Concept Review - Tenants

Concept Review - Partners and Tenants

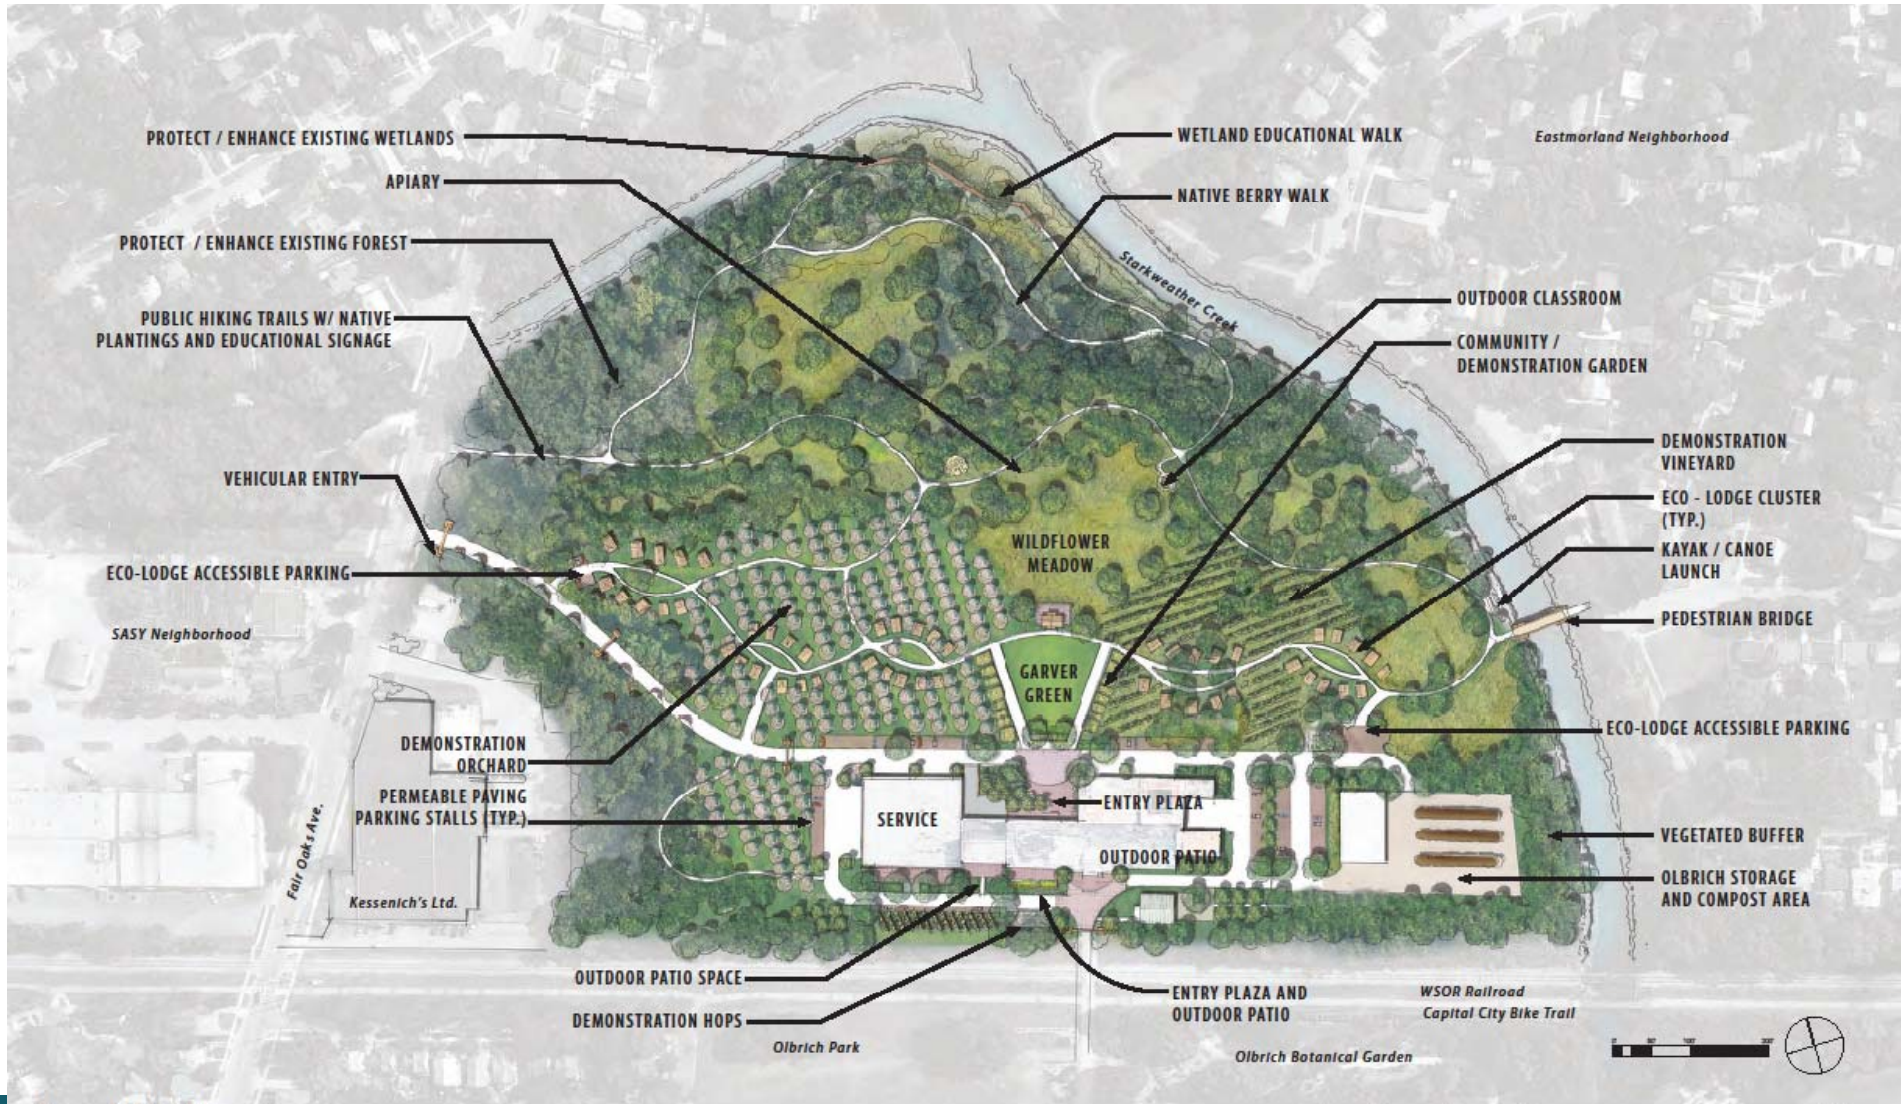

“The now notable Wisconsin Driftless Region has the ability to become the Napa Valley of local foods” – *Madison Region Economic Partnership*

The past inspires the future

Economic Benefits Multiplies for Madison

Jobs:

- **Conservatively**, estimate 93 jobs will be onsite and remain in City limits after opening. The need for more space to grow and add employees is a key driver in tenant demand.
- Provides quality job opportunities for workers with a variety of skills and educational attainment.

Multiple Tax Revenue Stream: Increased property, sales AND room tax revenue for the City.

Tourism Revenue: Increased local retail spending in the neighborhood and community

Multiplier Effects:

- 2.2 jobs are created for every \$100,000 in local food sales
- Estimated 200 construction jobs
- Local food producers much more likely to use locally grown ingredients from area farms
- Fosters a stronger, deeper relationship between visitors and local producers.

Sound Financial Concept

- ✓ Development track-record with committed socially responsible investors

Q: What if it doesn't go according to projections?

A: As in any real estate development, the project investors would receive less return and assume the associated financial risk.

- ✓ Addresses market demand for second stage company food production space as well as hospitality options in an overwhelmingly appropriate location. Second state companies in food production generated nearly 34% of jobs and about 34.5% of sales b/w 1995 and 2012.
- ✓ Contributes substantially to Madison's place on the global map as local foods hotspot and leader in tiny homes

Outstanding Compliance

Neighborhood Goals

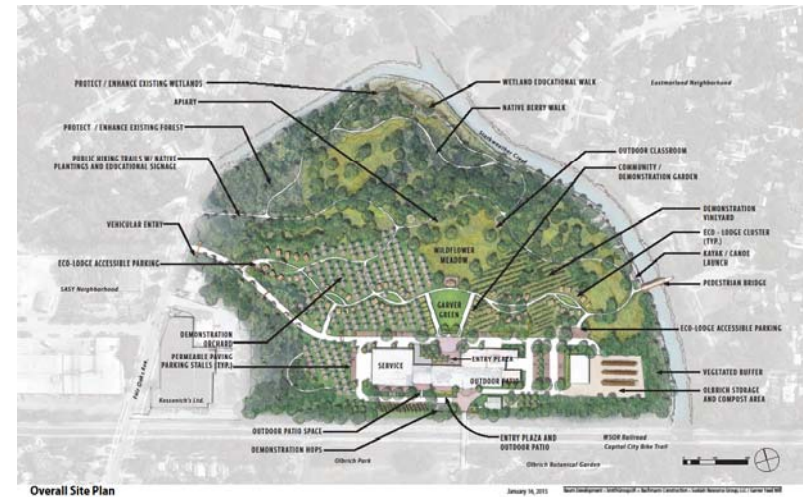

- ✓ Minimize impacts on the North Plat and neighborhoods surrounding the Garver Feed Mill;
- ✓ Encourage alternative means of transportation while minimizing required on-site parking;
- ✓ Ensure public access to the Garver Feed Mill;
- ✓ Preservation, to the largest extent possible, of the Garver Feed Mill;
- ✓ Sound integration of environmentally responsible technology and sustainable redevelopment;
- ✓ Encourage collaborations and communications with OBG, the City and the neighborhood

Responsive

- ✓ Real Estate

Staff indicated, and our team concurred, that there were workable resolutions to satisfy the conditions that are typical of the development process and that there are no insurmountable issues.
