Dear council,

There's an issue with the [Meeting Registration page](#), which is not allowing me to register for item 17 / 91135 specifically. Please put me down as "In support, not wishing to speak".

Thank you,

Nick Davies

4700 Allis Ave

Madison, Wisconsin. 53716 Yes, by email. d_ferber@sbcglobal.net All Alders Moratorium on data center approval The Sierra Club Four Lakes Group heartily endorses the proposal for a one year moratorium on data center approvals. Data centers are a complex developments where the implications and community impacts can far exceed any other normal scales of developments. Further, Wisconsin has, to this point, not addressed many significant issues regarding energy, water and other environmental impacts that are critical to making decisions regarding such development. As an environmental organization, we are very concerned about potential impacts on climate, health, our natural resources, and the type of community we wish to have. These matters need to be fully studied and addressed before such impactful decisions are made.

One need look no further than what is occurring in other communities around Wisconsin to understand the strong concerns and major risks that are involved. We urge you to support this moratorium.

Thank you,

Don Ferber

I strongly support a minimum one-year moratorium on these larger data centers to allow sufficient study of their impact.
