SECTION 1: SCOPE OF WORK

1.1. Purpose

The Community Development Division (CDD) of the City of Madison seeks to create the necessary conditions for Madison residents to realize their full potential through the building of human capital and economic development. The City is therefore seeking proposals from organizations to provide programming and services for young children and the early childhood care and education community and workforce. This is defined as individuals and programs *primarily* serving children ages birth to 5 years old.

The City of Madison's Community Development Division's programming is reviewed through the lens of its impact on poverty, racial equity, and social justice. Organizations that can demonstrate capacity to provide programming and services that will have an impact in those areas are encouraged to apply. This may look different from program to program, depending on the methods, curriculum, programming, etc. used in the program. Proposals should demonstrate a commitment to equity and inclusion by the promotion of diversity (racial, socio-economic, ability, etc.) at all levels of the program and the implementation of strategic responses.

1.2. Background

In 2016, Forward Community Investments (FCI) provided a framework for the City of Madison Community Development Division to use when allocated funding within the Division. It is available here: [FCI CDD Funding Process Study](#). One of the recommended Community Goals within the study was Shared Prosperity through Building Human Capital and Economic Development:

A continuum of quality, affordable early childhood education and care, elementary school-age care, and programs that support positive youth development for middle and high school aged during out-of-school time is available for low-income children and youth, especially those of color.

A proposed objective of that goal was to *“Provide for the availability of affordable, stable, quality early childhood education and care, and neighborhood-based elementary school-age care for low-income children (birth to 12), children of color, and homeless children.”*

Several indicators of success were also recommended within that objective.

The Early Childhood Funding RFP was created to reflect the recommendations within the FCI framework.

1.3. Funding Requirements

Proposers may submit proposals using any of the following three methods:

1. **Direct provision of care for children ages birth to 5 years old:** This includes providing full-time or part-time child care at a regulated center, community facility or other location. Organizations offering care for children older than five years old can apply for funding under this RFP as long as the primary focus of care is for children under six years old.

Funding for school-age care (children six years old and older) will be released in a future RFP. Preference is given to accredited group programs; programs offering flexible schedules or 2nd and 3rd shift care; programs in geographically underserved areas of Madison; and programs that serve infants and toddlers or a high proportion of children with high barriers to success. All applicable laws and rules regarding regulation of facilities and care for children must be followed. See administrative rules published by the Wisconsin Department of Children and Families for applicable regulations:

<https://dcf.wisconsin.gov/ccregulation>.

2. **Consultative services for individuals or programs in the early childhood care and education community:** This includes consultation in programs on specific topics or consultation and services regarding specific programs, classrooms, groupings or individual children in care (with parent permission).
3. **Training for early childhood care and education professionals:** This includes training provided in large settings, open to the early childhood community and also the provision of more specialized training to a specific set of programs or individuals to be determined in consultation with CDD Child Care Unit staff.

NOTE: If an applicant is proposing to include multiple methods of services or programs, for example, on-site child care programming and separately provide consultation services for other programs, two applications should be submitted separately. If an agency is proposing to do the same service at multiple locations, for example, child care at two different locations, one proposal may be submitted. The proposal should clearly delineate details for each location. Please contact Coral Manning (cmanning@cityofmadison.com) for any questions about clarifications regarding joint or singular proposals.

Strong proposals will include the following components:

- Specific methods for accomplishing one or more of the stated goals (see section 1.4)
- Clear explanation of the evidence, research or documentation of promising practice that supports the chosen method in the proposal
- Inclusion of methods that will serve children and families with high barriers to success and/or the professionals that care for them
- Clear demonstration of capacity of the proposer to meet one or more of the stated goals
- Reasonable and specific estimates of the number of individuals or programs impacted by the proposal including demographic information about the population who will be served (ages, locations of the city, race, income levels, etc.)
- A method that is within the above-mentioned options for accomplishing the goals: direct provision of care, consultation or training
- A commitment to equity as demonstrated by the promotion of diversity (racial, socio-economic, ability, etc.) at all levels of the program and the implementation of strategic responses to create inclusive environments

1.4. Measurements of Success

Goals

CDD seeks to fund programs that are evidenced-based or promising practices that employ a holistic or collaborative approach. The programs should contribute to one or more of the following goals:

1. Increase access to high quality care for children who face multiple barriers to success (i.e. children living in poverty or facing housing insecurity, children with special needs, English language learners, etc.)
2. Create more opportunities for and access to infant and toddler care, especially in geographically underserved areas of Madison
3. Reduce expulsion and suspension of children in care
4. Increase skills and capacity for individuals working in child care programs to serve children with multiple barriers to success

Community Indicators of Success

The following are community-wide indicators of social change the City seeks to improve with this funding. Individual programs and services cannot typically show direct correlation to System Level Indicators. Rather, they can show progress at the program or service level using Population Level Indicators that have been shown to contribute to community or system-level outcomes. For example, a program could not show that its work alone contributed to a child graduating from high school. However, it could show that the child was meeting developmental milestones, which has been shown to contribute to success later in life.

System Level Indicators

- Increased collaboration and coordination between early childhood service providers
- Expansion of the capacity of all early childhood professionals to serve children with high barriers to success
- Reduction in the expulsion rate of children in child care
- Reduction in turnover of the early care and education field

Population Level Indicators

- Increased number of children served by high quality child care programs, especially if the program:
 - Serves infants and toddlers
 - Serves a high proportion of children with high barriers to success
 - Offer flexible schedules for parents
 - Is open for 2nd and 3rd shift care
 - Is in a geographically underserved area of Madison (see **Attachment B** for a map that shows households in poverty in Madison overlaid with the location of regulated child care providers)
 - Is accredited through the City of Madison
- Increased access and availability of supports to programs who seek to serve children with high barriers to success

- Increased number of children who are meeting developmental milestones and who are prepared to enter school socially, emotionally and academically

1.5. Funds Available

The total amount of funding available for early childhood care and education programming and services for this RFP is anticipated to be \$535,000. The City of Madison's 2020 budget will be deliberated upon and adopted in the fall of 2019. The response to this RFP will inform CDD's budget recommendations in 2020.

There is not a predetermined number of proposals that CDD will fund. Further, no allocation of funding within the three methods of services/programming has been predetermined. However, in line with current funding and recommendations from the City's Early Childhood Care and Education Committee, it is anticipated that a large majority of the funding will be used for direct provision of care for children ages birth to 5 years old.

Collaborative Proposals

Joint proposals that request funding for multiple agencies participating in a collaborative effort will be accepted under this RFP. Agencies should submit a single, joint proposal rather than several connected proposals. One fiscal agency must be identified and a Memorandum of Understanding/Agreement must be in place prior to contracts being signed. Joint proposals are appropriate when:

- Joint funding would increase program capacity or enable the existence of a program that would not otherwise be possible due to cost burden, staffing capacity, access to participants, or another similar reason
- Joint funding will decrease administrative burden for agencies involved and/or the City of Madison
- Joint funding strengthens the collaboration of agencies involved, the neighborhood, community, or connections between partners in the early childhood community

Contract Agreements

Recommendations for funding as a result of this RFP process will be three years in length with an option for two additional years of funding pending inclusion and approval in the City of Madison operating budgets, and demonstrated ability to meet contract goals. Reports for programming and services provided will be submitted to CDD quarterly.

These funds and resultant contracts will be subject to all city ordinances and rules governing purchase of service contracts, including but not limited to equal opportunity and benefits provisions and insurance requirements.
