

To whom it may concern:

I am not in favor of the proposed changes to the Bus stops on Breese Terrace from North of Regent Street to South Breese Terrace. The block of South Breese Terrace between Regent St. and Monroe St. has 5 parking stalls which are used by customers. There is very little public parking available in this area. It would be a hardship for a number of businesses if this parking is lost.

There also are safety issues with having the bus stops on South Breese Terrace for the Pedestrian / Bike Path. For west bound buses, there would be traffic blocking the Path when the bus stops and pulls out. For east bound buses, the buses would block the view of Pedestrians and Bicycles for the cars going by.

South Breese Terrace was where the bus stop was about 20 years ago. It was moved because of problems with the seldom used railroad crossing. Now it is a high use Pedestrian / Bike Path.

These are just a few of the problems with relocating the bus stop. It is a big mistake; opening the City to possible lawsuits.

To whom it may concern.

As a representative of the Zor Shriners, I would like to express our strong disapproval for relocating the bus stop to South Breese Terrace.

7/5/17

Hotel Red

1501 Monroe St.

To whom it may concern:

I am not in favor of the proposed changes to the Bus stops on Breese Terrace from North of Regent Street moving to South Breese Terrace. The block of South Breese Terrace between Regent St. and Monroe St. has 5 parking stalls which are used by customers. There is very little public parking available in this area. It would be a hardship for all of businesses if this parking is lost. See included letters signed by all of the businesses on the triangle park.

There also are safety issues with having the bus stop on South Breese Terrace. East bound buses would block the view of Pedestrians and Bicycles for the cars going by. Also, the buses would add to an already congested block. You have a short block with driveways for Pizza Pit, Clarendon Apartments, Gulesserian's, a Bicycle / Pedestrian Path, and two major intersections.

On Game Days the bus would need to cut across a mass of people to make a right on Regent St., a left on Short St, and a left onto Monroe St. By stopping at the new stop on Monroe St. and straight down Monroe St would be much safer.

Relocating the bus stop is a big mistake. We already have an excellent bus stop.

Gulesserian's

8 South Breese Terrace

Problems with relocating the bus Stop from N. Breese Ter. to S. Breese Ter.

- *Moving to a very short block.**
- *It would slowdown traffic flow on an already busy block.**
- *There will be an increase of traffic from the closing down of Crazy Legs.**
- *Driveways for Pizza Extreme, Clarendon Apartments and Gulesserian's**
- *Fast moving bicycles that do not slowdown or stop at the stop signs.**
- * Three Pedestrians crossings on the block.**
- *Game Days: People pick up and drop off fans on S. Breese Terrace.**
- *Six businesses would have a loss of street parking: already in short supply.**
- *All six businesses have signed a letter objecting to the bus stop relocation.**
- * The Zor Shriners would loss there Brat Stand. Their only major Fund Raiser.**
- *On Game Days the bus would have to fight its way through Fans (that have been drinking) to turn onto Regent St., Short St, and Monroe St.**
- * I recommend that on Game Days, the bus would stop at the new bus stop on Monroe St. and goes straight down Monroe St. to avoid crowds.**
- *About 20 years ago there was a bus stop on S. Breese Terrace and it was move because of problems with traffic. That was before the Bike Path was there.**
- *The current bus stop is excellent and safe. WHY MOVE**
