---

Amy,

I studied the staff map of the visually related area. I'm curious why no buildings on Jennifer St. are included in the analysis of visually related buildings. The center of the radius in the map appears to be the Willy Street curb rather than the proposed construction. Is that correct?

Given how close the 2nd story at the the south-east corner will be to the adjacent residential building (the site plan appear to indicate less than 10 feet but the plan has no scale) it seems that some evaluation of the visual impact on Jennifer St. would be called for.

thanks

john
