Subject: airc Double S smoking

I am against allowing the Double S Barbecue to smoke meat on Monroe Street.

I live at [REDACTED], 4 blocks from the smoker. I am a retired physician who dealt with lung disease.

Please note that the U.S. EPA states that wood smoke is bad for your health and causes a host of medical problems, including asthma, bronchitis, cancer and increased infant mortality. In my experience, children with asthma are very vulnerable to wood smoke. I believe that over time, if the wood smoking in our neighborhood is permitted, a child with asthma will have to go to the emergency room.

I visited the smoker at the Double S on Monroe Street during the demonstration, and the smoke was very thick and made me cough.

I appreciate your interest in protecting our quality of life and consistently applying your conditions.

William R. Brauer, M.D.
