RE: Consideration of a demolition permit to demolish two commercial buildings at 826 Williamson Street and 302 S Paterson Street; and Consideration of a conditional use in the Traditional Shopping Street (TSS) District for a building exceeding four stories and 60 feet in height in the Transit-Oriented Development (TOD) Overlay District; consideration of a conditional use in the TSS District for dwelling units in a mixed-use building with greater than 60 units; and consideration of a conditional use in the TSS District for buildings with non-residential uses occupying less than 50 percent of the ground-floor frontage facing the primary street - to construct a mixed-use building with a four-story wing consisting of approximately 3,734 square-feet of commercial space and 55 apartments on Williamson Street in the Third Lake Ridge Historic District and a five-story wing consisting of approximately 864 square-feet of commercial space and 133 apartments on S Paterson Street. [LNDUSE-2023-00020; ID [77015](#) and [77016](#)]

Dear Kevin;

At its May 8, 2023 meeting, the Plan Commission **approved** your client's demolition permit and conditional use requests for the project located at 826 Williamson Street and 302 S Paterson Street. Prior to issuance of demolition or building permits for the project, the conditions of approval in the following sections shall be satisfied:

Please contact Brenda Stanley of the City Engineering Division—Main Office at (608) 261-9127 if you have questions regarding the following eighteen (18) items:

1. Offsite sanitary sewer improvements by the developer may be required as a condition for development. Applicant shall submit projected wastewater flow calculations for the proposed development to Mark Moder, mmoder@cityofmadison.com
2. The area adjacent to this proposed development has been determined by City Engineering to have a known flooding risk. Engineering has set the minimum protective lowest entrance elevation opening at an elevation of 852.5. This standard is not intended to be protective in all cases. The Developer is strongly encouraged to complete their own engineering analysis to determine and meet a protective elevation which they are comfortable with. In no case shall the protective elevation be set below the minimum threshold determined by City Engineering.

3. Enter into a City / Developer agreement for the required infrastructure improvements. Agreement to be executed prior to sign off. Allow 4-6 weeks to obtain agreement. Contact City Engineering to schedule the development and approval of the plans and the agreement. (MGO 16.23(9)c)
4. Construct sidewalk, terrace, curb and gutter and pavement to a plan as approved by City Engineer along Williamson St and Paterson St.
5. Madison Metropolitan Sewerage District (MMSD) charges are due and payable prior to Engineering sign-off, unless otherwise collected with a Developer's / Subdivision Contract. Contact Mark Moder (608-261-9250) to obtain the final MMSD billing a minimum of two (2) working days prior to requesting City Engineering signoff. (MGO 16.23(9)(d)(4))
6. Obtain a permanent sewer plug permit for each existing sanitary sewer lateral serving a property that is not to be reused and a temporary sewer plug permit for each sewer lateral that is to be reused by the development. The procedures and fee schedule is available online at <http://www.cityofmadison.com/engineering/permits.cfm>. (MGO CH 35.02(14))
7. This project appears to require permanent dewatering. A permit to connect to the public stormwater system shall be required from City Engineering. Additionally, a permit for non-storm discharge to the storm sewer system from the City/County Health Department shall also be required. If contaminated soil or groundwater conditions exist on or adjacent to this project additional WDNR, Public Health, and/or City Engineering approvals may be required prior to issuance of the connection and non-storm discharge permits.
8. An Erosion Control Permit is required for this project. See Storm comments for permit specific details and requirements.
9. A Storm Water Management Report and Storm Water Management Permit is required for this project. See Storm comments for report and permit specific details and requirements.
10. A Storm Water Maintenance Agreement (SWMA) is required for this project. See Storm comments for agreement specific details and requirements.
11. This site appears to disturb over one (1) acre of land and requires a permit from the WDNR for stormwater management and erosion control. The City of Madison has been required by the WDNR to review projects for compliance with NR216 and NR-151 however a separate permit submittal is still required to the WDNR for this work. The City of Madison cannot issue our permit until concurrence is obtained from the WDNR via their NOI or WRAPP permit process. Contact Eric Rortvedt at 273-5612 of the WDNR to discuss this requirement. Information on this permit application is available on line: <http://dnr.wi.gov/Runoff/stormwater/constrformsinfo.htm>. The applicant is notified that the City of Madison is an approved agent of the Department of Safety and Professional Services (DSPS) and no separate submittal to this agency or CARPC is required for this project to proceed.
12. Revise the site plan to show all existing public sanitary sewer facilities in the project area as well as the size, invert elevation, and alignment of the proposed service. (POLICY)

13. Revise the plans to show a proposed private internal drainage system on the site. Include the depths and locations of structures and the type of pipe to be used. (POLICY AND MGO 10.29)
14. Provide additional detail how the enclosed depression(s) created by the parking entrance(s) to the below building parking area(s) is/are served for drainage purposes. The building must be protected from receiving runoff up through the 100-yr design storm that is current in Madison General Ordinance Chapter 37. If the enclosed depression(s) is/are to be served by a gravity system provide calculations stamped by a Wisconsin P.E. that show inlet and pipe capacities meet this requirement. If the enclosed depression(s) is/are to be served by a pump system provide pump sizing calculations stamped by a Wisconsin P.E. or licensed Plumber that show this requirement has been met.
15. This project falls in the area subject to increased erosion control enforcement as authorized by the fact that it is in a TMDL ZONE and therefore will be regulated to meet a higher standard.
16. This project will disturb 20,000 sf or more of land area and require an Erosion Control Plan. Please submit an 11" x 17" copy of an erosion control plan (pdf electronic copy preferred) to Megan Eberhardt (west) at meberhardt@cityofmadison.com, or Daniel Olivares (east) at daolivares@cityofmadison.com, for approval.

Demonstrate compliance with Section 37.07 and 37.08 of the Madison General Ordinances regarding permissible soil loss rates. Include Universal Soil Loss Equation (USLE) computations for the construction period with the erosion control plan. Measures shall be implemented in order to maintain a soil loss rate below 5.0 tons per acre per year. The WDNR provided workbook to compute USLE rates can be found online at <https://dnr.wi.gov/topic/stormwater/publications.html>

This project will require a concrete management plan and a construction dewatering plan as part of the erosion control plan to be reviewed and approved by the City Engineer's Office. If contaminated soil or groundwater conditions exist on or adjacent to this project additional WDNR, Public Health, and/or City Engineering approvals may be required prior to the issuance of the required Erosion Control Permit. (POLICY)

This project appears to require fire system testing that can result in significant amounts of water to be discharged to the project grade. The Contractor shall coordinate this testing with the erosion control measures and notify City Engineering 608-266-4751 prior to completing the test to document that appropriate measures have been taken to prevent erosion as a result of this testing.

Complete weekly self-inspection of the erosion control practices and post these inspections to the City of Madison website - as required by Chapter 37 of the Madison General Ordinances.

17. Prior to approval, this project shall comply with Chapter 37 of the Madison General Ordinances regarding stormwater management. Specifically, this development is required to submit a Storm Water Management Permit application, associated permit fee, Stormwater Management Plan, and Storm Water Management Report to City Engineering. The Stormwater Management Permit application can be found on City Engineering's website at <http://www.cityofmadison.com/engineering/Permits.cfm>.

The Storm Water Management Plan & Report shall include compliance with the following:

Report: Submit prior to plan sign-off, a stormwater management report stamped by a P.E. registered in the State of Wisconsin.

Electronic Data Files: Provide electronic copies of any stormwater management modeling or data files including SLAMM, RECARGA, TR-55, HYDROCAD, Sediment loading calculations, or any other electronic modeling or data files. If calculations are done by hand or are not available electronically, the hand copies or printed output shall be scanned to a PDF file and provided to City Engineering. (POLICY and MGO 37.09(2))

Rate Control Redevelopment: By design detain the 10-year post construction design storm such that the peak discharge during this event is reduced 15% compared to the peak discharge from the 10-year design storm in the existing condition of the site. Further, the volumetric discharge leaving the post development site in the 10- year storm event shall be reduced by 5% compared to the volumetric discharge from the site in an existing condition during the 10-year storm event. These required rate and volume reductions shall be completed, using green infrastructure that captures at least the first 1/2 inch of rainfall over the total site impervious area. If additional stormwater controls are necessary beyond the first 1/2 inch of rainfall, either green or non-green infrastructure may be used.

TSS Redevelopment with TMDL: Reduce TSS by 80% off of the proposed development when compared with the existing site.

Submit a draft Stormwater Management Maintenance Agreement (SWMA) for review and approval that covers inspection and maintenance requirements for any BMP used to meet stormwater management requirements on this project.

18. Submit, prior to plan sign-off but after all revisions have been completed, digital PDF files to the Engineering Division. Email PDF file transmissions are preferred to: bstanley@cityofmadison.com (East) or troester@cityofmadison.com (West).

Please contact Jeffrey Quamme, of the City Engineering–Mapping Section at 266-4097 if you have any questions regarding the following six (6) items:

19. Grant a Public Sidewalk and Bike Path Easement(s) to the City on the face of the pending Certified Survey Map along Williamson to provide the required terrace required by Traffic Engineering.
20. The access drive improvements along the southwesterly side connecting to Williamson St are very near the property line. The Applicant/Consultant/Contractor/Owner are collectively responsible to obtain any required permission or easement if any adjacent lands are to be disturbed during construction of this project.
21. Provide for review, comprehensive reciprocal easements and agreements including, but not limited to common parking garage access, parking, utilities, common areas/amenities, storm sewer, storm water management and common underground garage wall that are necessary to accomplish the land division and the site development as proposed prior to final sign off. The document(s) shall be executed and recorded immediately subsequent to the CSM recording and prior to building permit issuance.

22. The Williamson St proposed building address is 838 Williamson St. The S Paterson St proposed building address is 306 S Paterson St. The site plan shall reflect a proper street address of the property as reflected by official City of Madison Assessor's and Engineering Division records.
23. The pending Certified Survey Map application for this property shall be completed and recorded with the Dane County Register of Deeds (ROD), the new parcel data created by the Assessor's Office and the parcel data available to zoning and building inspection staff prior to issuance of building permits for new construction or early start permit.
24. Submit a site plan and a complete set of building Floor Plans (for each individual building) in PDF format to Lori Zenchenko (lzenchenko@cityofmadison.com) that includes a floor plan of each floor level on a separate sheet/page for the development of an interior and building addressing plan for the proposed multi-building complex. Each building page should include a key locator and north arrow. Also, include a unit matrix for the apartment buildings.

The Addressing Plan for the entire project shall be finalized and approved by Engineering (with consultation and consent from the Fire Marshal if needed) PRIOR to the Verification submittal stage of this LNDUSE with Zoning. The final approved stamped Addressing Plan shall be included in said Site Plan Verification application materials or a revised plan shall be provided for additional review and approval by Engineering.

Per 34.505 MGO, a full copy of the approved addressing plan shall be kept at the building site at all times during construction until final inspection by the Madison Fire Department.

For any changes pertaining to the location, deletion or addition of a unit, or to the location of a unit entrance, (before, during, or after construction), a revised Address Plan shall be resubmitted to Lori Zenchenko to review addresses that may need to be changed and/or reapproved.

Please contact Sean Malloy of the Traffic Engineering Division at (608) 266-5987 if you have any questions regarding the following twenty (20) items:

25. The applicant shall dedicate Right of Way or grant a Public Sidewalk Easement for and be responsible for the construction of a five (5)-foot wide sidewalk, eight (8)-foot terrace, and additional one (1) foot for maintenance along Williamson Street
26. Parking deck is insufficiently labeled/dimensioned for a proper review. If the parking does not meet MGO 10.08 the applicant can expect to be required to make major alteration which may or may not impact structural elements of this site.
27. The applicant shall work with Traffic Engineering and the Fire Department on determining the final specifications of the proposed northern driveway, which is intended to be used for Fire protection services only.
28. Note: The applicant shall be made aware that little to no access to the Capital City Trail/E. Wilson Unimproved Right of Way will be granted for construction purposes. The applicant shall be financially responsible for any damages to any of the plantings in this Right of Way as a result of construction. Provide a detailed construction plan to Traffic Engineering for review by the Traffic Control Specialist (Mike Duhr) prior to final signoff.

29. The applicant shall submit one contiguous plan showing proposed conditions and one contiguous plan showing existing conditions for approval. The plan drawings shall be to engineering scale and include the following, when applicable: existing and proposed property lines; parcel addresses; all easements; vision triangles; pavement markings; signing; building placement; items in the terrace such as signs, street light poles, hydrants; surface types such as asphalt, concrete, grass, sidewalk; driveway approaches, including those adjacent to and across street from the project lot location; parking stall dimensions, including two (2) feet of vehicle overhang; drive aisle dimensions; semitrailer movement and vehicle routes; dimensions of radii; and percent of slope.
30. The Developer shall post a security deposit prior to the start of development. In the event that modifications need to be made to any City owned and/or maintained traffic signals, street lighting, signing, pavement marking and conduit/handholes, the Developer shall reimburse the City for all associated costs including engineering, labor and materials for both temporary and permanent installations.
31. The City Traffic Engineer may require public signing and marking related to the development; the Developer shall be financially responsible for such signing and marking.
32. All parking facility design shall conform to MGO standards, as set in section 10.08(6).
33. All bicycle parking adjacent pedestrian walkways shall have a 2 foot buffer zone to accommodate irregularly parked bicycles and/or bicycle trailers.
34. All pedestrian walkways adjacent parking stalls shall be 7 feet wide to accommodate vehicle overhang, signage and impediments to walkway movements. Any request for variance shall be submitted to and reviewed by City Traffic Engineering.
35. Per Section MGO 12.138 (14), this project is not eligible for residential parking permits. It is recommended that this prohibition be noted in the leases for the residential units.
36. The applicant shall adhere to all vision triangle requirements as set in MGO 27.05 (No visual obstructions between the heights of 30 inches and 10 feet at a distance of 25 feet behind the property line at streets and 10 feet at driveways.). Alteration necessary to achieve compliance may include but are not limited to; substitution to transparent materials, removing sections of the structure and modifying or removing landscaping elements. If applicant believes public safety can be maintained they shall apply for a reduction of MGO 27.05(2)(bb) – Vision Clearance Triangles at Intersections Corners. Approval or denial of the reduction shall be the determination of the City Traffic Engineer.
37. All parking ramps as the approach the public Right-of-Way shall not have a slope to exceed 5% for 20 feet; this is to ensure drivers have adequate vision of the Right-of-Way. If applicant believes public safety can be maintained they shall apply for a waiver, approval or denial of the waiver shall be the determination of the City Traffic Engineer.

38. City of Madison radio systems are microwave directional line of sight to remote towers citywide. The building elevation will need to be reviewed by Traffic Engineering to accommodate the microwave sight and building. The applicant shall submit grade and elevations plans if the building exceeds three stories prior to sign-off to be reviewed and approved by Andrew Oliver, (267-1979, aoliver@cityofmadison.com) Traffic Engineering Shop, 4151 Nakoosa Trail. The applicant shall return one signed approved building elevation copy to the City of Madison Traffic Engineering office with final plans for sign off.
39. The driveway slope to the underground parking is not identified in the plan set, Traffic Engineering recommends driveway slope under 10%; if the slope is to exceed 10%, the applicant shall demonstrate inclement weather mitigation techniques to provide safe ingress/egress to be approved by the City Traffic Engineer.
40. "Stop" signs shall be installed at a height of seven (7) feet from the bottom of the sign at all class III driveway approaches, including existing driveways, behind the property line and noted on the plan. All directional/regulatory signage and pavement markings on the site shall be shown and noted on the plan.
41. All existing driveway approaches on which are to be abandoned shall be removed and replaced with curb and gutter and noted on the plan.
42. The applicant shall prepare a TDMP (Traffic Demand Management Plan) to be reviewed and approved by the City Traffic Engineer. MGO (28.183(6)(a)(6))
43. The applicant shall provide a clearly defined 5' walkway clear of all obstructions to assist citizens with disabilities, especially those who use a wheel chair or are visually impaired. Obstructions include but are not limited to tree grates, planters, benches, parked vehicle overhang, signage and doors that swing outward into walkway.
44. Note: This site presents difficult constructability issues; access to neighboring sites must be maintained at all times, protected walkways will be constructed and maintained as soon as possible and little to no access to the Public Right-of-Way on Williamson Street will be granted for construction purposes. Provide a detailed construction plan to Traffic Engineering for review by the Traffic Control Specialist (Mike Duhr) prior to final signoff.

Please contact Jacob Moskowitz of the Zoning Division at (608) 266-4560 if you have any questions regarding the following four (4) items:

45. Label Electric Vehicle (EV) ready and EV installed spaces on the plans. A total of 15 EV ready and 3 EV installed spaces are required.
46. Provide the minimum required number of bicycle parking spaces distributed as both Short Term and Long Term bicycle parking for the residential and commercial uses, as required per Sections 28.141(4) and 28.141(11). A minimum of 188 resident bicycle parking spaces are required plus 19 guest stalls. A minimum of 90% of the resident stalls shall be designed as long-term parking, and the guest stalls shall be short-term parking. Up to twenty-five percent (25%) of bicycle parking

may be structured parking, vertical parking or wall mount parking, provided there is a five (5) foot access aisle for wall mount parking. A minimum of 4 short-term bicycle stalls shall be required for the commercial uses. Identify and dimension the bicycle stalls, including the access aisles, on the final plans. Provide a detail of the bicycle rack design.

47. Submit the landscape plan and landscape worksheet stamped by the registered landscape architect. Per Section 28.142(3) Landscape Plan and Design Standards, landscape plans for zoning lots greater than ten thousand (10,000) square feet in size must be prepared by a registered landscape architect.
48. Provide details demonstrating compliance with bird-safe glass requirements Section 28.129. For building façades where the first sixty (60) feet from grade are comprised of less than fifty percent (50%) glass, at least eighty-five percent (85%) of the glass on glass areas fifty (50) square feet or over must be treated. Of all glass areas over fifty (50) square feet, any glass within fifteen (15) feet of a building corner must be treated. All glass railings must be treated. Identify which glass areas are 50 sq. ft. or greater and which glass areas will be treated. Provide a detail of the specific treatment product that will be used.

Please contact Bill Sullivan of the Madison Fire Department at (608) 261-9658 if you have any questions regarding the following item:

49. Please consider allowing Madison Fire Dept. to conduct training sequences prior to demolition. Contact MFD Training Division to discuss possibilities: Division Chief Jeff Larson at jtlarson@cityofmadison.com or (608) 266-5946.

Please contact Kathleen Kane of the Parks Division at (608) 261-9671 if you have questions regarding the following item:

50. Park Impact Fees (comprised of the Park Infrastructure Impact Fee, per MGO Sec. 20.08(2)), and Park-Land Impact Fees, per MGO Sec. 16.23(8)(f) and 20.08(2) will be required for all new residential development associated with this project. This development is within the East Park-Infrastructure Impact Fee district. Please reference ID# 23013 when contacting Parks about this project.

Please contact Brad Hofmann of the Forestry Division at (608) 267-4908 if you have questions regarding the following nine (9) items:

51. An existing inventory of street trees located within the right of way shall be included on the site, demo, utility, landscape, grading, fire aerial apparatus and street tree plan sets. The inventory shall include the following: location, size (diameter at 4 1/2 feet), and species of existing street trees. The inventory should also note if a street tree is proposed to be removed and the reason for removal.

52. All proposed street tree removals within the right of way shall be reviewed by City Forestry before the Plan Commission meeting. Street tree removals require approval and a tree removal permit issued by City Forestry. Any street tree removals requested after the development plan is approved by the Plan Commission or the Board of Public Works and City Forestry will require a minimum of a 72-hour review period which shall include the notification of the Alderperson within who's district is affected by the street tree removal(s) prior to a tree removal permit being issued. Add as a note on the street tree plan set.
53. Contractor shall take precautions during construction to not disfigure, scar, or impair the health of any street tree. Contractor shall operate equipment in a manner as to not damage the branches of the street tree(s). This may require using smaller equipment and loading and unloading materials in a designated space away from trees on the construction site. Any damage or injury to existing street trees (either above or below ground) shall be reported immediately to City Forestry at (608) 266-4816. Penalties and remediation shall be required. Add as a note on the site, grading, utility, demolition, and street tree plan set.
54. As defined by the Section 107.13 of City of Madison Standard Specifications for Public Works Construction: No excavation is permitted within 5 feet of the trunk of the street tree or when cutting roots over 3 inches in diameter. If excavation is necessary, the Contractor shall contact Madison City Forestry at (608) 266-4816 prior to excavation. City of Madison Forestry personnel shall assess the impact to the tree and to its root system prior to work commencing. Tree protection specifications can be found on the following website: <https://www.cityofmadison.com/business/pw/specs.cfm> Add as a note on the site, grading, utility, demolition and street tree plan sets.
55. Section 107.13(g) of City of Madison Standard Specifications for Public Works Construction (website: <https://www.cityofmadison.com/business/pw/specs.cfm>) addresses soil compaction near street trees and shall be followed by Contractor. The storage of parked vehicles, construction equipment, building materials, refuse, excavated spoils or dumping of poisonous materials on or around trees and roots within five (5) feet of the tree or within the protection zone is prohibited. Add as a note on both the site and street tree plan sets.
56. On this project, street tree protection zone fencing is required. The fencing shall be erected before the demolition, grading or construction begins. The fence shall include the entire width of terrace and, extend at least 5 feet on both sides of the outside edge of the tree trunk. Do not remove the fencing to allow for deliveries or equipment access through the tree protection zone. Add as a note on both the site and street tree plan sets.
57. Street tree pruning shall be coordinated with City Forestry at a minimum of two weeks prior to the start of construction for this project. Contact City Forestry at (608) 266-4816. All pruning shall follow the American National Standards Institute (ANSI) A300 - Part 1 Standards for pruning. Add as a note on both the site and street plan sets.
58. The Developer shall post a security deposit prior to the start of the development to be collected by City Engineering as part of the Developers Agreement. In the event that street trees are damaged during the construction process, City Forestry will draw from this deposit for damages incurred.

59. Additional street trees are needed for this project. Tree planting specifications can be found in section 209 of City of Madison Standard Specifications for Public Works Construction (website: <https://www.cityofmadison.com/business/pw/specs.cfm>) - All street tree planting locations and tree species within the right of way shall be determined by City Forestry. A landscape plan and street tree planting plan shall be submitted in PDF format to City Forestry for approval of planting locations within the right of way and tree species. All available street tree planting locations shall be planted within the project boundaries. Add following note on both the landscape and street tree plan sets: At least one week prior to street tree planting, Contractor shall contact City Forestry at (608) 266-4816 to schedule inspection and approval of nursery tree stock and review planting specifications with the landscaper.

Please contact Jeff Belshaw of the Madison Water Utility at 261-9835 if you have any questions regarding the following three (3) items:

60. Update Utility Plan to indicate the type of material for the water service and the type of connection to the existing water main.
61. A Water Service Application Form and fees must be submitted before connecting to the existing water system. Provide at least two working days notice between the application submittal and the requested installation or inspection appointment. Application materials are available on the Water Utility's Plumbers & Contractors website (<http://www.cityofmadison.com/water/plumbers-contractors>), otherwise they may be obtained from the Water Utility Main Office at 119 E Olin Ave. A licensed plumber signature is required on all water service applications. For new or replacement services, the property owner or authorized agent is also required to sign the application. A Water Meter Application Form will subsequently be required to size & obtain a water meter establish a Water Utility customer account and/or establish a Water Utility fire service account. If you have questions regarding water service applications, please contact Madison Water Utility at (608) 266-4646.
62. The Madison Water Utility shall be notified to remove the water meter at least two working days prior to demolition. Contact the Water Utility Meter Department at (608) 266-4765 to schedule the meter removal appointment.

Please contact my office at cwells@cityofmadison.com if you have questions regarding the following two items, including Condition #2 which was added by the Plan Commission at their May 8, 2023 meeting:

63. Prior to final sign-off and permitting, the S Paterson-facing façade (North East) elevation shall be revised for approval by the Planning Division Director or Designee. The intent is to enhance this primary street frontage. The revised design shall provide enhanced vertical organization and/or elements. This may be achieved through various methods including (but not limited to) the incorporation of a different color(s) band (preferably within the pallet already established), reorganization of materials, or an increase in the amount of masonry, alternative window locations, or other techniques.

64. As agreed to by the applicant, the following conditions related to the prairie garden adjacent to the site should be met, as appropriate and permitted by applicable city agencies:
- a) Matching of grade between the project and the public space will leave the public space undisturbed.
 - b) There will be no staging or parking of equipment north of the property line.
 - c) The existing fence within the public right-of-way will remain during construction. The existing fence on the property line will be removed and replaced with fence panels within 4 feet of the property line.
 - d) A short path will be constructed by Friends of IPPG through the garden from the project to the bike path at a mutually agreed upon location.
 - e) A low fence or other mutually agreed upon landscape feature will be established at the property boundary to indicate the line between public and private property.
 - f) There will be a minimum of 3-4 pet waste disposal station in the project.
 - g) Efforts will be made to give residents access to the 20 foot green space setback on the south-west end of the property for pet exercise.
 - h) Lighting and security cameras will not impinge on the public right-of-way.
 - i) There will be no use of salt on surfaces that drain to the IPPG. If salt must be used on surfaces, those will drain away from the IPPG or to storm drains.
 - j) There will be no snow disposal on the IPPG because of the salt that gets mixed with the snow.
 - k) All landscaping and maintenance of the IPPG is to be conducted by IPPG volunteers.
 - l) There will be further discussion of the feasibility of some roof runoff being routed to the IPPG for use in 1 or 2 raingardens.

Specific questions regarding the comments or conditions contained in this letter should be directed to the commenting agency.

No interior, exterior or structural demolition or wrecking activities or remodeling activities (including material reclamation activities by the applicant or a third party) shall commence nor any wrecking or building permits be issued until the applicant has met all of the conditions of approval stated in this letter.

Please now follow the procedures listed below for obtaining permits for your project:

1. After the plans have been revised per the above conditions, please **one (1) complete digital plan set in PDF format** of complete, fully dimensioned, and to-scale plans; [site plan review fee pursuant to Section 28.206](#) of the Zoning Code; and any other documentation requested herein to the Zoning Administrator at SPRApplications@cityofmadison.com. (Note that that an individual email cannot exceed 20MB and it is the responsibility of the applicant to present files in a manner that can be accepted. Please email SPRApplications@cityofmadison.com regarding questions or if you need alternative filing options. The sets of final revised plans or documents will be circulated by Zoning staff to the City department staff listed above for their final approval.

2. The [site plan review fee pursuant to Section 28.206](#) can be mailed in, dropped in the drop box at the Madison Municipal Building, or you can make an appointment at the Zoning counter to pay the fee. Checks should be made out to "City Treasurer." If you mail in the check or use the drop box, please include the application form with the project address and contact information. Zoning staff typically suggest using the drop box or making an appointment with the Zoning counter to pay the fee as they are the quickest.

Mailing Address: City of Madison Building Inspection. P.O. Box 2984. Madison, WI 53701-2984

Drop Box Location: Madison Municipal Building, Doty Street Entrance. 215 Martin Luther King Jr Blvd. Madison, WI 53701-2984

Zoning Counter Appointment: <https://www.cityofmadison.com/dpced/bi/schedule-a-counter-appointment/3423/>

3. This letter shall be signed by the applicant and property owner (if not the applicant) to acknowledge the conditions of approval and returned to the Zoning Administrator when requesting building permit approval. [Signature block on last page]
4. City Agencies who submitted conditions of approval will review your revised plans to verify that their conditions, along with any applicable requirements, have been satisfied. When the revised plans are submitted, the applicant will be emailed a hyperlink to a website to follow, in real time, which agencies have reviewed the revised documents, and signed off or need additional information.
5. Approval of plans for this project does not include any approval to prune, remove or plant trees in the public right-of-way. Permission for such activities must be obtained from the City Forester, (608) 267-4908.
6. A demolition or removal permit is valid for one (2) years from the date of the Plan Commission.
7. No alteration of this proposal shall be permitted unless approved by the Plan Commission, provided, however, the Zoning Administrator may issue permits for minor alterations. No alteration of a conditional use shall be permitted unless approved by the Plan Commission provided, however, the Zoning Administrator following consideration by the alderperson of the district, may approve minor alterations or additions which are approved by the Director of Planning and Community and Economic Development and are compatible with the concept approved by the Plan Commission and the conditional use standards. This approval shall become null and void one (2) years after the date of the Plan Commission unless the use is commenced, construction is under way, or a valid building permit is issued and construction commenced within 6 months of the issuance of said building permit. Where the plans have not been altered from the Plan Commission's approval, and the conditional use has expired, the Director of Planning and Community and Economic Development may, after consultation with the Alderperson of the District, approve an extension for up to 12 months from the expiration date. The Plan Commission shall retain jurisdiction over this matter for the purpose of resolving complaints against the approved conditional use permit.
