Hi. Please see the forwarded email I sent earlier this year.

This design I proposed, originally from Ottawa, Canada's design guide, with protected intersections and protected bike lanes would've stopped this tragic, needless, preventable death that occurred earlier today.

<https://ottawa.ca/en/protected-intersection-design-guide>

Please build protected intersections and raised crossings as part of the BRT Mineral Point Rd project to prevent more death and severe injury in the future.

Thanks
Alexander Harding

Alexander,

Thanks for your comment and information. I had not seen this design before. We will pass this on to our board and city of Madison staff.

Hello,

The proposed safety improvements to Mineral Point Rd. (S. High Point Rd. Intersection), Safety Improvements are **not enough**. This is not what a Vision Zero project looks like.

NEW 111-22-008	MINERAL POINT ROAD S. High Point Road Intersection City of Madison Reconstruct and add left-turn lanes; replace traffic signals with monobuses; add pedestrian count-down timers; upgrade curb ramps; and paint high-visibility crosswalks.
--------------------------	---

This crossing is imperative for vulnerable road users to access jobs, parks, and shopping.

This crossing is imperative for people to access the West Towne Path at High Point.

I propose a protected intersection. This will provide a north/south connection for bicyclists to/from the West Towne Path. It will also **slow speeds** and add reduced crossing distances for pedestrians. It will separate road users, improving the experience and safety for drivers. Please see below mockup (missing left turn lanes from Mineral Point, pretend they're there):

This is a **real** intersection best practice from the City of Ottawa: [MailPlus Server has detected a possible fraud attempt from "urldefense.proofpoint.com" claiming to be https://ottawa.ca/en/protected-intersection-design-guide](https://ottawa.ca/en/protected-intersection-design-guide). This design guide is adopted there. It's being used, today. The West Towne area is changing. BRT will encourage growth. If we're not proactive, we will have rising pedestrian deaths, as we saw on East Washington this summer. By failing to act by building aggressive safety improvements, this Board will kill people through passive negligence.

Please build safe, complete intersections!

Thank you
Alexander Harding
