**Subject:** Garver

The Garver project wastes the rare opportunity to restore a the wetland that was landfilled for the sugar factory.

It privatizes the community resource that was gifted to the city for parkland. This new taxpayer subsidy to the exclusive private developer, is on top of the gift of the bird sanctuary that lives there now. Is this the last subsidy they'll want?

Boondoggle.

**Subject:** Borrowing for Garver remediation

I would like to register in opposition to borrowing \$1.6 million for capping ground contamination at the Garver site. Thank you.
