Hello Commission,

I am in full support of the dilapidated, crumbling garage without a roof on the adjacent property to me being removed. I am the owner and occupant of the single family home at 1131 Jenifer Street, next door (formerly a 2 flat that was 1131 and 1133). The said garage has a caved in roof and the current tenant accidentally caught it on fire recently by having a backyard fire without a fire pit. There is a record of the fire department coming when we called. There were 5 gas cans in the garage at the time.

However, the siding is asbestos siding. And I would very much need some safeguards that it will be demolished without showering my children and my vegetable garden and yard with asbestos dust. The landlord is not attentive to the invasive weeds that are a constant struggle under the fence to me and former tenants have confided that he's not attentive to much on the inside either. I am happy to speak about this at the meeting. I understand most safeguards are for the demolition workers in this type of situation, but I cannot support without some safeguard requirements for my family as well.

Thank you,
Cordelia Gallo
1131 Jenifer St
