(District 19)
- On a motion by Ald. Guequierre, seconded by Solheim, the Plan Commission found the standards met and recommended approval of the amended planned development to the Common Council subject to the comments and conditions contained in the Plan Commission materials and with the following findings:
- As part of their motion, the Plan Commission granted a waiver, variance or exception for proposed 92-unit multi-family dwelling to the requirements in Section 28.104(7), Site Standards for Buildings, which require at least 30% of primary street-facing building facades be set back no more than 20 feet from the primary street and that buildings shall occupy at least thirty percent (30%) of the primary street frontage. In granting the waiver, variance or exception, the Plan Commission cited the existing development pattern and the unique topography present on the campus as the grounds for the waiver, variance or exception. The Commission also noted that the proposed building would be replacing an existing building at the same location on the established campus in making their finding.
 - As part of their motion, the Plan Commission also granted a waiver, variance or exception for proposed 92-unit multi-family dwelling to the number of bicycle parking stalls required to serve the project, citing the unique characteristics of the population and the availability of overflow bicycle parking [on the campus] should that become necessary.
- The motion to recommend approval subject to conditions and with the above findings passed by voice vote/ other.
- During the discussion of the bicycle parking waiver, variance or exception, members of the Plan Commission expressed a desire for the applicant to consider converting automobile parking in the 92-unit building into bicycle parking and providing conduit/ wiring for electric bike charging in the future should demand for additional bicycle parking emerge.
