

## Internal Monitoring Report

**Policy #:** O-2A Water Quantity

**Monitoring Frequency:** Monthly

**Date:** July 26, 2022

### **Policy Language:**

*Current and future customers will receive water that meets or exceeds industry-accepted levels of service for fire protection and pressure.*

*This includes:*

- 1. Water delivered to hydrants at proper flow rates for fire protection.*
- 2. Water delivered to the customer tap at a pressure that meets industry-accepted low, high, and emergency operation criteria.*
- 3. Water used for outdoor irrigation under drought-free conditions.*

Please see the attached Monthly Water Production, Unit Well Cumulative Capacity Utilization, and COM Aquifer Level Reports as of June 30, 2022. The water production, unit well capacities, and aquifer levels are in line with the policy parameters outlined above.
