Re:	Update on Security Cameras at the Transfer Points

Responses were received from four vendors, offering different technical approaches. As part of the review and selection process, we are requiring vendors to provide a demonstration of the solution being proposed. Presentations are scheduled the second week in March.

Following the interviews, an addendum to the Request for Proposals will be issued, and the vendors will be asked to submit Best and Final Offers. We expect to make a recommendation on the transfer point surveillance cameras in early April.
