---

Good morning,

Unique times call for unique actions. The bike/walkers/family/pet traffic on the local great network of bike trails is extreme at this time.

I use a bell, holler "on your left" (to which new users for some reason seem to think that means move left!!) and it seems like it's a constant effort to avoid everyone. Cyclists who ride 2 abreast, which under normal times is not an issue, really are creating a dangerous situation to pass and keep social distance.

Having a temporary option on streets would be safer and more stress free for everyone.

Thank you for helping all in this time.
