Item #1 Location: On Mills Street In the intersection of Regent Street

Description: See Attached (remove structure)

The Contractor encountered a wall to an unknown structure at 9:00 AM. I had them clear it off and called City Engineering to identify. Still unable to determine what it was we began a hand removal of the structure. After removing the floor it was determined that a second floor existed. We removed this also by hand because it was determined to be on the existing water main needed to be connected to. At about 12:00 we still had not determined what the structure was but decided we could not continue unless it was removed. We then removed 3 walls about 10' long and the floors so we could do our work. The structure was never identified. We also encountered an abandon 12" gas line going east and west on Regent Street in line with the proposed water main. The Contractor completed the removal of the pipe and structure by 3:00PM. This was mandatory Saturday work because of traffic on Regent Street. The crew worked until 10:00 PM to make up lost time so they could get out of the intersection in one weekend per contract.

Item #2

Description: Furnish and Install Additional 6" Fitting

The Contractor installed one extra six inch fitting to match existing grade when they tied the pipe together at Milton Street.

The Contractor installed one extra fitting to go over existing pipe in Regent Street.

Item #3

Description: Furnish and Install Additional 8" Fitting

Plan change alignment from existing pipe. Contractor added bend at Vilas.	1
Plan change alignment from existing pipe. Contractor added bend at Chandler.	1
Plan change alignment from existing pipe. Contractor offset to match pipe St. James.	2
Plan change alignment and grade of new and existing pipes. Contractor adjusted with bends. Milton 2	
Plan change existing grade shallower. Contractor adjusted with bends. Bowen Ct.	2

This is a copy of the request made by Rawson Construction.
