Window World Milwaukee LLC, proposing work at 1335 Rutledge street Madison W.I. 53703

Window World prides itself on providing the best product and service in the industry.

The reason for replacing the windows is on request from the property owner to provide windows that will replace windows that are rotting beyond repair. The replacement windows will enhance fuel efficiency, give the owner little to no maintenance, plus maintain the visual integrity and historic aesthetics of the property. The windows would only replace the inner part of the window. The exterior and interior will remain the same minus the storm windows. The exterior of the window frames on the first, second, and third floor would be re-trimmed with aluminum trim coil in white. By doing this it would only provide a layer of protection for the wood underneath, and maintain the maintenance free properties of this home.

The total number of replacement windows to be replaced is 36. None of the basement windows are to be replaced.

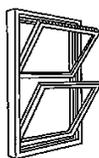

The exterior of the home currently has vinyl siding, aluminum trim around the windows, aluminum soffit and fascia, and aluminum on the porch ceiling. The surrounding homes have vinyl replacement windows, vinyl siding, aluminum trim around the windows, and aluminum soffit and fascia.

The following pictures will show the locations of the windows, and also confirm the above paragraph. Also there are pictures of the surrounding homes in the area. I would put an approximate age of the window as original to the home, early 1900's. The condition of the said windows is as follows. Most of the windows are rotting beyond repair, and have water and air infiltration. On the front of the home there is one window that has leaded glass, which would be replaced with a double hung with clear glass. There are also two windows that are on each side of the home that currently have grids that would be replaced with double hung clear glass. One window in the back of the home is a three lite window. This would remain a three lite window, with the same configuration $\frac{1}{4} \times \frac{1}{2} \times \frac{1}{4}$, but would operate as a sliding window instead of a casement window.

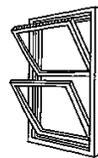

We feel that the 4000 series window provides the least amount of change to the windows. The glass lines on the 4000 are slim and provide the most light and replicate the sash profile better than the 6000 series which has a much wider sash profile. On the 6000 series frame, the frame is designed with a much bigger sash profile that cuts the glass size down at least an inch all around.

Thank you.

Picture # 1:

This is a side profile of our 4000 series double hung window. This picture shows the thickness of the mainframe and sash. The 4000 series window better replicates the existing windows at the 1335 Rutledge street address. As you can see on the 6000 series pictures, that the 6000 series mainframe and sashes are much more larger, thus shrinking the glass down a significant amount.

Picture # 2:

This is a top profile of our 4000 series double hung window. This picture shows the thickness of the mainframe and sash.

Picture # 3:

This is a bottom profile of our 4000 series double hung window. This picture shows the thickness of the mainframe and sash.

(Picture #26) FOND DU LAC NEWS PAPER HISTORICAL HOME WINDOW WORLD WORKED ON:

Window World restoration

Window World Inc., of Fond du Lac, owned and operated locally, offers vinyl replacement windows, sliding, gutters, leaf protectors and entry doors. Window World Inc. is the largest window replacement company in America, with over 130 stores nationally. Michael Devitt, owner, third from left, also owns Window World stores in Kaukauna and Bosc. He is joined by Christine Volkstein, left, office manager; Gene Ziemer, sales; and Tim Heintz, right, sales, as they stand outside a historical restoration project now Window World completed on Linden Street, in Fond du Lac. "We appreciate all of our customers and we serve throughout Southeastern Wisconsin. Window World, Simply the Best for Less," said Devitt. Call 920-923-4109 for a free estimate.
