

# Internal Monitoring Report

Policy #: EL-2F Asset Protection

Date: July 26, 2011

I certify that the following information is true.

Signed  \_\_\_\_\_, General Manager

## Policy Language:

The General Manager shall not cause or allow utility assets to be unprotected, inadequately maintained, or unnecessarily risked.

Accordingly, the General Manager shall not cause or allow conditions, procedures, or decisions that:

1. Fail to comply with City policies regarding asset protection.
2. Fail to ensure water availability for future and current customer needs through long-term resource supply and demand analysis, conservation and public education.
3. Use or permit the use of water by others outside the Madison Water Utility's existing water service area, unless in compliance with Madison General Ordinances (if applicable) and the City of Madison's Comprehensive Plan.
4. Fail to support annual professional development opportunities for the General Manager and staff that are well focused and appropriate to Outcomes or specifically designed to improve professional skills.
5. Endanger the utility's public image or credibility.
6. Fail to follow the auditor's recommended internal controls.

## GM's interpretation and its justification:

"City policies regarding asset protection" means Mayoral Administrative Procedure Memorandum No. 1-7, Investment Policy. This policy addresses protecting financial assets; I am aware of no other asset protection policies.

"Ensure water availability" for current customers means that no customer is without water at standard levels of service quality, pressure, and flow for an extended period of time absent unusual circumstances, such as catastrophic mechanical failure or extreme drought. "Ensure water availability" for future customers means that no City-approved development or expansion is delayed for a lack of water supply.

“Use or permit the use of water by others outside the Madison Water Utility’s existing water service area” applies to normal operating conditions, and excludes emergency conditions when water may be supplied to the Cities of Fitchburg and Monona (future) through interconnections in accordance with signed agreements.

**Data directly addressing the GM’S interpretation:**

1. All Water Utility reserves are invested in the City pool managed by the City Treasurer, in compliance with APM 1-7.
2. There has been no lack of water availability for current or future customers. We plan for supply through the utility’s [Master Plan](#), part of which is currently being updated through the East Side Water Supply project. Our [Water Conservation and Sustainability Plan](#) is currently being implemented through a high efficiency toilet rebate program and Advanced Metering Initiative project.
3. No water has been provided outside the authorized service area, as defined in MGO 13.16(2).
4. Many professional development opportunities have occurred in the past year for me and my staff. These have included conferences, seminars, course, and experiential opportunities. Training and development is a standing operating budget item.
5. No negative media stories have occurred within the reporting period that would cast doubt on the utility’s reputation or credibility in the eyes of the public.
6. The financial audit and internal controls will be an agenda item at the August 23 meeting.

I report compliance.
