Located at the top of State Street, the intersection of the Capitol Square and State Street is an important crossroads for the City. To ensure that it is an active and vibrant place for all residents and visitors, the City has begun an effort to look at new design and programming approaches to bring more activity and use to the area. Members of the Downtown Coordinating Committee and City staff will be using input gathered at this meeting to guide ideas for potential design improvements, use and programming recommendations for the Common Council.
