

Greetings by Actual Size Artworks

2026 Rotation Proposals

After installing *Greetings by Actual Size Artworks* at the Madison Public Market, staff received a request from the Madison Public Market Executive Director to rotate the work. They expressed the following concerns:

- 1)** The work can't be fully captured from the vestibule or from the main aisle. The best position requires people to stand within the walking area just inside the doors.
- 2)** The primary audience will be in the main hallway and likely enter from the parking lot side of the building, not the entrance this work is facing.

As the work is site specific and was designed and fabricated to face the current direction, staff require approval of the Madison Arts Commission to modify the work as rotating is considered a substantive change.

The following pages include a site plan and renderings of the various proposals

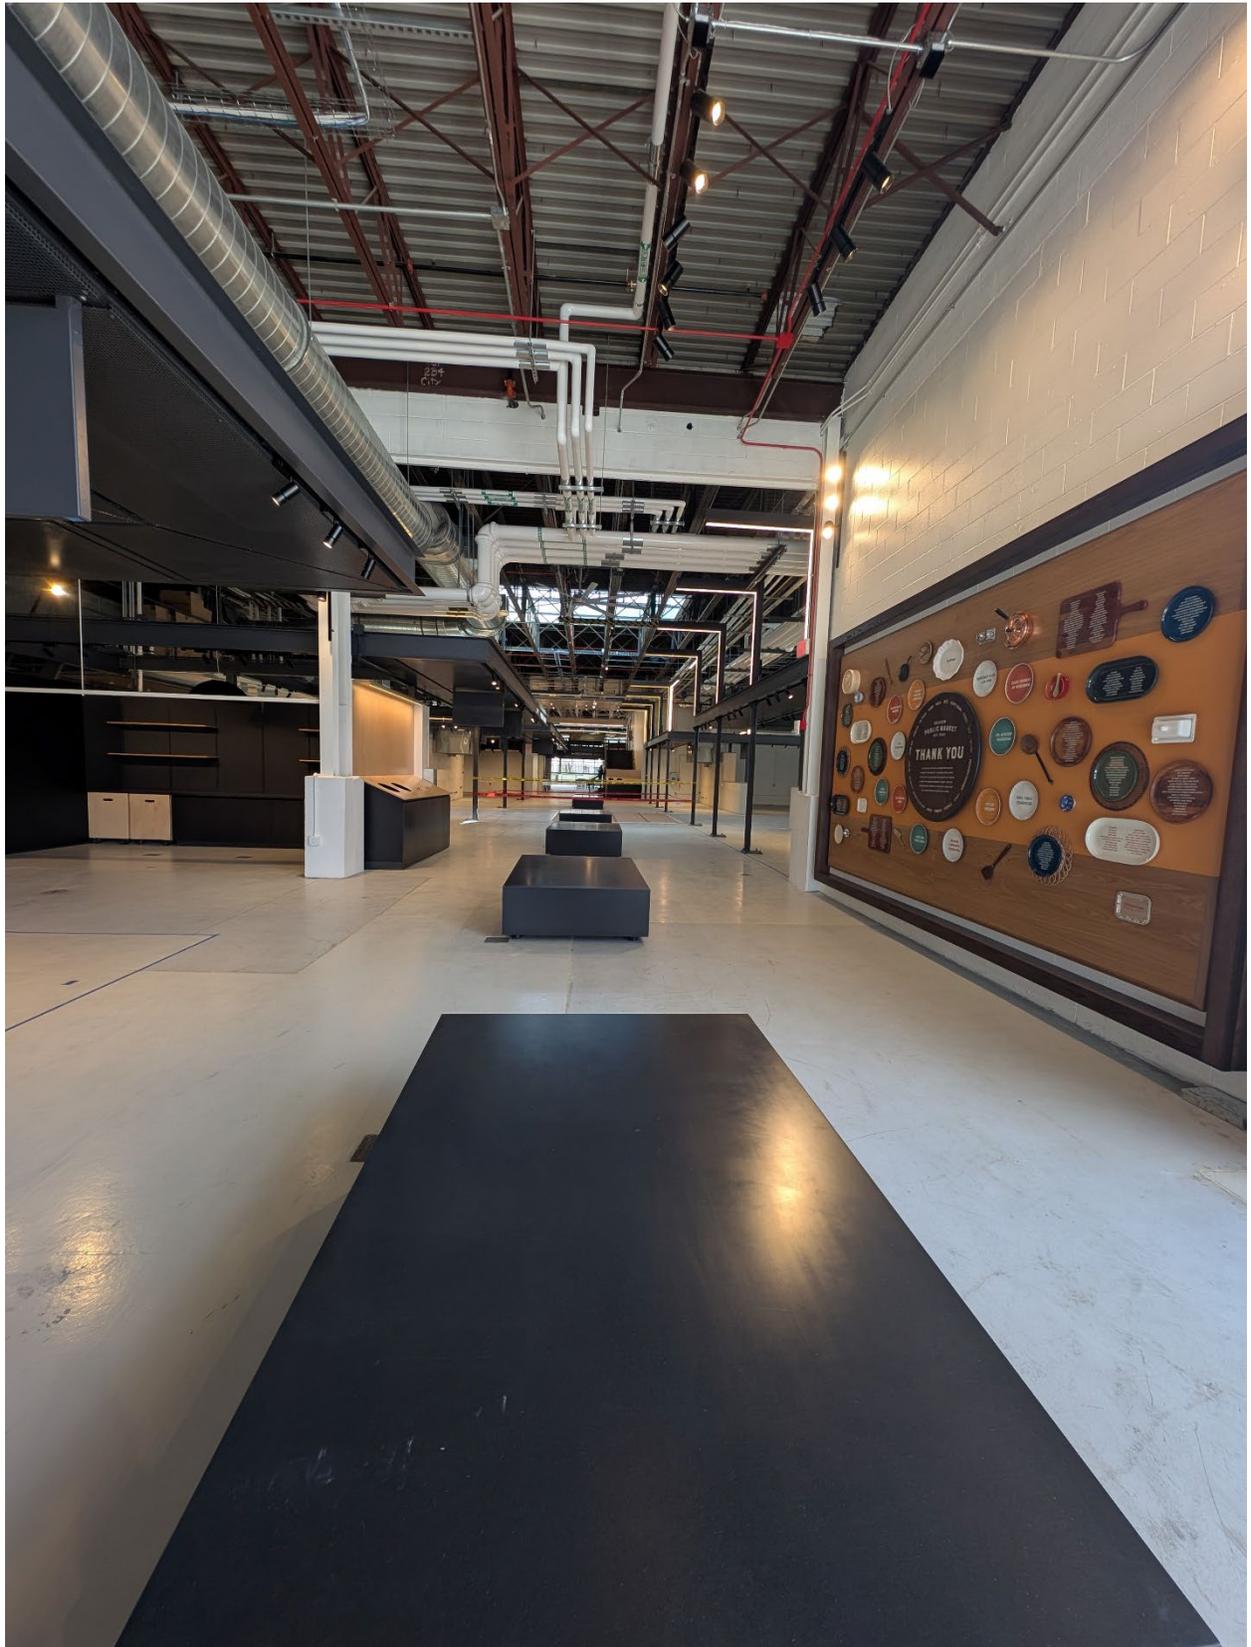

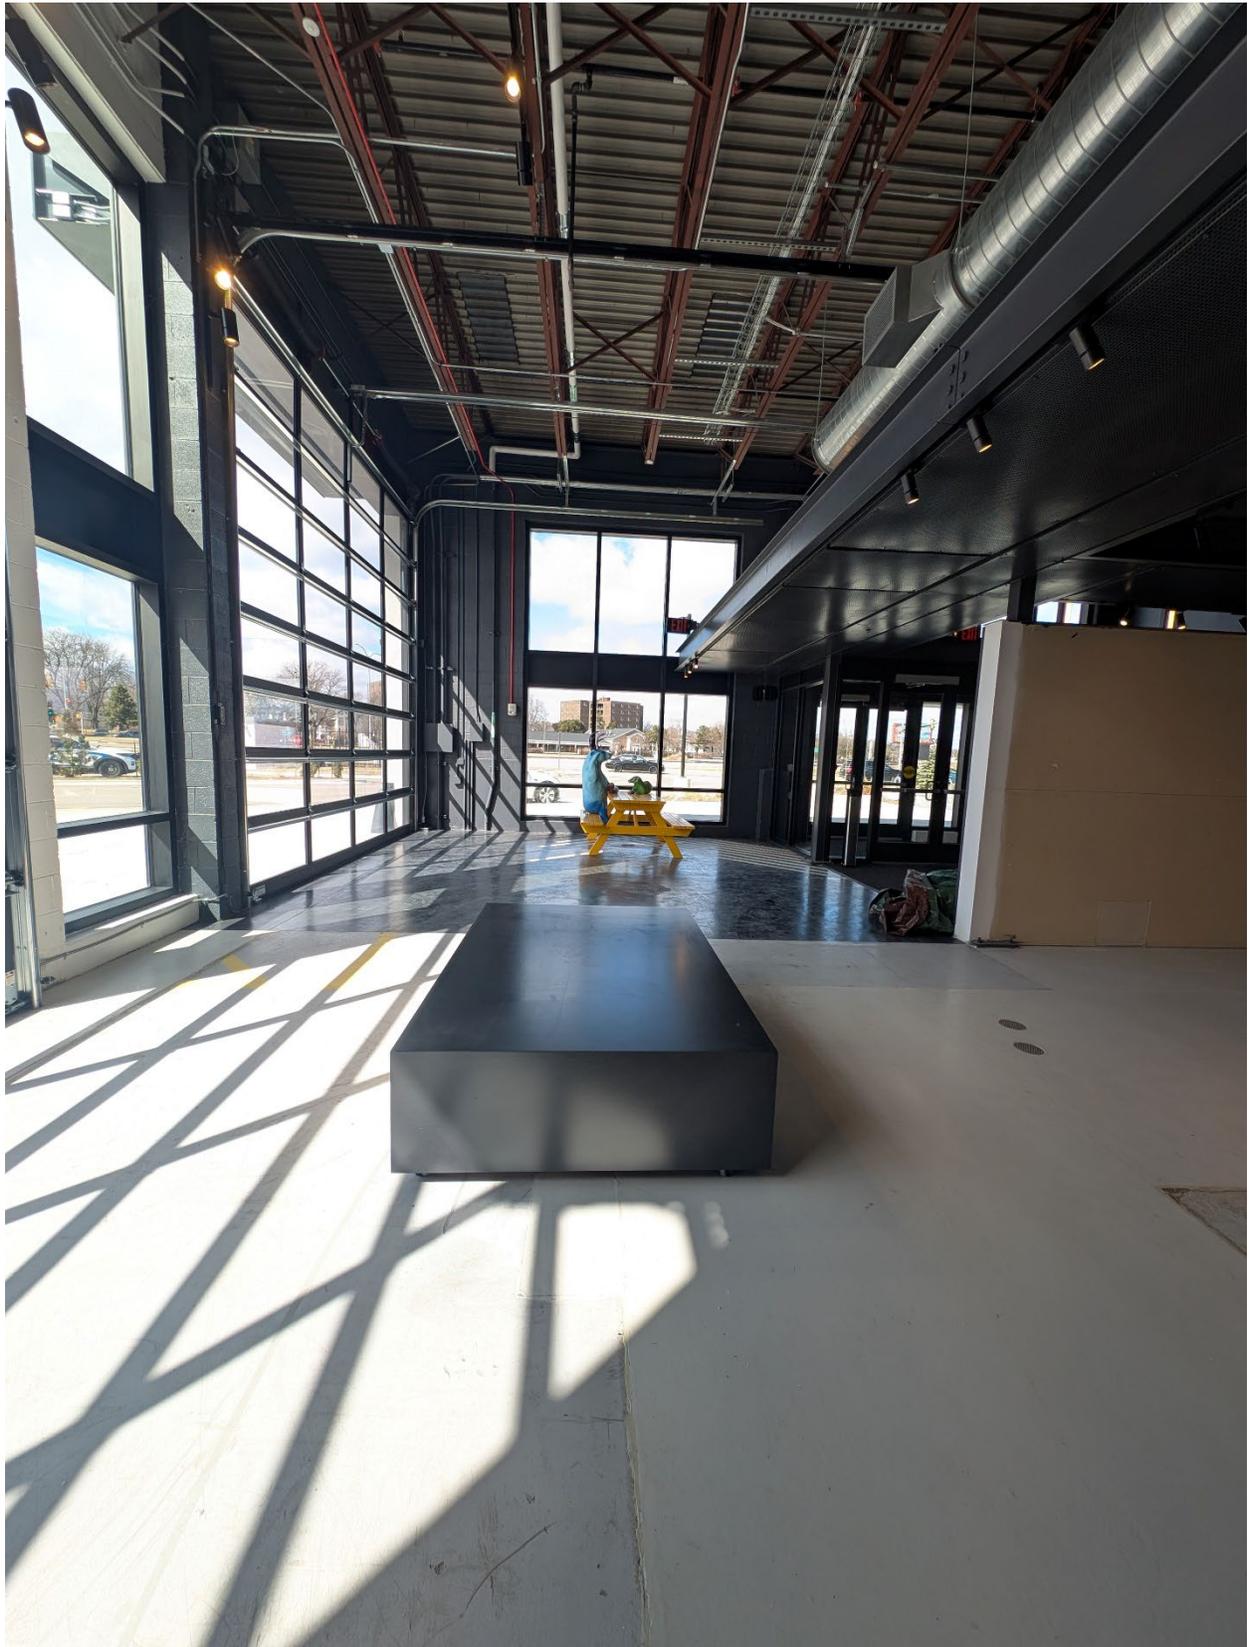

Blue Arrows indicate the eye line of the bear/deer/horse

Orange Arrows indicate the eye line of the badger/duck

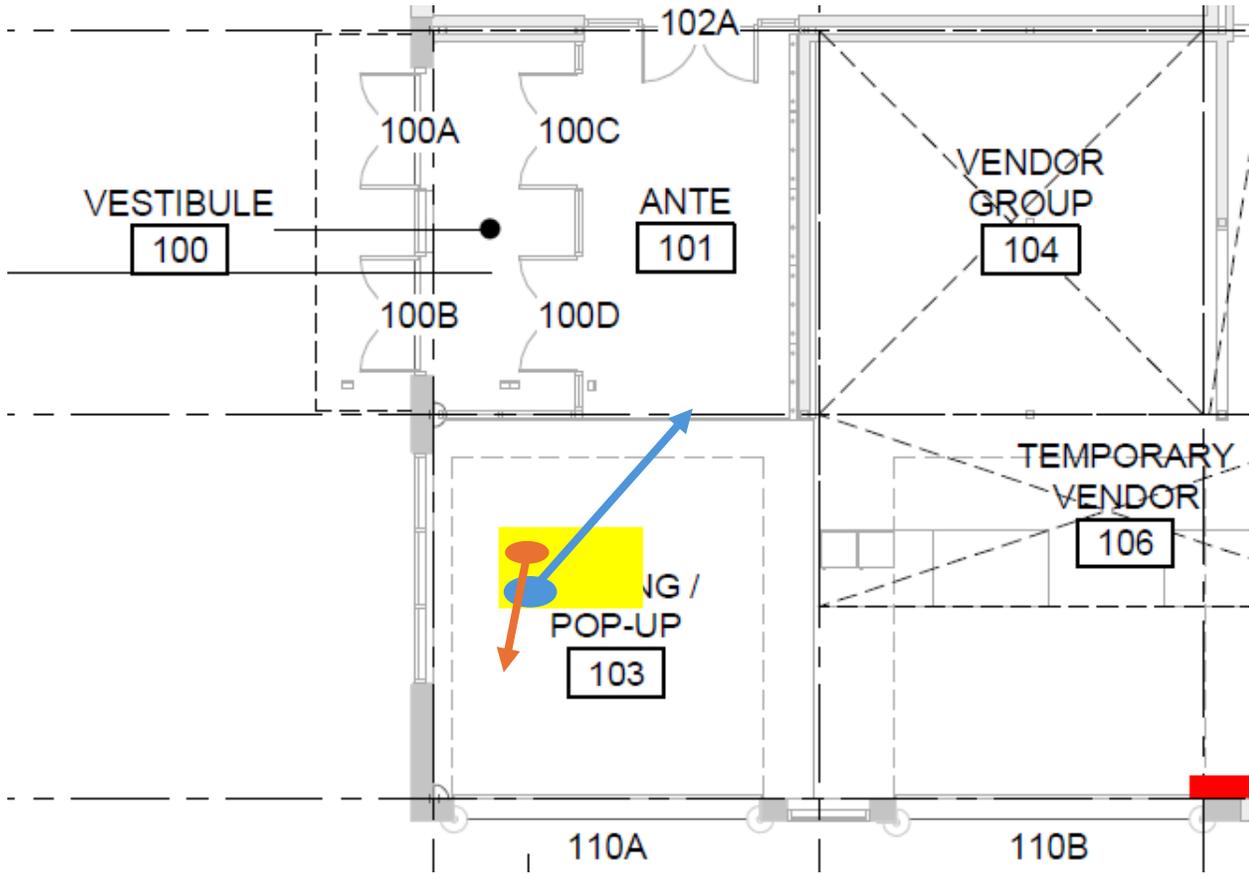

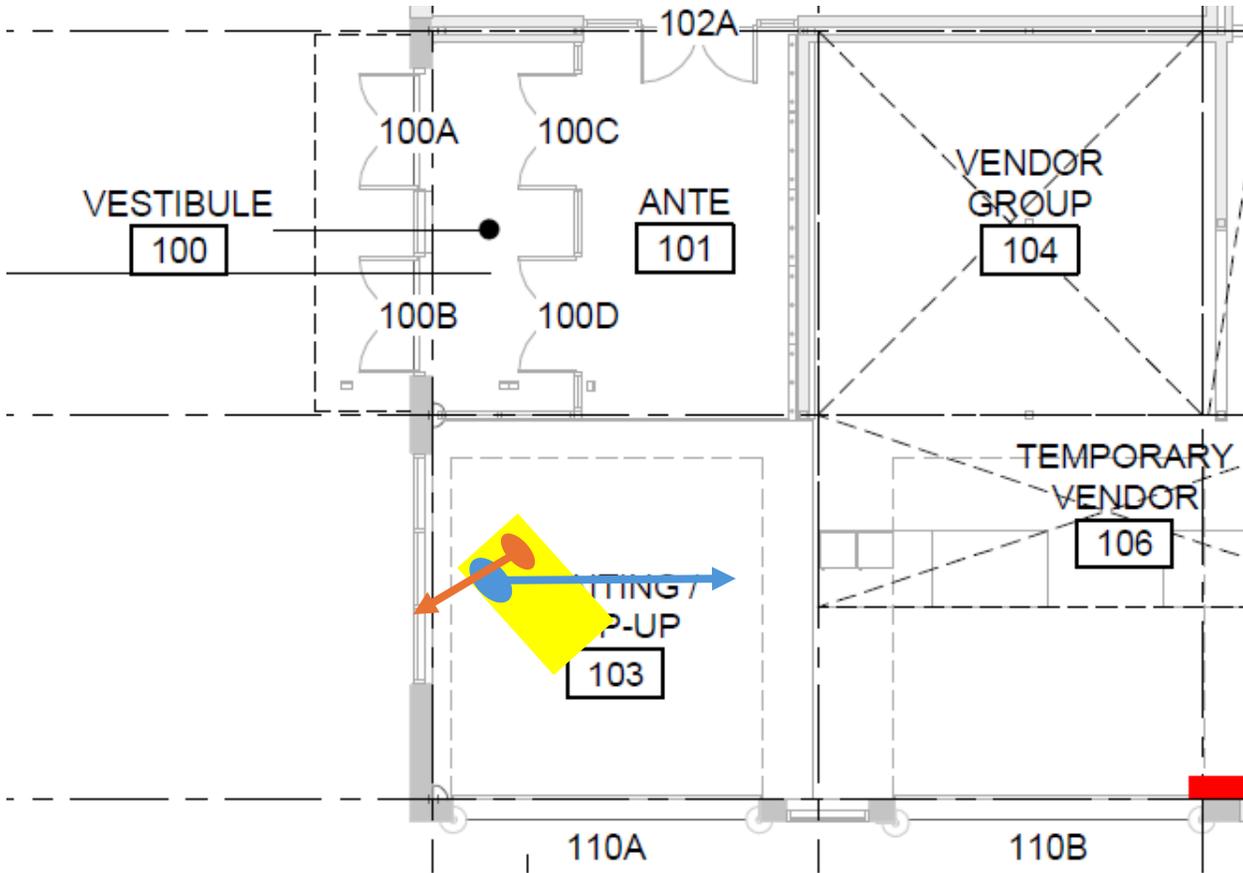

Original Orientation:

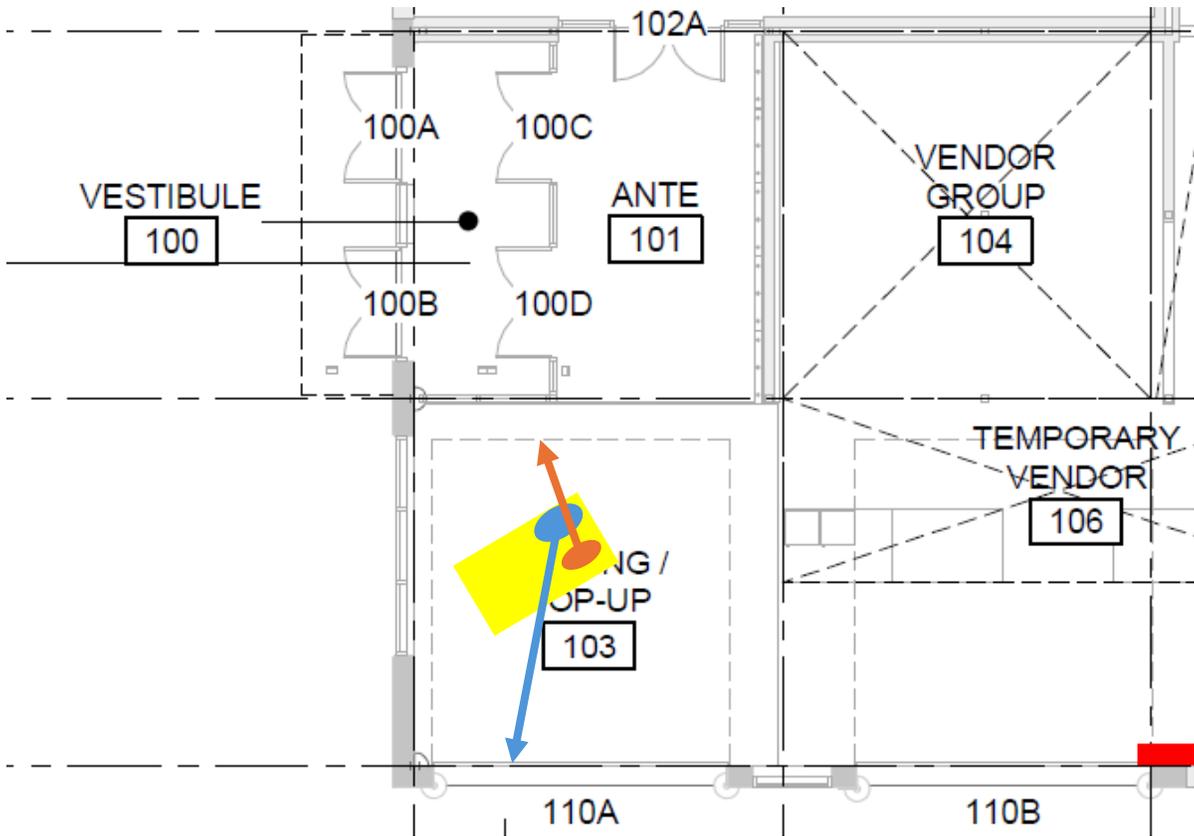

Rotation Option 1: Diagonal facing antechamber 101

Rotation Option 2: Diagonal facing windows 110A

Rotation Option 2: 90* facing windows 110b
