Transportation Demand Management Plan Creation Tool

Transportation demand management (TDM) refers to a package of policies and strategies designed to increase transportation system efficiency and shift travel patterns to reduce the number and length of single-occupancy vehicle (SOV) trips.

The purpose of this spreadsheet is to:

- determine the applicability of the TDM program to your project
- if your project is subject to TDM requirements, provide a number of points to meet VMT reduction goals
- show you the mitigation measures applicable to your project
- provide you a clear tool to demonstration compliance with the TDM requirements for your project

Joel,

Thank you for the info. The TDMP is in good shape. We are meeting the points requirement. Below are a few more questions to finalize.

- Parking
 - Is it free? Is it sold at market rate? Is it sold separately "unbundled" from unit lease agreements?

- Affordable Housing
 - Is there any offered? If so, what percent of the units? Is it offered at 30% or 60% of annual median income?

Thank you,
