

**NEIGHBORHOOD PETITION OF SUPPORT to include** 3 spur

**In the City of Madison's NEIGHBORHOOD TRAFFIC MANAGEMENT PROGRAM**

Representatives of your neighborhood have requested the City Traffic Engineering Division to consider Neighborhood Traffic Management on your street. **To be considered and begin the process a majority of households and businesses within the petition area** need to indicate their interest via this petition. By signing this form you are indicating your support and formally requesting to participate in the City of Madison's **Neighborhood Traffic Management Program** and understand that;

- \* The NTMP relies upon the use of physical devices such as; **islands, traffic circles, and speed humps** etc. to control the negative behavior of traffic and improve neighborhood livability.
  - \* The program requires a show of **resident support to be considered** for potential funding and **does not guarantee** a street will make the project list.
  - \* Since resources for these projects are limited a **ranking system** has been developed. If there is enough support to continue, your street will be ranked based upon the following criteria: Traffic Volume, % of Traffic Traveling 5mph over the Posted Speed Limit, Crashes, School Area, Pedestrian Area, School Walk Route, Bike Route.
  - \* If a street does receive funding and makes it to the **project phase**, the **City will present the neighborhood with a concept** to install NTMP devices at locations based upon neighborhood input and engineering principles.
  - \* A final **confidential survey** will be sent out to a defined "survey area" based upon the affected area of the device/s being proposed. **Permanent construction** of a NTMP device requires that **60% of the returned surveys** support that device/s.
- If you have questions regarding this petition or the Neighborhood Traffic Management Program, please contact Tom Mohr at 267-8725, or see Traffic Engineering's web page at <http://www.cityofmadison.com/trafficEngineering/programsTraffic.cfm>.
