- (b) Materials and Features.
 - 1. Alterations shall be in keeping with the original design and character of the building or site.
 - 2. The removal of historic features on elevations visible from the developed public right-of-way is prohibited.
 - 3. The introduction of conjectural architectural features without historic precedent on the building or site is prohibited.

Analysis and Conclusion

The proposed project is to install a wall sign above the entrance on the building at 1138 Williamson. The building at this location was a two-story, gable-front residential structure constructed in 1900. It has recently changed use from residential to commercial and has undergone exterior alterations that staff approved administratively. However, any new signage requires approval from the Landmarks Commission. The new sign is proposed for the panel immediately above the entrance of the enclosed porch. The new sign would be carved wood that is painted.
