Whereas, the Common Council passed resolution xxxxxx, which called upon the Sustainable Madison Committee to develop an energy and carbon action work plan for the City of Madison (“Energy Work Plan”), and;

Whereas, the Energy Work Plan is intended to help the City of Madison formulate and implement an energy policy consistent with the Madison Sustainability Plan that aims to reduce fossil-fuel based energy consumption and expand use of renewable energy sources in public and private buildings to ensure a resilient, healthy and economically robust region, and;

Whereas, the Energy Work Plan was developed principally through the efforts of an ad-hoc working group of seven Sustainable Madison Committee members who participated in four publically noticed meetings that invited nearly 3 dozen community members to identify and advocate for specific policies, practices and partnerships that might be included in the Energy Work Plan, and;

Whereas, the Energy Work Plan was finalized and ultimately approved by the Sustainable Madison Committee at a duly noticed meeting on January 25, 2016;

Whereas, key elements of the Energy Work Plan include (i) creating a working group to review the City’s overall climate change goals; (ii) creating a high level position in City government oriented around energy issues; (iii) supporting regional initiatives related to climate change; (iv) promoting existing City programs related to energy efficiency and renewable energy; (v) establishing a City-wide PACE program; (vi) enhancing the City’s efforts to implement its 2015 benchmarking resolution; (vii) developing an inventory of City-owned property suitable for solar development; (viii) increasing the City’s green sector economic development efforts; (ix) studying the feasibility of developing an internal sustainability fund based on City-operations; and (x) solidifying efforts to work collaboratively with MGE, including development of a Memorandum of Understanding that can serve as a framework for ongoing collaboration between MGE and the City;

Now, therefore, be it resolved that the Mayor and the Common Council of the City of Madison hereby:

- 1) Adopt the City of Madison Energy Work Plan in substantial form as presented to the Common Council for approval and included with this Resolution as Attachment A.
- 2) Authorize the Sustainable Madison Committee (SMC), together with City staff, to implement the Energy Work Plan, including entering into discussions with Madison Gas & Electric (MGE) to develop a Memorandum of Understanding as a framework for ongoing collaborative action between the City of Madison and MGE.

Dear Carbon and Energy Work Group:

Carbon pollution drives climate change, leading to rising temperatures, more frequent and extreme weather events, and serious public health risks. We need to act with the boldness and urgency that climate change demands, and set aggressive goals for carbon reduction.

I urge you to support a 100% carbon-free goal for our city and to begin by leading the transition from coal to clean energy: Setting this goal will benefit Madison in more ways than just protecting our future. Making Madison's electricity coal-free will reduce air pollution, create clean energy jobs, and reduce our carbon emissions.

We don't have a choice about whether we address climate change -- we are already feeling the effects. We do have a choice to become a leader in tackling this problem, and I believe that our city can and should. Please support making Madison carbon-free.

Sincerely,
