Review of Projects by Engineering Environmental Staff for Impacts to Water Resources

15. **87434** Approving Plans, Specifications, and Schedule of Assessments for John Nolen Drive Reconstruction Assessment District - 2025. (District 4, District 13)

This project would normally require both WDNR and City Erosion Control permits as well as Chapter 30 permit for work along the banks of a navigable water (Lake Monona) – however as this project is being completed by the WDOT, the project falls under the Memorandum of Understanding between the WDOT and WDNR. A letter of compliance will be issued by the WDNR when required conditions have been met. As it is a State project no City permits are issued (regulation up the government ladder is not permitted).

Prepared by Greg Fries 3/7/25
