Support Services

- Vehicles

The Madison Fire Department is thrilled to announce the acquisition of the first electric municipal fire engine in service in North America. The apparatus is now in service as “Engine 8,” responding to fire and EMS calls from Fire Station 8 on Madison’s east side. Its introduction marks the launch of the Volterra™ platform of electric vehicles for the fire and emergency market by Pierce Manufacturing, Inc. and Oshkosh Airport Products.

Watch our live press event now or stream it later. More details are available in the press release, attached.
