

I stand with my neighbors in opposition to a liquor license for That Barbecue. It's industrial grade meat smoker, which runs 24/7, produces a near constant smell of smoked meat. This, along with the hum of roof fans that run constantly around the clock at 901 Wilson Street create a noxious combination of air and noise pollution that will only worsen if a liquor license is approved. Attempts to meet with the owner to discuss the problem have met with resistance--she will act only if the city tells her she must. We ask that you put the brakes on this project now so that a reasonable solution can be reached before our neighborhood's reputation as one of the best places in the country to live is further eroded

Thank you for your consideration,
Joy Newmann
