Dear Ms. Cnare,

Thank you for your ongoing assistance with the proposed new roof on my home at 113 Bascom Place, Madison. As I mentioned in my email of 7 May, I have asked Design Coalition Architects to assist me with this work. When I purchased the house I was told that the roof was over 30 years old. I have been investigating various roofing materials that meet my concerns about maintaining the historic integrity of the home while upholding "green" construction principles. "Ecoshakes" made by RenewWood seems to be an excellent choice. Thus, I have asked the Architects at Design Coalition to prepare a presentation for the Landmarks Commission on 1 June. Please do not hesitate to contact me if you have any questions.

Respectfully,

Susan Thering,
