Hello Urban Design Commissioners - I am writing to advocate for a little more street activation for the new proposed building along Odana Rd. The western corner facing Whitney Way seems engaging with windows and a patio, however the other side is quite bare.

Also, the original proposal included over 30 windows on the lowest two levels on the East Elevation of Building A. The updated February 2026 plans draw that number down in half, and leave a massive imposing brick wall in its place.

Could some brick be incorporated into higher levels as well, such as was done with the "Urbana" apartment building next door?

Thank you for your consideration,

Justin Rundle
