

Informational Presentation from City Engineering Regarding Potential Impact of Near West and John Nolen Drive Watershed Study Proposed Solutions on Park Owned Land

— Brittingham Park – Mills St Relief Sewer (park st outfalls)

Replace existing outfalls to Monona Bay with upsized pipes to reduce flooding on Regent St and Parks St Areas

James Madison Park – Hancock St Outfall

Upgrade existing storm sewer through James Madison Park

Provides flooding relief to Gorham, Johnson, and Hancock Streets

Will coordinate with Parks and fit in with James Madison Park Master plan when ready to initiate

Extensive and difficult permitting/construction to modify existing seawall

Quann Park – Bram St and Alliant Energy Center Outfalls
