MADISON WATER UTILITY

2014 EMPLOYEE SURVEY RESULTS

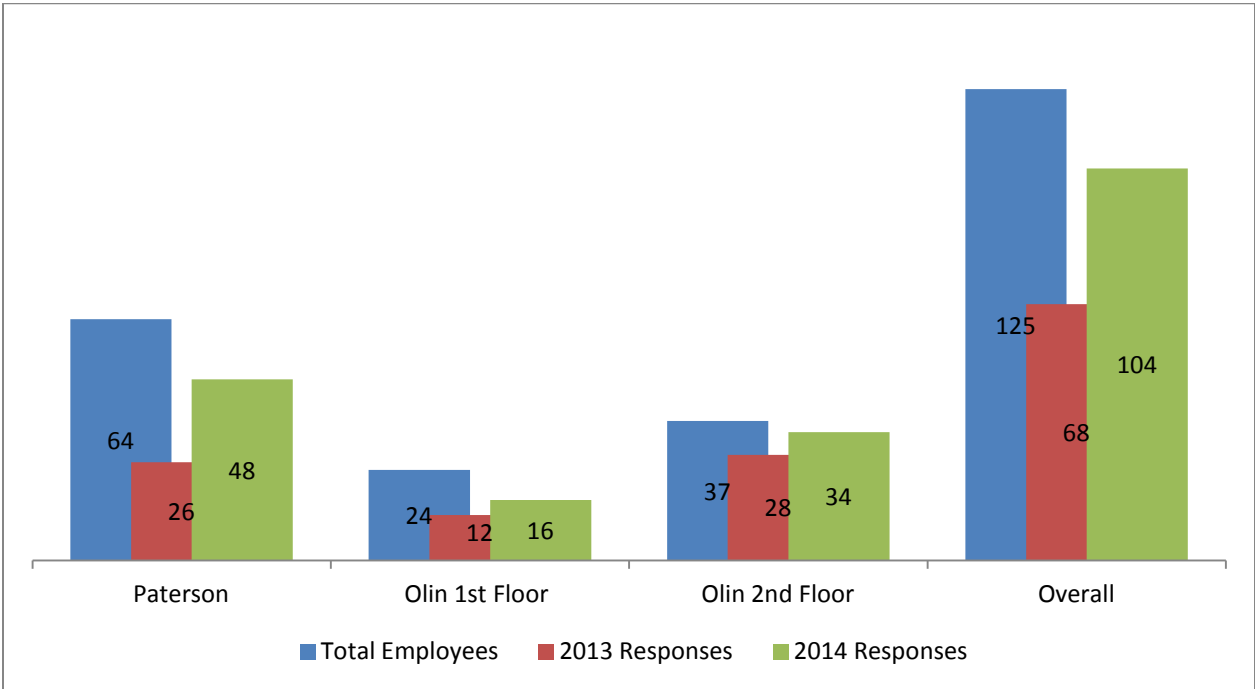

INTRODUCTION

Annually, the Madison Water Utility Steering Team administers an Employee Engagement and Internal Communications survey to all employees. The results are not intended to be a definitive report of employee engagement; rather, they are a tool meant to ‘take the pulse’ of our organization and identify areas that may need improvement.

The Steering Team would like to thank everyone who participated in the survey.

RESPONSE RATES

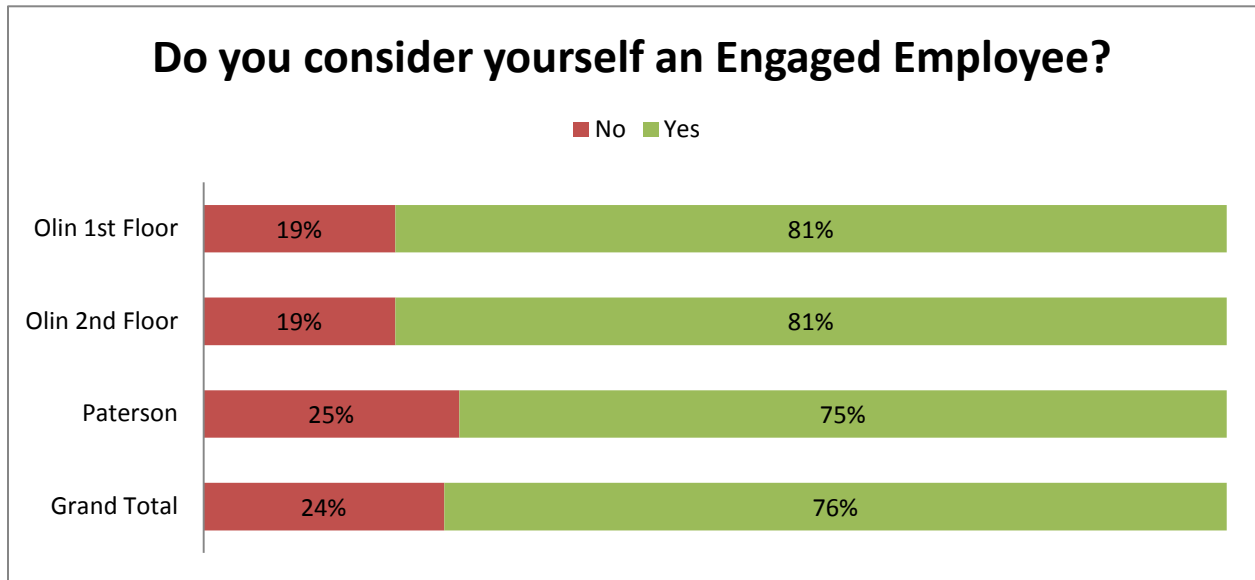

The overall response rate in 2014 was 83%, a significant increase over the previous year’s response rate of 54%. The Steering Team made several changes in 2014 to increase response rates, including shortening the survey, using SurveyMonkey to allow online participation, introducing it at an All-Employee Meeting, and holding a small contest awarding bagels to the work area with the highest response rate.

SURVEY FOLLOW-UP

The Steering Team followed up on the survey by holding focus group sessions. Every employee was given an opportunity to participate in a focus group to discuss the survey results and ideas for next steps. Based on feedback from both the survey and the focus groups, the Steering Team developed an action plan for 2015. A key component of this action plan is an annual "touch base" meeting between each employee and his/her supervisor. The goal of this meeting is to provide a forum for two-way communication about what is/isn't working, review the employee's position description and update it if needed, and to discuss growth and development.
