Subject: My opinion towards the Elderberry Neighborhood 2018

Dear Plan Commission Members,

Being attracted by its safe environment , convenient traffic and also its famous good school area our family moved into Blackhawk community in 2017. We are very concerned over the Elderberry Neighborhood plan 2018 version for it will have a significantly negative impact on our neighborhood area.

1. Traffic

Old sauk road and north pleasant road currently are already so full. What will happen if more than hundreds and thousands of people coming in since it's already so crowded?

2. Safety

I always believe more crowded area is more dangerous for kids. More strangers are even more harmful for kids.

3.School(most important)

How come we move here last year because of the good school area but this year you brings thousands of people in and one day the school tell us their students are too many so they have to put our kids somewhere?

We respectfully urge you to make a decision only after you have collected sufficient information and heard voices from many residents, for the decision on this land use proposal is going to affect us and our children significantly. Your kind consideration is greatly appreciated.

Sincerely,

Zheng Zeng
