Plan for a system through which all birth to 4yr old children have access to high-quality childcare. High-quality childcare being defined as that which leads to kindergarten readiness?

Possible steps:

- Investigate systems of other cities, states, nations?
 - * Child care
 - * Parent education and support services
 - * Private sector / business involvement - businesses that run their own systems?
- Understand the scope of the problem i.e. numbers of children impacted (Race to Equity information, 4C Demographics Report, census data, school district data (e.g., PALS).
- Prioritize population e.g. income, age range, area of the city, school are, neighborhood.
- Gather information about what is being done in Madison.
- What could we do? Non-traditional solutions?
- Identify possible funding sources

Possible Process-

Decide on chair/leader of effort

Create one or multiple sub-committees that could work on a steps.

Identify steps or major tasks.

Decide on timeline? Related to other city or committee timelines?

Support services from CDD?

Report out to whole committee in timeline?
