

Households with Children Receiving SNAP

Census Tract: 55025001401 Measurement Period: 2013-2017

This indicator shows the percentage of households participating in the Supplemental Nutrition Assistance Program (SNAP) with children under 18 years old.

Why is this important?

i SNAP (Supplemental Nutrition Assistance Program), previously called the Food Stamp Program, is a federal-assistance program that provides low-income families with electronic benefit transfers (EBTs) that can be used to purchase food. The purpose of the program is to assist low-income households in obtaining adequate and nutritious diets. According to the More...

Low-Income and Low Access to a Grocery Store

Census Tract: 55025001401 Measurement Period: 2015

This indicator shows the percentage of the total population in a county that is low income and living more than one mile from a supermarket or large grocery store if in an urban area, and more than 10 miles from a supermarket or large grocery store if in a rural area.

Why is this important?

The accessibility, availability, and affordability of healthy and varied food options in the community increase the likelihood that residents will have a balanced and nutritious diet. A diet composed of nutritious foods, in combination with an active lifestyle, can reduce the incidence of heart disease, cancer, and diabetes, and is essential to maintain a healthy body

This indicator shows the percentage of households that do not have a vehicle.

Why is this important?

Vehicle ownership is directly related to the ability to travel. In general, people living in a household without a car make fewer than half the number of journeys compared to those with a car. This limits their access to essential local services such as supermarkets, post offices, doctors' offices, and hospitals. Most households with above-average incomes have
