Hello Tom,

As part of the Water Utility Cannonball Water Mains project we plan to run a 12 inch water main through Bowman Field along the south property line next to Madison Newspapers. We have a proposed route and would like your input before we get too far along. Adam Wiederhoeft, the project manager, talked with and had informal approval of the general route from Janet Schmidt, but with her no longer at Parks we would like your input. Part of the project involves acquiring a 20 foot wide easement centered on the pipe.

I have attached a map showing the proposed route. If you want to see better detail, there is a Microstation dgn, [10435WU-Water2018_Bowman.dgn](#), here: [M:\DESIGN\Projects\10435\Water\Design](#)

With the initial route chosen we encounter a few of the small trees that were recently planted south of the ball fields along the south property line that we propose moving. Our first thought was to move them north closer to the bike path, but this is where we would like input.

Acquiring easement rights involves introducing a Resolution to, and approval by, the Common Council and reviewing committees, and before we get that far we'd like to know that Parks is agreeable to our plan. You can contact me or Adam with questions or comments. I will be away from my desk this afternoon, Thursday 2/8 and Friday 2/9, but am otherwise generally available. There is no great rush, but with the Resolution process taking a fair amount of time we don't want to wait too long to get that started. We would like construction to take place in the Fall of 2018 after the ball seasons are finished so that we keep disruption of park activities to a minimum.

Thanks for your time,
David
