roof

Due to the current condition of the existing roof area, all flashing, gutters and downspouts on the northwest corner of the church will be replaced with new. All materials used will be installed to keep St. Bernard Parish' historical profile integrity.

Scope of work: Replace current flashings, gutters and downspouts on the northwest corner of the church.

1. Remove all damaged or deteriorated flashings, gutter and downspouts that now exist on northwest corner of the church roof.
2. Replace any missing or deteriorated wood prior to new material installation.
3. Install new 16 oz. copper flashings, downspouts and gutters to match existing profile.
4. All newly replaced flashings, downspouts and gutters will be fastened to roof perimeter with copper nails. All joints will be riveted and soldered.

RE: St. Bernard Parish
2438 Atwood Ave.
Madison, WI 53704

To Whom It May Concern:

Upon receiving the Landmarks Commission Application in regard to roofing the northwest corner Heather Bailey had some issues in which needed to be clarified. The answer to Heather's first question about the materials that currently cover the area of contention are, we assume, asphalt shingles. This section appears to have been added to the main structure after it was constructed. The other materials used for the roof that is sloped comprise of clay tile, and copper standing seam.

The second question pertains to the materials Krause Konstruction has proposed to use and how well it will match the current roof. The materials used will match 90% in color, dimensions and appearance.

We have enclosed brochures explaining the product; DaVinci Synthetic Slate Roofing Systems. Krause Konstruction has used this product several times and is confident that it will meet specifications for this particular project.

Thank You,

Jason Krause

WE KEPT EVERYTHING YOU LOVE...

and made it better.

It's no wonder people are drawn to the timeless good looks of slate tile and cedar shake. The allure is unmistakable. A DaVinci composite roof lives up to the look of nature, but does so without the ongoing maintenance, repairs and replacement.

At DaVinci, we made a good thing better:

Resistant to fading, rotting, cracking and pests

Stands up to wind, hail and fire as well as or better than natural materials

Enjoy the peace of mind that comes with a Lifetime Limited Material Warranty

Every tile reflects the artistry and the genius of DaVinci himself

LOOKING FOR ASSISTANCE?

We're ready to help.

If you have questions, feel free to contact us directly.

A DaVinci Project Specialist will answer any questions you have concerning product differences, color selection, project timing and contractor selection.

MLDVBRO2018 - 01/2019

A legacy of beauty

**WE FIT
YOUR STYLE**

**WE STAND UP TO
YOUR WEATHER**

*From the mountains to the coasts...
Wherever you call home, a DaVinci roof
lives up to your vision of beauty and stands up
to the challenges of your weather.*

DaVinci has been the leader in composite roofing for nearly two decades. Our commitment to creating durable, beautiful roofing tiles is unparalleled. You won't find a more realistic or better-performing roofing product anywhere.

With DaVinci, you can retain all the character your home was intended to have without worrying about time-consuming and costly maintenance. Whether you're replacing an existing roof or looking for the crowning touch on a new construction project...
just leave it to DaVinci.

PERFECTLY AT HOME
in every corner of the continent

JUPITER, FLORIDA

On average, Jupiter gets brushed or hit by a hurricane about every 3 years with wind gusts reaching 100+ mph.

Engineered to look better, longer.

Thick construction, deep grooves and realistic grain patterns combine to create dramatic shadows and visual richness.

Due to DaVinci's performance features, many insurance companies now offer reduced rates when switching from cedar or slate, especially in high wind-, fire- or hail-prone areas.

Realistic chisel marks add a hand-crafted finishing touch.

DaVinci tiles are made of pure virgin resins fortified with state-of-the-art UV stabilizers. The color you pick is the color you keep.

DaVinci products are modeled from actual slate and hand-split shake for natural, non-repeating beauty.

WHAT'S BEHIND THE BEAUTY IS *Genius*

Every region of North America presents challenges to the exterior of your home. Mother Nature's fury is universal.

With the damaging effects of sun, hail, gale-force winds and freeze and thaw cycles, roofing materials are at odds with the weather year-round. DaVinci's unique composite construction outperforms both natural slate and cedar shake with a Class A Fire Rating, Class 4 Impact Rating and a

110 MPH Wind Rating. But the real genius of a DaVinci roof lies in its ability to provide lasting beauty and a constant source of pride.

DaVinci roof tiles are constructed of a composite material made of pure virgin resins, UV and thermal stabilizers as well as a highly-specialized fire retardant. The result is a state-of-the-art tile that gives us the greatest degree of color control and consistency in the manufacturing process and an end product that endures beautifully in any climate.

VS. NATURAL SHAKE

Unfortunately, the long-tailed performance attributes of cedar shake have disappeared along with old-growth trees. Rotting, cracking and curling is inevitable. In most climates, cedar shake has a lifespan comparable to (or even less than) asphalt. DaVinci composite tiles give you the look you love with superior durability for a lifetime.

DaVinci roofing tiles are proudly manufactured in Lenexa, Kansas.

VS. NATURAL SLATE

Like a rock? Slate tiles are not immune to the ravages of time...or hail. Its tiny fissures make natural slate susceptible to damage caused by freeze and thaw cycles. DaVinci slate products defy the elements for decades of enduring and worry-free beauty.

Our commitment TO COLOR

Nobody offers you more color options than DaVinci—your only limitation is your imagination.

Our industry-leading standard color palette is just the beginning. As our name implies, our ability to blend colors and create drama is unparalleled. So whether you're selecting a single color or opting for one of our expertly-crafted VariBlends™ we've got you covered.

When it comes to bringing out the best in your home...leave it to DaVinci.

JUST LIKE NATURE

DaVinci's proprietary VariBlend™ manufacturing process creates subtle color variations from one tile to the next. The nuanced shifts result in the most natural-looking composite roof you can buy.

Our color blend options consist of as few as one to as many as eight individual colors to create a dynamic range of results.

Introducing THE DAVINCI NATURE CRAFTED COLLECTION

The DaVinci Nature Crafted Collection is our most ambitious foray into color development to date.

Our advanced technology has simulated the warmth and softness of a patina previously only created by time and exposure to the elements. Our Nature Crafted Collection captures the look of a moment and retains it for decades.

Look for the Nature Crafted Collection symbol and experience the industry's most advanced color technology yet.

Cool roofs BUILT TO BE COOL AND STAY THAT WAY

DaVinci Cool Roof tiles reflect sunlight and heat away from the home. Higher emissivity and reflectivity rates lead to greater reductions in the cooling load and in return increase energy efficiency. Their ability to reduce the consumption of energy has earned them the designation of an ENERGY STAR® qualified product. Additionally, all Cool Roof designated colors meet Title 24 requirements for California.

Look for the Cool Roof symbol for options that can increase energy efficiency in your home.

Introducing
**HAND-SPLIT SIDING &
SELECT SHAKE ROOFING**

HAND-SPLIT SHAKE SIDING
BLACK OAK

DAVINCI HAND-SPLIT SHAKE SIDING

Expanding the legacy of beauty...

The anticipation is over—DaVinci now offers Hand-Split Siding, which gives you the look you love with superior durability for a lifetime. The tile molds are created from authentic cedar shake, giving any home the beauty of real cedar without ongoing maintenance. The attributes of real wood disappear over time, whereas our siding tiles are resistant to mold, algae, fire, pests, impact, and salt air.

By bringing 20 years of proven performance to a new exterior application, we've engineered siding that stands up to whatever your home may endure. Unlike real cedar, Hand-Split Shake Siding does not curl, cup, or split; it is easy to install and never requires painting. The color you pick is the color you keep because the tiles are made of virgin resins fortified with state-of-the-art UV stabilizers. When you demand the beauty of authentic wood but require effortless upkeep, DaVinci is on your side.

Inquire with your sales representative to learn more.

*Thick construction,
deep grooves and
realistic grain
patterns combine to
create dramatic
shadows and
visual richness.*

SELECT SHAKE ROOFING

Making a great thing greater

Along with the DaVinci reputation of durability and effortless upkeep, our Select Shake tiles imitate authentic cedar shake better than any other product on the market. The molds are created from real wood, giving your home the beauty of authentic cedar shake without the ongoing maintenance and upkeep. If your vision involves the look of traditional shake, these tiles are perfect for your project.

Our design doesn't stop at beauty—our Select Shake allows for faster installation and will withstand whatever Mother Nature brings to the exterior of your home. When you're looking for the beauty of real cedar with the lasting artistry of DaVinci, our Select Shake has your home covered.

Learn more about Select Shake on page 27.

**YOUR HOME WAS MADE
FOR CEDAR OR SLATE**

DaVinci was made for your home

THIS IS FOR KEEPS

It's easy to fall in love with the look of natural slate or cedar shake. Their beauty is at the heart of many architectural styles, old and new. DaVinci gives you the look you want and so much more: resistance to impact, splitting and cracking as well as a Class A fire rating and the peace of mind that comes with a Lifetime Warranty.

Visual **VERSATILITY**

DaVinci offers the beauty of natural slate and cedar shake in three different tile options, giving you the ability to meet your aesthetic vision as well as respect your budget.

MULTI-WIDTH

Our most authentic-looking and versatile option, DaVinci's Multi-Width tiles set the high mark for luxury. Laying tiles of multiple widths in a straight or staggered pattern creates the most natural, non-repeating appearance possible.

- MULTI-WIDTH SLATE Page 14
- MULTI-WIDTH SHAKE..... Page 24

SELECT SHAKE

Created from real cedar profiles, Select Shake gives your home the beauty of authentic wood while remaining maintenance-free. The versatile design provides a worry-free, best-in-class roof that speeds up installation with the look of multi-width shake.

- SELECT SHAKE Page 26

SINGLE-WIDTH

Single-width tiles add a budget-friendly touch of tradition to your home in either a straight or staggered pattern. The uniform tile size and impact-resistant composite construction work to reduce waste and speed up installation.

- SINGLE-WIDTH SLATE Page 16
- SINGLE-WIDTH SHAKE..... Page 28

BELLAFORTÉ

The inspired engineering of Bellaforté makes uncommon beauty considerably more attainable. Its innovative design requires less overlap (reducing waste and cost), making it a stylish upgrade that won't bust the budget.

- BELLAFORTÉ SLATE Page 18
- BELLAFORTÉ SHAKE..... Page 30

DAVINCI SLATE

Historically, attaining the luxurious look of natural slate hasn't been easy. The cost, the weight and the required army of skilled tradesmen made the installation process complicated and costly. Thanks to the genius of DaVinci, the look of slate is more viable than ever.

MULTI-WIDTH

Multi-width tiles provide the greatest degree of authenticity and flexibility.

SINGLE-WIDTH

Single-width tiles reduce material and speed up installation time without compromising style.

BELLAFORTÉ

The look of slate at a fraction of the cost and weight.

CREATING EXPOSURE

Straight or staggered tile coursing is a personal choice. Although budget and architectural style will enter into the equation, personal preference is typically the final determining factor. With DaVinci Multi-Width and Single-Width tiles, you have the greatest ability to vary tile placement. Both Bellaforté Slate and Shake tiles must be installed at a 12" exposure.

Multi-Width and Single-Width Slate can be installed at 6", 7", 7½" and 8" exposure.

Multi-Width, Single-Width, and Select Shake can be installed at 9" and 10" exposure.
