

Good Afternoon-

My name is Sue Fichtel and I am the Records Manager for the Madison Police Department. I oversee the staff who work the GR10 Customer Service windows that handle all things tickets, court dates, parking payment, impounded vehicles, etc. It was suggested by one of my staff members to look into have an EZ Tab kiosk in the CCB. This kiosk allows people to obtain their license plate stickers immediately, and would offer a convenience for them. Who do I talk to about the possibility of it being on the first floor of the CCB, maybe by the ATM? All it needs is an electrical outlet and the vendor (Registration Technology) maintains the rest. I'm told the amount of electricity usage is described as the equivalent of a 45 watt bulb.

I appreciate any help you may provide.

Thank you,
Sue
