Subject: Overhead light proposal for S.W. Bike Path

To Whom It may concern,

We have lived at 567 Glen Dr since the Fall of 1975. Our concern is if the current proposed lights are installed, eventually they will effect the real estate value of our property. An overwhelming majority of our neighbors are against the overhead lights, so logically why won't an overwhelming majority of potential home buyers dislike the effect the lights have on their backyards?

The city has looked at two different types of lights and still the level of support is not there to justify spending \$275,000. There is a better solution out there. The project needs to be postponed.

Thank You!
