Re: Public Hearing for Camden Road Street Assessment District - 2009

The proposed improvements to the Camden Road project requires several changes.

- 1) The width of the street should not be decreased as this road is used by trucks making deliveries to the Glendale Elementary School and school buses.
- 2) Sidewalks may not be needed.
There are very few students who walk to school that use Camden Road.
There is a sidewalk one block to the east on Stoughton Rd. that students can currently use.
- 3) If sidewalks are to be installed, they should be installed only on the east side of the street to prevent removal of 23 trees from the west side of the street.
- 4) Sidewalks, if installed only on one side of the street will leave more lawn area available for the absorption of rain water and melting snow.

Yours truly,

Doug Klitzkie
