Hello, this is a comment for agenda item 2 of transportation commission meeting scheduled for Feb 18.

I just wanted to say that I'm really disappointed with the general carelessness of KL Engineering to provide safe roadway designs. I'm reminded this yet again in the County Trunk MM & MC / Rimrock Rd Resurfacing project.

It feels like everything i see with KL Engineering's name attached is generally low quality design. Widening a corner radius, trimming down a refuge so cars can turn faster, lengthening turn lanes and just in general really uninitiated and poor quality, with no attempts to identify cost effective safety improvements as part of a resurfacing project.

Anyways that is all I have. I just wanted my opinion to be on record as generalized disappointment with KL Engineering. Every project, including resurfacing should be an opportunity maximized to make our transportation infrastructure safer, especially for the most vulnerable road users, and KL Engineering clearly isn't interested in that.

Thanks  
Alexander Harding
