

Internal Monitoring Report

Policy #: O-2A Water Quantity

Monitoring Frequency: Monthly

Date: October 26, 2021

Policy Language:

Current and future customers will receive water that meets or exceeds industry-accepted levels of service for fire protection and pressure.

This includes:

- 1. Water delivered to hydrants at proper flow rates for fire protection.*
- 2. Water delivered to the customer tap at a pressure that meets industry-accepted low, high, and emergency operation criteria.*
- 3. Water used for outdoor irrigation under drought-free conditions.*

Please see the attached Monthly Water Production Report as of September 30, 2021. The water production is in line with the policy parameters outlined above.
