ANALYTICAL RESULTS

Project: 25218096 VOIT FARMS
Pace Project No.: 40178071

Sample: TP-5 (5'-6') **Lab ID: 40178071011** Collected: 10/18/18 09:00 Received: 10/19/18 09:55 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: 25218096 VOIT FARMS
Pace Project No.: 40178071

Sample: TP-6 (5'-6') **Lab ID: 40178071012** Collected: 10/18/18 10:00 Received: 10/19/18 09:55 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: 25218096 VOIT FARMS
Pace Project No.: 40178071

Sample: TP-0 (1'-2') **Lab ID: 40178071013** Collected: 10/18/18 10:20 Received: 10/19/18 09:55 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: 25218096 VOIT FARMS
Pace Project No.: 40178071

Sample: TP-4 (6'-7') **Lab ID: 40178071019** Collected: 10/18/18 14:00 Received: 10/19/18 09:55 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

Parameters	Results	Units	LOQ	LOD	DF	Prepared	Analyzed	CAS No.	Qual
8260 MSV Med Level Normal List	Analytical Method: EPA 8260 Preparation Method: EPA 5035/5030B

QUALIFIERS

Project: 25218096 VOIT FARMS
Pace Project No.: 40178071

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor and percent moisture.

LOQ - Limit of Quantitation adjusted for dilution factor and percent moisture.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

LABORATORIES

PASI-G	Pace Analytical Services - Green Bay

ANALYTE QUALIFIERS

D3	Sample was diluted due to the presence of high levels of non-target analytes or other matrix interference.
W	Non-detect results are reported on a wet weight basis.

RE: Project: 25218096 VOIT FARM
Pace Project No.: 40176742

Dear Tony Kollasch:
Enclosed are the analytical results for sample(s) received by the laboratory on September 28, 2018. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Dan Milewsky

ANALYTICAL RESULTS

Project: 25218096 VOIT FARM
Pace Project No.: 40176742

Sample: GP1 (7.5-10) **Lab ID: 40176742001** Collected: 09/26/18 09:25 Received: 09/28/18 08:40 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

Parameters	Results	Units	LOQ	LOD	DF	Prepared	Analyzed	CAS No.	Qual

ANALYTICAL RESULTS

Project: 25218096 VOIT FARM
Pace Project No.: 40176742

Sample: GP2 (12.5-15) **Lab ID: 40176742003** Collected: 09/26/18 11:40 Received: 09/28/18 08:40 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: 25218096 VOIT FARM
Pace Project No.: 40176742

Sample: GP2 (22.5-25) **Lab ID: 40176742004** Collected: 09/26/18 11:45 Received: 09/28/18 08:40 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: 25218096 VOIT FARM
Pace Project No.: 40176742

Sample: GP3 (5-7.5) **Lab ID: 40176742005** Collected: 09/26/18 13:30 Received: 09/28/18 08:40 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: 25218096 VOIT FARM
Pace Project No.: 40176742

Sample: GP4 (2.5-5) **Lab ID: 40176742006** Collected: 09/26/18 14:40 Received: 09/28/18 08:40 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: 25218096 VOIT FARM
Pace Project No.: 40176742

Sample: GP4 (7.5-10) **Lab ID: 40176742007** Collected: 09/26/18 14:45 Received: 09/28/18 08:40 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: 25218096 VOIT FARM
Pace Project No.: 40176742

Sample: GP5 (7.5-10) **Lab ID: 40176742008** Collected: 09/26/18 15:45 Received: 09/28/18 08:40 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: 25218096 VOIT FARM
Pace Project No.: 40176742

Sample: GP10 (S2) (2.5-5) **Lab ID: 40176742015** Collected: 09/27/18 11:40 Received: 09/28/18 08:40 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

ANALYTICAL RESULTS

Project: 25218096 VOIT FARM
Pace Project No.: 40176742

Sample: GP11 (S3) (5-7.5) **Lab ID: 40176742016** Collected: 09/27/18 12:40 Received: 09/28/18 08:40 Matrix: Solid

Results reported on a "dry weight" basis and are adjusted for percent moisture, sample size and any dilutions.

QUALIFIERS

Project: 25218096 VOIT FARM
Pace Project No.: 40176742

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor and percent moisture.

LOQ - Limit of Quantitation adjusted for dilution factor and percent moisture.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

LABORATORIES

PASI-G	Pace Analytical Services - Green Bay

ANALYTE QUALIFIERS

B	Analyte was detected in the associated method blank.
L2	Analyte recovery in the laboratory control sample (LCS) was below QC limits. Results may be biased low.
M0	Matrix spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits.
M1	Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.
R1	RPD value was outside control limits.
W	Non-detect results are reported on a wet weight basis.
pH	Post-analysis pH measurement indicates insufficient VOA sample preservation.

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, LLC.

NR 722 Direct-Contact ***Exceedance*** - ***Hazard*** - ***Risk*** Calculation Summary from Soil Data (Exclusive Cumulative-only Assessment of cPAHs)

BRRTS # :
Type BRRTS No. Here (If Known)

# of Soil-Concentration Entries: 84

Please do not enter anything in this summary!

(Cumulative) cPAH Cancer Risk	Number of Individual Exceedance	(Cumulative) Hazard Index	(Cumulative) Cancer Risk
2.4E-07	2	0.0571	1.9E-05

Bottom-Line: **NO! This NON-INDUSTRIAL site sampling location will need either further cleanup to lower contaminant levels or the construction of a cap/cover to address the direct-contact pathway.**

Date of Entry: 11/8/2018.
Date of Worksheet Used: 03/14/2017.

List below only has contaminants with data.

Contaminant	CAS Number	NC RCL (mg/kg)	C RCL (mg/kg)	Not-To-Exceed D-C RCL (mg/kg)	Basis	BTV (mg/kg)	INPUTTED Site Data (mg/kg)	cPAH Cancer Risk from Data	Flag E = Individual Exceedance!	Hazard Quotient (HQ) from Data	Cancer Risk (CR) from Data

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting

the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

AMAZON.COM SERVICES EPA ID:: WID988632501	***3650 MILWAUKEE STREE***	***SE 1/8 - 1/4 (0.152 mi.)***	***E18***	***112***

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal leaking storage tanks

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Natural Resource's LUST Database.

A review of the LUST list, as provided by EDR, and dated 09/17/2021 has revealed that there are 29 LUST sites within approximately 0.5 miles of the target property.

Lists of state and tribal brownfield sites

BROWNFIELDS: A listing of brownfields sites included in the BRRTS database. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

A review of the BROWNFIELDS list, as provided by EDR, has revealed that there is 1 BROWNFIELDS site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Tank Reference Number: 274109|130103687
Equipment Wang ID: 130103687
Tank Type: Underground Storage Tank
Tank Status: Closed/Removed
Tank Contents: Fuel Oil
Capacity: 500.00
Install Date: Not reported
Construction Material: Coated Steel
Marketer: N
Tank Occupancy: Residential
Corrosion Protection Type: Not reported
Overfill Protection Type: Not Installed
Leak Detection: Manual Tank Gauging
Leak Test Method: Not reported
Spill Protection: Not Installed

JACOBSON-FUREY (Continued) **1019910848**

Point of Reference:	Entrance Point of a Facility or Station
Highlights:	The property was acquired by the City of Madison for construction of a series of three stormwater treatment ponds and to provided a missing link in the Capitol City Bike Path, running beneath US Hwy 30 (Commercial Ave.). It was formerly used by Sinclair Oil for either a gas station or lubrication warehouse. Two 1,000-gal USTs were removed from the property in the 1950s and a railroad spur passed through it. It had be vacant for years and also housed a 1,826-sf garage/shop building, which was demolished as part of this project.

Latitude:	43.105731
Longitude:	-89.326817
HCM Label:	Address Matching-House Number
Map Scale:	-
Point of Reference:	Entrance Point of a Facility or Station
Highlights:	The property was acquired by the City of Madison for construction of a series of three stormwater treatment ponds and to provided a missing link in the Capitol City Bike Path, running beneath US Hwy 30 (Commercial Ave.). It was formerly used by Sinclair Oil for either a gas station or lubrication warehouse. Two 1,000-gal USTs were removed from the property in the 1950s and a railroad spur passed through it. It had be vacant for years and also housed a 1,826-sf garage/shop building, which was demolished as part of this project.

GO 2 STOP INC (Continued) **U002072957**

Action Name: Continuing Obligation - Residual Soil Contamination
Action Desc: Closure or ongoing cleanup was approved with the Continuing Obligation to address residual soil contamination at or above the Residual Contamination Level (RCL) or Site Specific Residual Contaminant Level (SSRCL) per rules, when moved.
Action Comments: *** AUTO POPULATED AT FINAL CLOSURE DUE TO 710 ACTION ***

Action Date: 12/27/2005 Action Code: 236
Action Name: Continuing Obligation - Residual GW Contamination
Action Desc: Closure or ongoing cleanup was approved with the Continuing Obligation for residual groundwater contamination in excess of ch. NR 140 groundwater enforcement standard, to obtain DNR approval before well construction or reconstruction.
Action Comments: *** AUTO POPULATED AT FINAL CLOSURE DUE TO 700 ACTION ***

Action Date: 12/27/2005 Action Code: 46
Action Name: Impacted Right-of-Way (ROW) Notification
Action Desc: Contamination has impacted one or more rights-of-way (ROW). The affected right-of-way (ROW) holders have been notified by the DNR.
Action Comments: AUTO-POPULATED 2018-03-20

Action Date: 12/27/2005 Action Code: 56
Action Name: Continuing Obligation(s) Applied
Action Desc: Closure or ongoing cleanup was approved with one or more continuing obligations to give notice of residual contamination; require or restrict certain actions to protect the public or environment; minimize human or environmental exposures.
Action Comments: AUTO-POPULATED AS REPLACEMENT FOR CODE 50

Action Date: 09/02/2005 Action Code: 379
Action Name: Closure Committee Review
Action Desc: Date DNR Closure Committee reviews materials and recommendations to determine if the site should be granted No Further Action (Closed), Closed with Continuing Obligations, or Closure Not Recommended.
Action Comments: Not reported

Action Date: 05/14/2020 Action Code: 171
Action Name: Chlorinated VOC Initial Screening Completed
Action Desc: Date DNR reviewed existing electronic site documentation for presence of chlorinated volatile organic compounds (VOC). Substances updated in the database accordingly. No additional data collected or report generated. DNR may perform a secondary review of existing chlorinated VOC data.
Action Comments: Not reported

Substances:
Substance Desc: Petroleum - Unknown Type
Amount Released: Not reported
Release Code: Not reported

Substance Desc: Unknown Substance
Amount Released: Not reported
Release Code: Not reported

Impact Number: 67122
Impact Code: 05
Impact Comments: Soil Contamination

Action Comments: AUTO-POPULATED AS REPLACEMENT FOR CODE 50

Action Date: 09/02/2005 Action Code: 379
Action Name: Closure Committee Review
Action Desc: Date DNR Closure Committee reviews materials and recommendations to determine if the site should be granted No Further Action (Closed), Closed with Continuing Obligations, or Closure Not Recommended.
Action Comments: Not reported

Action Date: 05/14/2020 Action Code: 171
Action Name: Chlorinated VOC Initial Screening Completed
Action Desc: Date DNR reviewed existing electronic site documentation for presence of chlorinated volatile organic compounds (VOC). Substances updated in the database accordingly. No additional data collected or report generated. DNR may perform a secondary review of existing chlorinated VOC data.
Action Comments: Not reported

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Action Desc: [OBSOLETE] Date the DNR receives the Remedial Action Report detailing remedial action efforts for an activity.
Action Comments: RA REPORT RECV'D

Action Date: 11/25/1992 Action Code: 2
Action Name: Responsible Party (RP) letter sent
Action Desc: Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the investigation and cleanup of a hazardous substance discharge to the environment.
Action Comments: Not reported

Action Date: 09/21/1993 Action Code: 43
Action Name: Site Activity Status Update Received
Action Desc: Date DNR received an update regarding site activities.
Action Comments: QRTLY/MTHLY STATUS RPT

Action Date: 09/14/1994 Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.
Action Comments: Not reported

Action Date: 07/26/1993 Action Code: 43
Action Name: Site Activity Status Update Received
Action Desc: Date DNR received an update regarding site activities.
Action Comments: QRTLY/MTHLY STATUS RPT

SMITHS SERVICE CENTER (FORMER) (Continued) **1004795995**

Action Date: 11/16/1992 Action Code: 1
Action Name: Notification of Hazardous Substance Discharge
Action Desc: Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.
Action Comments: Not reported

Action Date: 07/14/1993 Action Code: 33
Action Name: Tank System Site Assessment (TSSA) Report Received
Action Desc: Date DNR received a tank system site assessment (TSSA) regarding tank closure or change in services for an above-ground or underground tank system.
Action Comments: UNDERGROUND STORAGE TANK CLOSURE ASSESSMENT REPORT

Action Date: 05/06/2020 Action Code: 171
Action Name: Chlorinated VOC Initial Screening Completed
Action Desc: Date DNR reviewed existing electronic site documentation for presence of chlorinated volatile organic compounds (VOC). Substances updated in the database accordingly. No additional data collected or report generated. DNR may perform a secondary review of existing chlorinated VOC data.
Action Comments: Not reported

Impact Number: 71235
Impact Code: 05
Impact Comments: Soil Contamination
Impact Potential: Not reported

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources). RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Action Name: Responsible Party (RP) letter sent
Action Desc: Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the investigation and cleanup of a hazardous substance discharge to the environment.
Action Comments: Not reported

MCCORMICK PROPERTY SITE #4 (Continued) **S102851239**

Action Date: 11/12/1997 Action Code: 1
Action Name: Notification of Hazardous Substance Discharge
Action Desc: Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.
Action Comments: Not reported

Action Date: 05/17/1999 Action Code: 35
Action Name: Site Investigation Workplan (SIWP) Received (non-fee)
Action Desc: Date DNR received a site investigation workplan (SIWP) which states the objectives of the site investigation to determine the degree and extent of contamination.
Action Comments: Not reported

Action Date: 05/19/1999 Action Code: 36
Action Name: Site Investigation Workplan (SIWP) Approved
Action Desc: Date DNR provided notice that a site investigation workplan (SIWP) has been approved and site investigation activities can proceed as planned.
Action Comments: Not reported

Action Date: 12/14/1998 Action Code: 37
Action Name: Site Investigation Report (SIR) Received (non-fee)
Action Desc: Date DNR received a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action.
Action Comments: Not reported

Action Date: 04/15/1999 Action Code: 143
Action Name: Remedial Action Options Report (RAOR) Received (fee)
Action Desc: Date DNR received remedial action options report (RAOR) and a fee was paid for review. It identifies and evaluates options to prevent, minimize, stabilize or eliminate threats from discharged hazardous substances and to restore the environment to the extent practicable.
Action Comments: Not reported

Action Date: 04/27/1999 Action Code: 38
Action Name: Site Investigation Report (SIR) Approved
Action Desc: Date DNR provided notice that a site investigation report (SIR) has been approved and the degree & extent of contamination has been defined for all or part of a cleanup activity at a site.
Action Comments: Not reported

Action Date: 12/14/1998 Action Code: 96
Action Name: Extenuating Circumstances for Non-Transfer to DCOM
Action Desc: [OBSOLETE] Receipt of incomplete site investigation report and request for more information. If there is a different reason for non-transfer, the reason must be noted in the comment field of this action code.
Action Comments: INCOMPLETE SI

Action Date: 03/10/1998 Action Code: 35
Action Name: Site Investigation Workplan (SIWP) Received (non-fee)
Action Desc: Date DNR received a site investigation workplan (SIWP) which states the objectives of the site investigation to determine the degree and extent of contamination.

MCCORMICK PROPERTY SITE #4 (Continued) **S102851239**

Action Comments: Not reported

Action Date: 06/01/1998 Action Code: 30
Action Name: Site Investigation Workplan (SIWP) Notice to Proceed (NTP)
Action Desc: Date DNR provided a notice to proceed (NTP) with site investigation activities. This is not an official approval of the workplan and no fee was collected for review. An NTP may be via email or phone call.
Action Comments: Not reported

Action Date: 03/19/2001 Action Code: 100
Action Name: CO Packet and GIS QAQC Completed by DNR
Action Desc: Date DNR staff reviewed information within the Continuing Obligations Packet for completeness and readability and the geolocation was confirmed.
Action Comments: Not reported

Action Date: 04/27/1999 Action Code: 82
Action Name: Remedial Action Options Report (RAOR) Not Approved
Action Desc: Date DNR provided notice that the remedial action options report (RAOR) was not approved. The RAOR should be modified or another action selected.
Action Comments: Not reported

Action Date: 02/15/2000 Action Code: 50
Action Name: GIS Registry Site
Action Desc: Site conditions merit placement on GIS registry.
Action Comments: Not reported

Action Date: 02/15/2000 Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.
Action Comments: Not reported

Action Date: 10/13/1999 Action Code: 79
Action Name: Case Closure Review Request Received
Action Desc: Date DNR Project Manager determined that the Case Closure - (Form 4400-202) submittal was administratively complete and appropriate fees have been paid for the review.
Action Comments: Not reported

Action Date: 11/02/1999 Action Code: 84
Action Name: Remaining Actions Needed
Action Desc: Date DNR sends a letter outlining the remaining actions needed to achieve final closure. The site will not be formally closed until receipt of documentation. This action was formerly known as conditional closure.
Action Comments: Not reported

Action Date: 02/15/2000 Action Code: 730
Action Name: CO Packet created for Recorded Groundwater Use Restriction
Action Desc: Date DNR created a Continuing Obligations (CO) Packet for a site closure where a Groundwater Use Restriction (GWUR) was required and recorded at the Register of Deeds. DNR Staff created the packet from available file material. A copy of the deed filing can be found in the CO Packet

Environmental Interest/Information System:
WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources). RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources). RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources). RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Action Comments: Not reported

Action Date: 08/01/2002 Action Code: 232
Action Name: Continuing Obligation - Residual Soil Contamination
Action Desc: Closure or ongoing cleanup was approved with the Continuing Obligation to address residual soil contamination at or above the Residual Contamination Level (RCL) or Site Specific Residual Contaminant Level (SSRCL) per rules, when moved.
Action Comments: *** AUTO POPULATED AT FINAL CLOSURE DUE TO 710 ACTION ***

Action Date: 08/01/2002 Action Code: 236
Action Name: Continuing Obligation - Residual GW Contamination
Action Desc: Closure or ongoing cleanup was approved with the Continuing Obligation for residual groundwater contamination in excess of ch. NR 140 groundwater enforcement standard, to obtain DNR approval before well construction or reconstruction.
Action Comments: *** AUTO POPULATED AT FINAL CLOSURE DUE TO 700 ACTION ***

Action Date: 08/01/2002 Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.
Action Comments: *** NR726 Closure from Commerce Data Interchange ***

Action Date: 07/02/2013 Action Code: 89
Action Name: DSPS (formerly Commerce) Transferred Back to DNR
Action Desc: Date the WI Dept of Safety and Professional Services (DSPS) transfers oversight of activity back to the DNR. DSPS was part of the Dept of Commerce until 2011.
Action Comments: PECFA PROGRAM TRANSFER 2013-2015 STATE BUDGET

Action Date: 03/06/1996 Action Code: 37
Action Name: Site Investigation Report (SIR) Received (non-fee)
Action Desc: Date DNR received a site investigation report (SIR) to determine

TRIANGLE SUPER SERVICE (Continued) **1000697434**

degree & extent of contamination and form a basis for choosing the appropriate remedial action.
Action Comments: *** SITE INVESTIGATION DETERMINED BY DSPS TO BE COMPLETE - FROM DSPS DATA INTERCHANGE ***

Action Date: 08/01/2002 Action Code: 46
Action Name: Impacted Right-of-Way (ROW) Notification
Action Desc: Contamination has impacted one or more rights-of-way (ROW). The affected right-of-way (ROW) holders have been notified by the DNR.
Action Comments: AUTO-POPULATED 2018-03-20

Action Date: 08/01/2002 Action Code: 56
Action Name: Continuing Obligation(s) Applied
Action Desc: Closure or ongoing cleanup was approved with one or more continuing obligations to give notice of residual contamination; require or restrict certain actions to protect the public or environment; minimize human or environmental exposures.
Action Comments: AUTO-POPULATED AS REPLACEMENT FOR CODE 50

Action Date: 05/06/2020 Action Code: 171
Action Name: Chlorinated VOC Initial Screening Completed
Action Desc: Date DNR reviewed existing electronic site documentation for presence of chlorinated volatile organic compounds (VOC). Substances updated in the database accordingly. No additional data collected or report generated. DNR may perform a secondary review of existing chlorinated VOC data.
Action Comments: Not reported

Action Date: 04/09/2002 Action Code: 80
Action Name: Closure Not Recommended
Action Desc: Date DNR sends a letter in response to a request for closure review. Letter outlines the reasons DNR cannot recommend site closure at this time.
Action Comments: ADDITIONAL SITE INVESTIGATION ACTIVITIES WILL NEED TO BE CONDUCTED

Environmental Interest/Information System:
WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources). RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Action Date: 11/20/1995 Action Code: 37
Action Name: Site Investigation Report (SIR) Received (non-fee)
Action Desc: Date DNR received a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action.
Action Comments: Not reported

Action Date: 12/18/1995 Action Code: 30
Action Name: Site Investigation Workplan (SIWP) Notice to Proceed (NTP)
Action Desc: Date DNR provided a notice to proceed (NTP) with site investigation activities. This is not an official approval of the workplan and no fee was collected for review. An NTP may be via email or phone call.
Action Comments: Not reported

Action Date: 05/18/1993 Action Code: 3
Action Name: Notice of Noncompliance (NON) Issued
Action Desc: Date Responsible Party (RP) is sent a Notice of Noncompliance (NON) as a result of their failure to comply with state law. Identifies the specific violation and requests a response within a given time period.
Not reported
Action Comments: NTC OF NON COMPLIANCE

Action Date: 12/02/1993 Action Code: 35
Action Name: Site Investigation Workplan (SIWP) Received (non-fee)
Action Desc: Date DNR received a site investigation workplan (SIWP) which states the objectives of the site investigation to determine the degree and extent of contamination.
Action Comments: SI WORK PLAN RECV'D

Action Date: 08/12/1994 Action Code: 41
Action Name: Remedial Action Report Received
Action Desc: [OBSOLETE] Date the DNR receives the Remedial Action Report detailing remedial action efforts for an activity.
Action Comments: RA REPORT RECV'D

Action Date: 02/04/1994 Action Code: 30
Action Name: Site Investigation Workplan (SIWP) Notice to Proceed (NTP)
Action Desc: Date DNR provided a notice to proceed (NTP) with site investigation

MCCORMICK LUMBER & FUEL (Continued) **U002210951**

activities. This is not an official approval of the workplan and no fee was collected for review. An NTP may be via email or phone call.
Action Comments: NOTICE TO PROCEED

Action Date: 06/02/1994 Action Code: 43
Action Name: Site Activity Status Update Received
Action Desc: Date DNR received an update regarding site activities.
Action Comments: QRTLY/MTHLY STATUS RPT

Action Date: 05/05/1995 Action Code: 30
Action Name: Site Investigation Workplan (SIWP) Notice to Proceed (NTP)
Action Desc: Date DNR provided a notice to proceed (NTP) with site investigation activities. This is not an official approval of the workplan and no fee was collected for review. An NTP may be via email or phone call.
Action Comments: NOTICE TO PROCEED

Action Date: 06/28/1995 Action Code: 41
Action Name: Remedial Action Report Received
Action Desc: [OBSOLETE] Date the DNR receives the Remedial Action Report detailing remedial action efforts for an activity.
Action Comments: RA REPORT RECV'D

Action Date: 10/06/1994 Action Code: 43
Action Name: Site Activity Status Update Received
Action Desc: Date DNR received an update regarding site activities.
Action Comments: QRTLY/MTHLY STATUS RPT

Action Date: 07/06/1993 Action Code: 35
Action Name: Site Investigation Workplan (SIWP) Received (non-fee)
Action Desc: Date DNR received a site investigation workplan (SIWP) which states the objectives of the site investigation to determine the degree and extent of contamination.
Action Comments: SI WORK PLAN RECV'D

Action Date: 12/17/1996 Action Code: 43
Action Name: Site Activity Status Update Received
Action Desc: Date DNR received an update regarding site activities.
Action Comments: Not reported

Action Date: 01/06/1998 Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.
Action Comments: Not reported

Action Date: 10/06/1997 Action Code: 44
Action Name: Form 4 Received
Action Desc: [OBSOLETE] Date the Form 4, PECFA request for reimbursement is received.
Action Comments: Not reported

Action Date: 04/07/1997 Action Code: 43
Action Name: Site Activity Status Update Received
Action Desc: Date DNR received an update regarding site activities.
Action Comments: Not reported

MCCORMICK LUMBER & FUEL (Continued) **U002210951**

Action Date: 11/20/1995 Action Code: 39
Action Name: Remedial Action Options Report (RAOR) Received (non-fee)
Action Desc: Date DNR received a remedial action options report (RAOR). It identifies and evaluates options to prevent, minimize, stabilize or eliminate threats from discharged hazardous substances and to restore the environment to the extent practicable.
Action Comments: Not reported

Action Date: 12/09/1991 Action Code: 2
Action Name: Responsible Party (RP) letter sent
Action Desc: Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the investigation and cleanup of a hazardous substance discharge to the environment.
Action Comments: RP LETTER

Substances:
Substance Desc: Petroleum - Unknown Type

WOODMANS GAS & LUBE #16 (Continued) **U002217049**

Actions:

Action Date: 08/07/2020 Action Code: 1
Action Name: Notification of Hazardous Substance Discharge
Action Desc: Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.
Action Comments: Not reported

Action Date: 08/07/2020 10:29:03 AM Action Code: 35
Action Name: Site Investigation Workplan (SIWP) Received (non-fee)
Action Desc: Date DNR received a site investigation workplan (SIWP) which states the objectives of the site investigation to determine the degree and extent of contamination.
Action Comments: Not reported

Action Date: 08/07/2020 5:12:52 PM Action Code: 2
Action Name: Responsible Party (RP) letter sent
Action Desc: Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the investigation and cleanup of a hazardous substance discharge to the environment.
Action Comments: Not reported

Action Date: 12/04/2020 Action Code: 33
Action Name: Tank System Site Assessment (TSSA) Report Received
Action Desc: Date DNR received a tank system site assessment (TSSA) regarding tank closure or change in services for an above-ground or underground tank system.
Action Comments: Not reported

Action Date: 08/09/2021 Action Code: 43
Action Name: Site Activity Status Update Received
Action Desc: Date DNR received an update regarding site activities.
Action Comments: TECHNICAL ASSISTANCE, ENVIRONMENTAL LIABILITY CLARIFICATION OR POST-CLOSURE MODIFICATION REQUEST

Action Date: 08/09/2021 Action Code: 137
Action Name: Site Investigation Report (SIR) Received (fee)
Action Desc: Date DNR received a request to review a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action. A fee was paid for DNR review.
Action Comments: Not reported

Action Date: 07/15/2021 10:01:51 AM Action Code: 195
Action Name: Semi-Annual/PECFA Cost Reporting (NR700) Requirement Met
Action Desc: Date DNR received submittal of completed online semi-annual report form, meeting the requirements of NR 700.
Action Comments: Period: 1/1/2021 - 6/30/2021

Action Date: 01/19/2021 Action Code: 33
Action Name: Tank System Site Assessment (TSSA) Report Received
Action Desc: Date DNR received a tank system site assessment (TSSA) regarding tank closure or change in services for an above-ground or underground tank system.
Action Comments: Not reported

Environmental Interest/Information System:
WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources). RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Actions:

Action Date: 02/11/1993 Action Code: 1
Action Name: Notification of Hazardous Substance Discharge
Action Desc: Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.
Action Comments: Not reported

Action Date: 06/15/1993 Action Code: 35
Action Name: Site Investigation Workplan (SIWP) Received (non-fee)
Action Desc: Date DNR received a site investigation workplan (SIWP) which states the objectives of the site investigation to determine the degree and extent of contamination.
Action Comments: SI WORK PLAN RECV'D

Action Date: 06/29/1994 Action Code: 45
Action Name: Form 4 Approved
Action Desc: [OBSOLETE] Date the DNR signs the Form 4, PECFA request for reimbursement for actions taken in accordance with s101.143.
Action Comments: FORM 4 APPROVED

Action Date: 08/14/1996 Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.
Action Comments: Not reported

Action Date: 01/07/1994 Action Code: 37
Action Name: Site Investigation Report (SIR) Received (non-fee)
Action Desc: Date DNR received a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action.
Action Comments: SI REPORT RECV'D

Action Date: 09/13/1993 Action Code: 30
Action Name: Site Investigation Workplan (SIWP) Notice to Proceed (NTP)
Action Desc: Date DNR provided a notice to proceed (NTP) with site investigation activities. This is not an official approval of the workplan and no fee was collected for review. An NTP may be via email or phone call.
Action Comments: NOTICE TO PROCEED

Action Date: 10/05/1993 Action Code: 43
Action Name: Site Activity Status Update Received

Actions:
Action Date: 02/11/1993 Action Code: 1
Action Name: Notification of Hazardous Substance Discharge
Action Desc: Date DNR received notice of a discharge of a hazardous substance

MADISON KIPP CORP (DUPLICATE) (Continued) **S118559477**

under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.
Action Comments: Not reported

Action Date: 06/15/1993 Action Code: 35
Action Name: Site Investigation Workplan (SIWP) Received (non-fee)
Action Desc: Date DNR received a site investigation workplan (SIWP) which states the objectives of the site investigation to determine the degree and extent of contamination.
Action Comments: SI WORK PLAN RECV'D

Action Date: 06/29/1994 Action Code: 45
Action Name: Form 4 Approved
Action Desc: [OBSOLETE] Date the DNR signs the Form 4, PECFA request for reimbursement for actions taken in accordance with s101.143.
Action Comments: FORM 4 APPROVED

Action Date: 08/14/1996 Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.
Action Comments: Not reported

Action Date: 01/07/1994 Action Code: 37
Action Name: Site Investigation Report (SIR) Received (non-fee)
Action Desc: Date DNR received a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action.
Action Comments: SI REPORT RECV'D

Action Date: 09/13/1993 Action Code: 30
Action Name: Site Investigation Workplan (SIWP) Notice to Proceed (NTP)
Action Desc: Date DNR provided a notice to proceed (NTP) with site investigation activities. This is not an official approval of the workplan and no fee was collected for review. An NTP may be via email or phone call.
Action Comments: NOTICE TO PROCEED

Action Date: 10/05/1993 Action Code: 43
Action Name: Site Activity Status Update Received
Action Desc: Date DNR received an update regarding site activities.
Action Comments: QRTLY/MTHLY STATUS RPT

Action Date: 05/10/1996 Action Code: 84
Action Name: Remaining Actions Needed
Action Desc: Date DNR sends a letter outlining the remaining actions needed to achieve final closure. The site will not be formally closed until receipt of documentation. This action was formerly known as conditional closure.
Action Comments: Not reported

Action Date: 08/14/1996 Action Code: 51
Action Name: Deed Affidavit Recorded at Closure
Action Desc: Date Deed Affidavit was recorded with the Register of Deeds. Recorded at the time of closure to give notice of residual soil contamination or for monitoring wells needing abandonment. Notice of conditions

MADISON KIPP CORP (DUPLICATE) (Continued) **S118559477**

required under code rather than as a property-specific condition(s).
Action Comments: Not reported

Action Date: 08/14/1996 Action Code: 56
Action Name: Continuing Obligation(s) Applied
Action Desc: Closure or ongoing cleanup was approved with one or more continuing obligations to give notice of residual contamination; require or restrict certain actions to protect the public or environment; minimize human or environmental exposures.
Action Comments: Not reported

Action Date: 08/14/1996 Action Code: 232
Action Name: Continuing Obligation - Residual Soil Contamination
Action Desc: Closure or ongoing cleanup was approved with the Continuing Obligation to address residual soil contamination at or above the Residual Contamination Level (RCL) or Site Specific Residual Contaminant Level (SSRCL) per rules, when moved.
Action Comments: Not reported

Action Date: 08/14/1996 Action Code: 50

WHITEHORSE MIDDLE SCHOOL (Continued) **S101708688**

Actions:

Action Date: 06/30/1992 Action Code: 1
Action Name: Notification of Hazardous Substance Discharge
Action Desc: Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.
Action Comments: Not reported

Action Date: 08/15/1992 Action Code: 2
Action Name: Responsible Party (RP) letter sent
Action Desc: Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the investigation and cleanup of a hazardous substance discharge to the environment.
Action Comments: Not reported

Action Date: 06/03/1993 Action Code: 30
Action Name: Site Investigation Workplan (SIWP) Notice to Proceed (NTP)
Action Desc: Date DNR provided a notice to proceed (NTP) with site investigation activities. This is not an official approval of the workplan and no fee was collected for review. An NTP may be via email or phone call.
Action Comments: NOTICE TO PROCEED

Action Date: 10/11/1996 Action Code: 51
Action Name: Deed Affidavit Recorded at Closure
Action Desc: Date Deed Affidavit was recorded with the Register of Deeds. Recorded at the time of closure to give notice of residual soil contamination or for monitoring wells needing abandonment. Notice of conditions required under code rather than as a property-specific condition(s).
Action Comments: Not reported

Action Date: 10/11/1996 Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.
Action Comments: Not reported

Action Date: 05/06/2020 Action Code: 171
Action Name: Chlorinated VOC Initial Screening Completed
Action Desc: Date DNR reviewed existing electronic site documentation for presence of chlorinated volatile organic compounds (VOC). Substances updated in the database accordingly. No additional data collected or report generated. DNR may perform a secondary review of existing chlorinated VOC data.
Action Comments: Not reported

Substances:

Substance Desc: Petroleum - Unknown Type
Amount Released: Not reported

HCM Label:	Address Matching-House Number
Map Scale:	-
Point of Reference:	Entrance Point of a Facility or Station
Highlights:	Rethke Terrace offers 60 units of permanent supportive housing for chronically homeless individuals on Madison?s east side. A collaboration between the City of Madison, Dane County and Heartland Housing, the new apartment building will have real impact for those facing homelessness. Rethke Terrace will serve the most vulnerable people experiencing homeless. Not only will the apartments be affordable, but on-site services will also be offered. Service provider Heartland Health Outreach will work with residents to remain stable in their housing while they work to improve their health, their self-sufficiency and build a better future. Of the 60 studio apartments in the building, 25 will be reserved for formerly homeless veterans. Heartland is collaborating with the Wm. S. Middleton Memorial Veterans Hospital to implement this priority and serve Madison?s homeless veterans. Former Use: The property was used by landscaping services from approximately 1958-1994. Two 550-gal USTs were removed from the site in 1994 with minimal documentation.

HCM Label:	Address Matching-House Number
Map Scale:	-
Point of Reference:	Entrance Point of a Facility or Station
Highlights:	Rethke Terrace offers 60 units of permanent supportive housing for chronically homeless individuals on Madison?s east side. A collaboration between the City of Madison, Dane County and Heartland Housing, the new apartment building will have real impact for those facing homelessness. Rethke Terrace will serve the most vulnerable people experiencing homeless. Not only will the apartments be affordable, but on-site services will also be offered. Service provider Heartland Health Outreach will work with residents to remain stable in their housing while they work to improve their health, their self-sufficiency and build a better future. Of the 60 studio apartments in the building, 25 will be reserved for formerly homeless veterans. Heartland is collaborating with the Wm. S. Middleton Memorial Veterans Hospital to implement this priority and serve Madison?s homeless veterans. Former Use: The property was used by landscaping services from approximately 1958-1994. Two 550-gal USTs were removed from the site in 1994 with minimal documentation.

Point of Reference:	Entrance Point of a Facility or Station
Highlights:	Rethke Terrace offers 60 units of permanent supportive housing for chronically homeless individuals on Madison?s east side. A collaboration between the City of Madison, Dane County and Heartland Housing, the new apartment building will have real impact for those facing homelessness. Rethke Terrace will serve the most vulnerable people experiencing homeless. Not only will the apartments be affordable, but on-site services will also be offered. Service provider Heartland Health Outreach will work with residents to remain stable in their housing while they work to improve their health, their self-sufficiency and build a better future. Of the 60 studio apartments in the building, 25 will be reserved for formerly homeless veterans. Heartland is collaborating with the Wm. S. Middleton Memorial Veterans Hospital to implement this priority and serve Madison?s homeless veterans. Former Use: The property was used by landscaping services from approximately 1958-1994. Two 550-gal USTs were removed from the site in 1994 with minimal documentation.

Action Comments: Not reported

Action Date: 01/03/2013 3:29:17 PM Action Code: 50
Action Name: GIS Registry Site
Action Desc: Site conditions merit placement on GIS registry.
Action Comments: *** AUTO POPULATED BY 700 ACTION ENTRY ***

Action Date: 04/02/2014 Action Code: 100
Action Name: CO Packet and GIS QAQC Completed by DNR
Action Desc: Date DNR staff reviewed information within the Continuing Obligations Packet for completeness and readability and the geolocation was confirmed.
Action Comments: Not reported

Action Date: 11/06/2013 4:16:34 PM Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.
Action Comments: Not reported

Action Date: 11/06/2013 4:16:34 PM Action Code: 232
Action Name: Continuing Obligation - Residual Soil Contamination
Action Desc: Closure or ongoing cleanup was approved with the Continuing Obligation to address residual soil contamination at or above the Residual Contamination Level (RCL) or Site Specific Residual Contaminant Level (SSRCL) per rules, when moved.
Action Comments: *** AUTO POPULATED AT FINAL CLOSURE DUE TO 710 ACTION ***

Action Date: 11/06/2013 4:16:34 PM Action Code: 236
Action Name: Continuing Obligation - Residual GW Contamination

WENDYS (Continued) **S101517015**

Action Desc: Closure or ongoing cleanup was approved with the Continuing Obligation for residual groundwater contamination in excess of ch. NR 140 groundwater enforcement standard, to obtain DNR approval before well construction or reconstruction.
Action Comments: *** AUTO POPULATED AT FINAL CLOSURE DUE TO 700 ACTION ***

Action Date: 11/06/2013 Action Code: 222
Action Name: Continuing Obligation - Maintain Cap Over Contaminated Area
Action Desc: Closure or ongoing cleanup was approved with the requirement to maintain a cap or cover to protect against exposure to contaminated soil (direct contact) or to reduce the movement of residual contamination in soil or groundwater.
Action Comments: Not reported

Action Date: 11/06/2013 Action Code: 234
Action Name: Continuing Obligation - Monitoring Well Needs Abandonment
Action Desc: Closure or ongoing cleanup was approved with the requirement to abandon a groundwater monitoring well, in accordance with ch. NR 141, that were not able to be located at the time of closure or have been approved for continued use.
Action Comments: MW WAS NOT ABLE TO BE LOCATED

Action Date: 11/06/2013 Action Code: 56
Action Name: Continuing Obligation(s) Applied
Action Desc: Closure or ongoing cleanup was approved with one or more continuing obligations to give notice of residual contamination; require or restrict certain actions to protect the public or environment; minimize human or environmental exposures.
Action Comments: Not reported

Action Date: 10/23/2013 Action Code: 190
Action Name: Remaining Actions Needed Requirements Met or Docs Received
Action Desc: Date DNR received all documentation of actions required in the remaining actions needed letter and begins to prepare a final closure letter.
Action Comments: Not reported

Action Date: 09/04/2013 3:37:41 PM Action Code: 84
Action Name: Remaining Actions Needed
Action Desc: Date DNR sends a letter outlining the remaining actions needed to achieve final closure. The site will not be formally closed until receipt of documentation. This action was formerly known as conditional closure.
Action Comments: MWA NEEDED

Action Date: 08/30/2013 4:19:41 PM Action Code: 199
Action Name: Additional Information Received (Fee-Based or Closure)
Action Desc: Date DNR received the additional information that it had requested in order to make a determination on a fee-based or closure submittal.
Action Comments: Not reported

Action Date: 10/13/2003 Action Code: 501
Action Name: PECFA Bidding to Establish Cost Cap
Action Desc: Responsible party notified that bidding to establish a Petroleum Environmental Cleanup Fund Award (PECFA) reimbursement cost cap will be done. See comments for bid details.
Action Comments: Not reported

WENDYS (Continued) **S101517015**

Action Date: 11/06/2013 Action Code: 46
Action Name: Impacted Right-of-Way (ROW) Notification
Action Desc: Contamination has impacted one or more rights-of-way (ROW). The affected right-of-way (ROW) holders have been notified by the DNR.
Action Comments: AUTO-POPULATED 2018-03-20

Action Date: 11/06/2013 4:16:34 PM Action Code: 66
Action Name: Continuing Obligations (COs) Apply at Off-site Property(ies)
Action Desc: Closure or on-going cleanup was approved at this site with one or more continuing obligations (COs) applied to an off-site affected property(ies) as part of the approved remedy.
Action Comments: auto-populated on 08/01/2019 per activity relationship to off-site(s)

Action Date: 06/16/1994 Action Code: 2
Action Name: Responsible Party (RP) letter sent
Action Desc: Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the investigation and cleanup of a hazardous substance discharge to the environment.
Action Comments: RP LETTER

Action Date: 05/15/2020 2:29:54 PM Action Code: 171
Action Name: Chlorinated VOC Initial Screening Completed
Action Desc: Date DNR reviewed existing electronic site documentation for presence of chlorinated volatile organic compounds (VOC). Substances updated in the database accordingly. No additional data collected or report generated. DNR may perform a secondary review of existing chlorinated VOC data.

Environmental Interest/Information System:
WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

WISCONSIN BELL INC PW0112 (Continued) **1000104421**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Action Name: Site Activity Status Update Received
Action Desc: Date DNR received an update regarding site activities.
Action Comments: Not reported

Action Date: 05/06/1999 Action Code: 43
Action Name: Site Activity Status Update Received
Action Desc: Date DNR received an update regarding site activities.
Action Comments: Not reported

Action Date: 03/22/2001 Action Code: 100
Action Name: CO Packet and GIS QAQC Completed by DNR
Action Desc: Date DNR staff reviewed information within the Continuing Obligations Packet for completeness and readability and the geolocation was confirmed.
Action Comments: Not reported

Action Date: 08/09/2000 Action Code: 50
Action Name: GIS Registry Site
Action Desc: Site conditions merit placement on GIS registry.
Action Comments: Not reported

Action Date: 08/09/2000 Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.
Action Comments: Not reported

Action Date: 05/25/2000 Action Code: 79
Action Name: Case Closure Review Request Received
Action Desc: Date DNR Project Manager determined that the Case Closure - (Form 4400-202) submittal was administratively complete and appropriate fees have been paid for the review.
Action Comments: Not reported

CV PROS (Continued) **1000879459**

Action Date: 06/28/2000 Action Code: 84
Action Name: Remaining Actions Needed
Action Desc: Date DNR sends a letter outlining the remaining actions needed to achieve final closure. The site will not be formally closed until receipt of documentation. This action was formerly known as conditional closure.
Action Comments: Not reported

Action Date: 07/14/1994 Action Code: 35
Action Name: Site Investigation Workplan (SIWP) Received (non-fee)
Action Desc: Date DNR received a site investigation workplan (SIWP) which states the objectives of the site investigation to determine the degree and extent of contamination.
Action Comments: SI WORK PLAN RECV'D

Action Date: 08/09/2000 Action Code: 730
Action Name: CO Packet created for Recorded Groundwater Use Restriction
Action Desc: Date DNR created a Continuing Obligations (CO) Packet for a site closure where a Groundwater Use Restriction (GWUR) was required and recorded at the Register of Deeds. DNR Staff created the packet from available file material. A copy of the deed filing can be found in the CO Packet
Action Comments: *** AUTO-POPULATED ***

Action Date: 08/09/2000 Action Code: 56
Action Name: Continuing Obligation(s) Applied
Action Desc: Closure or ongoing cleanup was approved with one or more continuing obligations to give notice of residual contamination; require or restrict certain actions to protect the public or environment; minimize human or environmental exposures.
Action Comments: *** AUTO-POPULATED ***

Action Date: 08/09/2000 Action Code: 236
Action Name: Continuing Obligation - Residual GW Contamination
Action Desc: Closure or ongoing cleanup was approved with the Continuing Obligation for residual groundwater contamination in excess of ch. NR 140 groundwater enforcement standard, to obtain DNR approval before well construction or reconstruction.
Action Comments: *** AUTO-POPULATED ***

Action Date: 05/05/2020 Action Code: 171
Action Name: Chlorinated VOC Initial Screening Completed
Action Desc: Date DNR reviewed existing electronic site documentation for presence of chlorinated volatile organic compounds (VOC). Substances updated in the database accordingly. No additional data collected or report generated. DNR may perform a secondary review of existing chlorinated VOC data.
Action Comments: SECONDARY SCREENING RECOMMENDED

Environmental Interest/Information System:
WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources). RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources). RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/20/2021

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Lists of state- and tribal hazardous waste facilities

SHWS: Hazard Ranking List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Lists of state and tribal brownfield sites

BEAP: Brownfields Environmental Assessment Program

The Brownfields Environmental Assessment Program (BEAP) was a federal program that assisted municipalities with Environmental Site Assessments (ESA's) for tax delinquent or bankrupt properties, or properties a local government acquired for redevelopment. Using federal dollars, site assessments were conducted by Department of Natural Resources (DNR) staff to determine if the properties were contaminated.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

AG SPILLS: Agricultural Spill Cases

Spills reported to the Department of Agriculture, Trade & Consumer Protection. There are two types of spills. Long-term: These are mainly pesticide and fertilizer cases. Some might include other contaminants at the same site. Some might involve wood-treaters - which use pesticides. All of them involve spills of products, but these spills generally result from day to day use (chronic spills) rather than accidental spills (acute). Accidental: These are the acute spills of pesticides and fertilizers and only involve pesticides and fertilizers. Most of these are cleaned up and closed within 3 to 6 months.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

BRRTS: Bureau of Remediation & Redevelopment Tracking System

BRRTS is a tracking system of contaminated sites. It holds key information for finding out more about a site or an activity. Activity types included are: Abandoned Container - An abandoned container with potentially hazardous contents recovered from a site. No discharge to the environment occurs. If the container did release a hazardous substance, a spill would be associated with the site. Superfund - is a federal program created by Congress in 1980 to finance cleanup of the nation’s worst hazardous waste sites. VPLE - Voluntary Property Liability Exemptions apply to sites in which a property owner conducts an environmental investigation and cleanup of an entire property and then receives limits on their future liability. General Property - Environmental actions which apply to the property as a whole, rather than a specific source of contamination, such as the LUST or environmental repair site. Examples would be off-site letters, municipal liability clarification letters, lease letters, voluntary party liability exemption actions, and general liability clarification letters.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

COUNTY RECORDS

MILWAUKEE COUNTY:

BROWNFIELDS 2: List of Tax Delinquent Brownfields

Current owners of these sites have not paid their property taxes for one or more years. Based on at least an initial screening of these properties (including a historical land use check and a site visit), the City has decided not to foreclose because of potential environmental contamination. However, the City (using State Statute 75.106) may begin foreclosure, and then assign the foreclosure judgment to a new party that will remediate and redevelop the site. Testing may demonstrate that the site is clean or needs limited environmental clean-up.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

FORMER VOIT FARM
3450 MILWAUKEE STREET
MADISON, WI 53714

TARGET PROPERTY COORDINATES

Latitude (North):	43.101424 - 43ˆ 6’ 5.13’’
Longitude (West):	89.327687 - 89ˆ 19’ 39.67’’
Universal Tranverse Mercator:	Zone 16
UTM X (Meters):	310577.5
UTM Y (Meters):	4774492.5
Elevation:	872 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12442041 MADISON EAST, WI
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

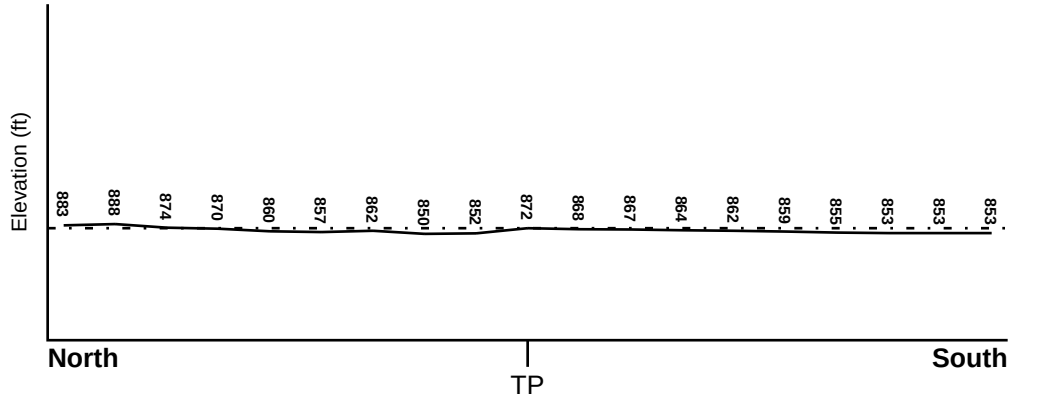
TOPOGRAPHIC INFORMATION

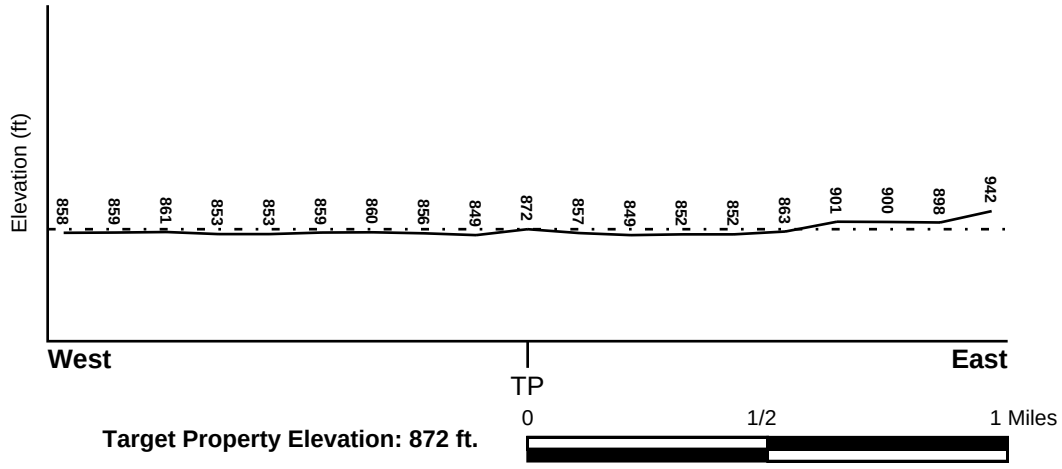
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





Target Property Elevation: 872 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
55025C0427H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

55025C0429H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
MADISON EAST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Pits, gravel

Soil Surface Texture: stratified extremely gravelly coarse sand to gravelly sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	stratified extremely gravelly coarse sand to gravelly sand	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 2

Soil Component Name: Colwood

Soil Surface Texture: silt loam

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.4
2	9 inches	24 inches	loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.4
3	24 inches	59 inches	stratified fine sand to silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.4

Soil Map ID: 3

Soil Component Name: Kegonsa

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	silt loam	Not reported	Not reported	Max: 141 Min: 141	Max: 8.4 Min: 7.4

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	11 inches	29 inches	silt loam	Not reported	Not reported	Max: 141 Min: 141	Max: 8.4 Min: 7.4
3	29 inches	33 inches	sandy clay loam	Not reported	Not reported	Max: 141 Min: 141	Max: 8.4 Min: 7.4
4	33 inches	59 inches	sand and gravel	Not reported	Not reported	Max: 141 Min: 141	Max: 8.4 Min: 7.4

Soil Map ID: 4

Soil Component Name: Water greater than 40 acres

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 5

Soil Component Name: Cut and fill land

Soil Surface Texture: variable

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
3	44 inches	50 inches	gravelly clay loam	Not reported	Not reported	Max: 141 Min: 141	Max: 8.4 Min: 7.4
4	50 inches	59 inches	sand and gravel	Not reported	Not reported	Max: 141 Min: 141	Max: 8.4 Min: 7.4

Soil Map ID: 14

Soil Component Name: Dodge

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

SUBJECT: **UNDERGROUND STORAGE TANK (UST) CLOSURE ASSESSMENT** for E.C. Voit and Sons located at 3450 Milwaukee Street, Blooming Grove, Wisconsin 53714
FISCHER Project #98279.001

To whom it may concern,

On behalf of Mr. Art Voit, **FISCHER** is submitting the attached Underground Storage Tank (UST) Closure Assessment for the above referenced site.

Documented in this report are the UST removal activities performed on December 17, 1998. Removed was one 6000-gallon gasoline UST and one 10,000-gallon diesel UST.

If you have any questions, or wish to discuss any part of this report, please feel free to contact us at **FISCHER**, (920) 745-2200.

Respectfully Submitted,

FISCHER,

Brian L. Youngwirth
Hydrogeologist

1.0 INTRODUCTION

This report documents the tank closure assessment performed during the removal of one 6000-gallon gasoline UST and one 10,000-gallon diesel UST at E.C. Voit and Sons, Blooming Grove, Wisconsin. A list of the acronyms used in this report is included in Appendix A. The removal and assessment were performed at the request of Mr. Voit.

3.0 PURPOSE AND SCOPE OF ASSESSMENT

The purpose of this assessment was to observe the removal of two USTs and associated piping, document tank closure activities, and assess the resulting excavation to determine if a release had occurred. The assessment was performed in general accordance with Wisconsin Department of Commerce (COMM) and Wisconsin Department of Natural Resources (WDNR) guidelines existing at this time. The scope of the assessment included but was not limited to:

- Observation of tank removal and closure operations.
- Collection of soil samples from the excavation limits in accordance with the WDNR, "Site Assessments for Underground Storage Tanks Technical Guidance."
- Submittal of a soil sample to a state of Wisconsin certified laboratory for appropriate analyses.
- Preparation of a report which includes a summary of all field observations, tank closure documentation, including required forms, laboratory analytical report with chain-of-custody documentation, and recommendations for compliance with WDNR and COMM guidelines.
- Communication with the client and regulatory agencies throughout the project.

5.0 TANK REMOVAL ACTIVITIES

On December 17, 1998, FISCHER personnel excavated soil and removed the USTs. Each tank was inerted with a diffused air blower. A lack of olfactory evidence suggested a lack of petroleum affected soil beneath the tanks. Each UST contained sludge that was removed by National Tank, Inc. and was properly containerized in 55-gallon DOT drums. One drum of sludge was containerized from each UST. The USTs were constructed of single wall, bare steel. The USTs were in good condition. The USTs were labeled properly by FISCHER per COMM requirements, and properly disposed of (See Appendix C - Documentation of Intent to Scrap).

7.0 ANALYTICAL TESTING

Upon completion of the tank removal activities, three soil samples were obtained, one from native soils beneath each end of the UST and one from beneath the center of the UST. These samples were submitted for analysis, per WDNR guidelines, for the presence of gasoline range organics (GRO) for the 6000-gallon UST and diesel range organics (DRO) for the 10,000-gallon UST. The samples were handled in a manner that minimized volatilization. Approximately 30 grams of the soil (not to exceed 35 grams) was added directly to a clean jar supplied by En Chem, Inc. All sample jars were placed on ice in a cooler, and transported to the laboratory (WDNR # 405132750) located in Green Bay, Wisconsin, accompanied by a completed chain-of-custody form.

Soil samples below the tank submitted for GRO and DRO analysis did not indicate the presence of DRO or GRO in excess of the laboratory method detection limit. (See Table 1 - Tank Closure Assessment Analytical Results, and Appendix D - Analytical Results and Chain-of-Custody Form).

9.0 GENERAL COMMENTS

The tank removal activities and assessment have been conducted in a manner consistent with that level of care ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions. Findings, recommendations and opinions contained herein have been promulgated in accordance with generally accepted practice. No other representations, expressed or implied, and no warranty or guarantee is included in this report.

In general, information contained in such assessments may have an effect on the value of the property, and is considered confidential. Copies of this report will be submitted to others only with written authorization from the owner/owner's representative.

UNDERGROUND FLAMMABLE/COMBUSTIBLE LIQUID STORAGE TANK INVENTORY

Information Required By Section 101.142, Wis. Stats.

Send Completed Form To:
Department of Commerce
Bureau of Storage Tank Regulation
P.O. Box 7837
Madison, WI [illegible]07-7837

COPY

Underground tanks in Wisconsin that have stored or currently store petroleum or regulated substances must be registered. A separate form is needed for each tank. Send each completed form to the agency designated in the top right corner. Have you previously registered this tank by submitting a form? ☐ Yes ☐ No If yes, are you correcting/updating information only? ☐ Yes ☐ No

Personal information you provide may be used for secondary purposes. [Privacy Law, s. 15.04 (1)(m)]

This registration applies to a tank that is (check one):
☐ In Use ☒ Closed - Tank Removed ☐ Ownership Change (Indicate new owner name in block 2)
☐ Newly Installed ☐ Closed - Filled with Inert Materials
☐ Abandoned with Product ☐ Temporary Out of Service - Provide Date: _____
☐ Abandoned without Product (empty) ☐ Abandon with Water

Fire Department providing fire coverage where tank is located:
☐ City ☐ Village ☒ Town of Blooming Grove

A. IDENTIFICATION (Please Print)

1. Tank Site Name	Site Address	Site Telephone Number
E.C. Voit & Sons	3450 Milwaukee St	(608) 244-0777
☐ City ☐ Village ☒ Town of: Blooming Grove	State: WI / Zip Code: 53714	County: DANE
2. Tank Owner Name	**Mailing Address**	**Telephone Number**
Art Voit	2917 Cottage Grove Road	(608) 221-1941
☐ City ☐ Village ☒ Town of: Cottage Grove	State: WI / Zip Code: 53527	County: DANE
3. Previous Name	Previous site address if different than #1	

B. Site ID #: | Facility ID #: | Customer ID #:

C. 4. Tank Age (age or date installed): | 5. Tank Capacity (gallons): 6000

D. LAND OWNER TYPE (check one)
☐ County ☐ Federal Leased ☐ Federal Owned ☐ Municipal ☐ Other Government
☒ Private ☐ State ☐ Tribal Nation

E. OCCUPANCY TYPE (check one)
☐ Gas/Retail Sales ☐ Bulk Storage ☐ Utility ☒ Mercantile/Commercial ☐ Industrial ☐ School ☐ Residential
☐ Agricultural ☐ Backup or Emergency Generator ☐ Other (Specify:)

E. CLOSURE ASSESSMENTS

NOTE: DETERMINE IF A CLOSURE ASSESSMENT IS REQUIRED BY REFERRING TO ILHR 10.

1. Individual conducting the assessment has a closure assessment plan (written) which is used as the basis for their work on the site.	☒Y ☐N	☐	☐
2. Do points of obvious contamination exist?	☐Y ☒N	☐	☐
3. Are there strong odors in the soils?	☐Y ☒N	☐	☐
4. Was a field screening instrument used to pre-screen soil sample locations?	☐Y ☒N	☐	☐
5. Was a closure assessment omitted because of obvious contamination?	☐Y ☒N	☐	☐
6. Was the DNR notified of suspected or obvious contamination?	☐Y ☒N	☐	☐

Agency, office and person contacted: _____

7. Contamination suspected because of: ☐Odor ☐Soil Staining ☐Free Product ☐Sheen on Groundwater ☐Field Instrument Test

F. METHOD OF ACHIEVING 10% LEVEL DESCRIPTION

☒Eductor Or Diffused Air Blower
Eductor driven by compressed air, bonded and drop tube left in place; vapors discharged minimum of 12 feet above ground.
Diffused air blower bonded and drop tube removed. Air pressure not exceeding 5 psig.

☐Dry Ice
Dry Ice introduced at 1.5 pounds per 100 gallons of tank capacity. Dry ice crushed and distributed over the greatest possible tank area.
Dry ice evaporated before proceeding.

☐Inert Gas (CO/2 or N/2) **NOTE: INERT GASSES PRODUCE AN OXYGEN DEFICIENT ATMOSPHERE. THE TANK MAY NOT BE ENTERED IN THIS STATE WITHOUT SPECIAL EQUIPMENT.**
Gas introduced through a single opening at a point near the bottom of the tank at the end of the tank opposite the vent.
Gas introduced under low pressure not to exceed 5 psig to reduce static electricity. Gas introducing device grounded.

☐Tank atmosphere monitored for flammable or combustible vapor levels.
Calibrate combustible gas indicator. Drop tube removed prior to checking atmosphere. Tank space monitored at bottom, middle and upper portion of tank. Readings of 10% or less of the lower flammable range (LEL) obtained before removing tank from ground.

The "Q" flag is present when a parameter has been detected below the LOQ. This indicates the results are qualified due to the uncertainty of the parameter concentration between the LOD and the LOQ.

Soil VOC detects are corrected for the total solids, unless otherwise noted.

I certify that the data contained in this Final Report has been generated and reviewed in accordance with approved methods and Laboratory Standard Operating Procedure. Exceptions, if any, are discussed in the accompanying sample narrative. Release of this final report is authorized by Laboratory management, as is verified by the following signature.

LIMITATIONS OF REPORT

1. This Report has been prepared on behalf of and for the exclusive use of the addressee, solely for use in documenting contaminant levels in the vicinity of the borings and/or soil sample locations. This Report and the findings contained herein shall not, in whole or in part, be disseminated or conveyed to any other party, nor used by any other party in whole or in part, without the prior written consent of Fischer Environmental. (FISCHER). However, FISCHER acknowledges and agrees that the Report may be conveyed to government regulatory agencies or to the lending institutions and prospective buyers associated with the sale of the property.

2. The findings and conclusions stated herein must be considered not as scientific certainties, but rather as professional opinions concerning the significance of the limited data gathered during the course of the exploration. No other warranty, expressed or implied, is made. Specifically, FISCHER does not and cannot represent that the site contains no hazardous substances or materials, oil (including petroleum products) or other latent condition beyond that observed by FISCHER during the exploration.

3. The observations described in the Report were made under the conditions stated therein. The conclusions presented in the Report were based solely upon the services described therein, and not on scientific tasks or procedures beyond the scope of the described services. The work described in this Report was carried out in accordance with the terms of FISCHER's Services which accompanied the proposal.

4. In the event that additional information is developed relative to environmental conditions or the presence of hazardous substances at the site and not contained in this Report, such information shall be brought to FISCHER's attention. FISCHER will evaluate such information and, on the basis of this evaluation, may modify the conclusions stated in this Report.

5. The conclusions and recommendations contained in this Report are based in part upon the data obtained from a limited number of soil and/or groundwater samples obtained from widely spaced sampling. The nature and extent of variations between these explorations may not become evident until further exploration. If variations other latent conditions then appear evident, and/or if changes are made in regulations, it will be necessary to reevaluate the conclusions and recommendations of this Report.

6. Quantitative laboratory testing was performed as part of the site assessment by an outside laboratory, FISCHER has relied upon the data provided, and has not conducted an independent evaluation of the reliability to these data.

7. Chemical analyses have been performed for specific parameters during the course of this project as described in the text. However, it should be noted that additional chemical constituents not included in the analysis performed on the samples collected during the assessment may be present in soil and/or groundwater at the site.

Closure Assessment for Underground Storage Tanks

Site Information

Site Name: **E.C. Voit & Sons Concrete**

Site Address: **3450 Milwaukee Street**
Madison, WI 53714

Site Owner/Operator: **E.C. Voit & Sons - Mr. Art Voit**

Owner/Operator Address: **3450 Milwaukee Street**
Madison, WI 53714
(608) 244-0777

Tank(s) Information

DILHR ID#	Tank Type	Capacity (gallons)	Contents	Inventory Form
Applied For	**UST**	**7,000**	**Fuel/Heating Oil**	**Yes**

Briefly give a narrative site description:

The E.C. Voit & Sons concrete facility is located on the north side of Milwaukee Street, just east of the intersection of Milwaukee Street and Fair Oaks Avenue in the City of Madison, Dane County, Wisconsin. The location is in the SE¼ of the NE¼ of Section 5, T7N, R10E, City of Madison, Dane County, Wisconsin (See Figure 1).

The 7,000 gallon underground storage tank (UST) had been used to provide both heat for the building and fuel for concrete operations. The tank was still being used, but based on REA's information, this tank was to be removed and replaced by an above ground storage tank (AST). According to Art Voit (owner), the tank was recently inspected by Tarlton Inspection Inc. (Melissa Tarlton) who indicated the tank was not brought up to 1998 standards and, therefore, would need to be closed by removal by June 30, 2004. A copy of the Tarlton Inspection sheet is attached with this report. The tank was removed on June 29, 2004 by Bomkamp Excavation (retained by owner).

This site assessment report is being submitted to document results of confirmatory samples collected from beneath the tank. Field screening with a flame ionization detector (FID) showed no evidence of a petroleum release. Seven samples were collected for field screening. Six samples recorded 0 meter units and one was at 0.5 meter units suggesting clean non petroleum impacted soil. FID readings above 50 meter units nsually indicate detectable levels of petroleum residues.

Laboratory analysis of the three samples, one collected from each end of the tank and one from the middle, showed no detects for diesel range organics (DRO). There were no petroleum odors and no soil staining. The tank was in good overall condition with some rusting and pitting along the tank seams but no observable holes. According to BCCI personnel, the tank contained approximately 1,400 gallons of fuel, which was removed and placed into 25 fifty five gallon steel drums. There was no water in the tank.

After cleaning the tank, it was disposed at Samuels Recycling Company in Madison, Wisconsin. A copy of the UST disposal destination is attached in this report.

As of September 10, 2004, the 25 fifty five gallon barrels containing the fuel from the tank remain at the site awaiting disposal options. When the fuel is disposed, the documentation will be forwarded to DCOM as an addendum to this report.

Due to site location and land elevation, groundwater began seeping into the UST closure sample boreholes which were collected around two feet below the bottom of the tank. The groundwater appeared clean with no obvious signs of petroleum contamination. At the time of the assessment, the tank bed excavation was dry. After collecting the closure samples, the excavation was backfilled.

See select photographs attached in report.

Briefly describe the past and present property use(s):

Based on information provided by Art Voit, the concrete operations have been in the family business for over 50 years. The tank age is approximately 30 years.

The tank was located approximately 30 feet north of the northwest corner of the facility and was positioned alongside the toe of a steep embankment over 15 feet high (Figure 2).

Briefly describe the history of tank system leaks or repairs:

No known previous tank system leaks have been documented.

FIELD PROCEDURES

Tank Cleaning and Tank Waste Management

Inert/vent methods used? **Tank Vented and inerted using CO2.**

Explosimeter reading?
(An explosimeter reading of 10% or less of the lower flammable range (LEL) should be obtained before removing the tank from the ground.) **Yes as per DILHR Tank Closure Check List**

Contaminated Soils and Excavation Water:

How were contaminated soils managed? **na**

How was water within the excavation(s) managed? **na**

Field Screening:

Performed by: **Resource Engineering Associates, Inc.**

Briefly describe equipment and procedure used.
A flame ionization detector was used to measure soil volatile organic vapors. Soil samples were collected and placed in 8 ounce glass jars covered with foil. The samples were left standing about 15 minutes and then a reading was measured and recorded. See Table 1 for FID data collected.

SOIL SAMPLING

Soil sampling performed? **Yes**
Did obvious evidence of petroleum residues exist? **No**
If yes, briefly describe sampling equipment and methods used:

Soil samples were collected by hand using a hand auger. Each sample was collected from a designated location and depth.

Soil sampling performed by: **Sean Barry**
Certified Person and Certification no. **41945**

1.) Was soil sampled at points where strong odors or soil discolorations existed? **No odors or discoloration existed.**

2.) Was soil sampled in native soil one to 3 feet beneath the bottom of each end of each tank? **Yes**

3.) Was soil sampled in the native soil one to 3 feet beneath the surface underneath each island on the supply side of the tank? **na**

4.) Was soil sampled in native soil one to 3 feet beneath the surface every 20 feet, or segment thereof, along piping runs? **na**

If yes, were any soil samples collected at:
swing joint? **na**
flex connector? **na**
pipe elbow? **na**
fill pipe? **na**

If yes, what depth was the fill pipe sample collected? (up to 5 feet allowable): **na**

* See attached soil sampling Table of Results and Laboratory Analytical Report/COC **yes**

WATER SAMPLING
Was the water table found within the tank or piping? **Yes. The tank bed was dry, but after advancing hand augers beneath the tank for closure sample collection, groundwater began to seep into the boreholes. Closure soil samples collected represented soil near the smear or saturated zone.** If yes, were soil samples collected at the sidewalls of the excavation at: tank ends? **na** island supply side of the tank? **na** every 20 feet, or segment thereof, along piping runs? **na**
Was water removed from the excavation? **No** If yes, how much was removed and where was it disposed? **na**
Was the water laboratory evaluated? **na** What laboratory was used? **na**

SITE CLOSURE DOCUMENTATION
Was there obvious contamination? **No** Who at the Department of Natural Resources was notified? **NA** When was the notification given? **NA**
A copy of this report should be forwarded to the Wisconsin Department of Natural Resources (WDNR) at the following address: **WDNR - South Central District** **3911 Fish Hatchery Road** **Madison, WI 53711** **A copy of this report, along with the Tank Closure Report form, CHECKLIST FOR UNDERGROUND TANK CLOSURE SBD-8951 should be forwarded to the Wisconsin Department of Commerce (DCOM) to document removal procedures. Tank inventory forms SBD-7437 should be completed and forwarded to DCOM to register the tank as closed by removal. We understand that Inspector Peterson will be forwarding the SBD-8951 and SBD-7437s to DCOM. The address for DCOM is:** **DCOM** **Safety & Buildings Division** **Fire Prevention & UST Section** **P.O. Box 7838** **Madison, WI 53707-7838**

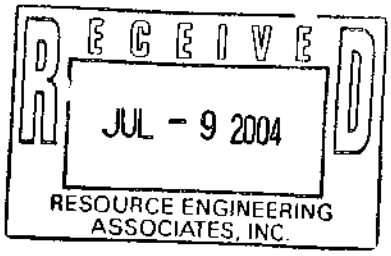
ANALYTICAL REPORT



Mr. Sean Barry
RESOURCE ENGINEERING
8505 University Green
Middleton, WI 53562

07/08/2004

Job No: 04.06474

The following samples were received by TestAmerica for analysis:

040043.1 Voit & Sons Tank Pull

Sample Number	Sample Description	Date Taken	Date Received
577511	S-1 @ 1.5' Below UST East End	06/29/2004	07/02/2004
577512	S-2 @ 1.5-2' Below UST Center	06/29/2004	07/02/2004
577513	S-3 @ 1.5-2' Below UST West End	06/29/2004	07/02/2004

Soil results reported
on a dry weight basis.

KEY TO DATA FLAGS

The attached sample(s) may have a result flag shown on the report. The following are the result flag definitions:

A = Analyzed/extracted past hold time
B = Blank is contaminated
C = Standard outside of control limits
D = Diluted for analysis
E = TCLP extraction outside of method required temperature range
F = Sample filtered in lab
G = Received past hold time
H = Late eluting hydrocarbons present
I = Improperly handled sample
J = Estimated concentration
L = Common lab solvent
M = Matrix interference
P = Improperly preserved sample
Q = Result confirmed via re-analysis
S = Sediment present
T = Does not match typical pattern
W = BOD re-set due to missed dilution
X = Unidentified compound(s) present
Z = Internal standard outside limits
* = See Case Narrative

KEY TO ANALYST INITIALS

The attached sample(s) may have been analyzed by another certified laboratory. If a number appears in the Analyst Initials field, the following are the appropriate certifications (if the lab code does not appear below, that means that certification is not required for the work performed):

Lab Code	Certification Number
008	WDNR - 999766900
009	WDNR - 241293690
020	WDNR - 999447680
030	ILNELAC - 100230; WDNR - 998294430
060	ILNELAC - 100221; WDNR - 999447130
070	IA - 007; ILNELAC - 000668; MDH - 019-999-319; WDNR - 999917270
130	WDNR - 632021390
147	WDNR - 721026460
300	FLNELAC - 87358; IA - 131; MDH - 047-999-345; WDNR - 998020430
400	WDNR - 113133790
510	WDNR - 241249360
520	WDNR - 999518190; ILNELAC - 100439
700	WDNR - 113289110

TestAmerica Watertown Certifications: WI DNR - 128053530; IL NELAC - 100453; IA DNR - 294; MN DoH - 055-999-366; ND DoH R-046; AR DEQ - 88-0808

Unless sub-contracted (see above), volatiles analyses (including VOC, PVOC, GRO, BTEX and TPH Gasoline) performed by TestAmerica Watertown at 1101 Industrial Drive, Units 9&10. All other analyses performed at 602 Commerce Drive, Watertown WI 53094.

Results reported between the Method Detection Limit (MDL) and Limit of Quantitation (LOQ) are less certain than results at or above the LOQ.

For questions regarding this report, please contact Dan Milewsky or Warren Topel.

TANK CLOSURE REPORT FORM SBD 8951
&
TANK INVENTORY FORM SBD-7437

Wisconsin Department of Industry, Labor and Human Relations

For Office Use Only:
Tank ID #

UNDERGROUND PETROLEUM PRODUCT TANK INVENTORY

Information Required By Sec. 102.142, Wis. Stats.

Send Completed Form To:
Safety & Buildings Division
P.O. Box 7969
Madison, WI 53707
Telephone: (608) 267-5280

Underground tanks in Wisconsin that have stored or currently store petroleum or regulated substances must be registered. Please see the reverse side for additional information on this program. An underground storage tank is defined as any tank with at least 10 percent of its total volume (included piping) located below ground level. A separate form is needed for each tank. Send each completed form to the agency designated in the top right corner. Have you previously registered this tank by submitting a form? ☐ YES ☐ NO If yes, are you correcting/updating information only? ☐ Yes ☐ No

The information you provide may be used by other government agency programs (Privacy Law, s. 15.04 (1) (m)). REMOVAL

This registration applies to a tank that is (check one):
1A. ☐ In Use or 1B. ☐ Newly Installed
2. ☐ Abandoned With Product
3. ☐ Abandoned No Product (empty) or With Water
4. ☒ Closed - Tank Removed
6. ☐ Closed - Filled With Inert Material
7. ☐ Out of Service - Provide Date: _____
8. ☐ Changed Ownership (Indicate new owner below)

Fire Department Providing Fire Coverage Where Tank Located: MADISON F/D.

A. IDENTIFICATION: (Please Print)

1. Tank Site Name: E.C. Voit TANK REMOVAL | Site Address: 3450 Milwaukee St | Site Telephone No.: 608-244-0771
☒ City ☐ Village ☐ Town of: MADISON | State: WI | Zip Code: 53714 | County: DANE

2. Owner Name (mail sent here unless indicated otherwise in #3 below): ART VOIT | Owner Mailing Address (mail sent here unless indicated otherwise in #3): 3450 Milwaukee ST
☒ City ☐ Village ☐ Town of: MADISON | State: WI | Zip Code: 53714 | County: DANE

3. Alternate Mailing Name If Different Than #2 | Alternate Mailing Street Address If Different From #2
☐ City ☐ Village ☐ Town of: | State | Zip Code | County

4. Tank Age (date installed, if known: or years old): 30 YRS + | 5. Tank Capacity (gallons): 7000 gal | 6. Tank Manufacturer's Name (if known): UNKNOWN

B. TYPE OF USER (check one):
1. ☐ Gas Station 2. ☐ Bulk Storage 3. ☐ Utility 4. ☒ Mercantile
5. ☐ Industrial 6. ☐ Government 7. ☐ School 8. ☐ Residential
9. ☐ Agricultural 10. ☐ Other (specify): _____

C. TANK CONSTRUCTION:
1. ☒ Bare Steel 2. ☐ Cathodically Protected and Coated Steel (A. ☐ Sacrificial Anodes or B. ☐ Impressed Current)
3. ☐ Coated Steel 4. ☐ Fiberglass 5. ☐ Other (specify): _____
6. ☐ Relined - Date _____ 7. ☐ Steel - Fiberglass Reinforced Plastic Composite 9. ☐ Unknown

Approval: 1. ☐ Nat'l Std. 2. ☐ UL 3. ☐ Other: UNKNOWN | Is Tank Double Walled? ☐ Yes ☒ No
Overfill Protection Provided? ☐ Yes ☒ No If yes, identify type: | Spill Containment? ☐ Yes ☒ No

Tank leak detection method: 1. ☐ Automatic tank gauging 2. ☐ Vapor monitoring 3. ☐ Groundwater monitoring 4. ☐ Inventory control and tightness testing 5. ☐ Interstitial monitoring 6. ☒ Not required by law at NONE 7. ☐ Manual Tank Gauging (only for tanks of 1,000 gallons or less)

D. PIPING CONSTRUCTION
1. ☒ Bare Steel 2. ☐ Cathodically Protected and Coated or Wrapped Steel (A. ☐ Sacrificial Anodes or B. ☐ Impressed Current) 3. ☐ Coated Steel
4. ☐ Fiberglass 5. ☐ Other (specify): _____ 9. ☐ Unknown

Piping System Type: 1. ☐ Pressurized piping with: A. ☐ auto shutoff; B. ☐ alarm; or C. ☐ flow restrictor 2. ☒ Suction piping with check valve at tank
3. ☐ Suction piping with check valve at pump and inspectable

Piping leak detection method: used if pressurized or check valve at tank: 1. ☐ Vapor monitoring 2. ☐ Interstitial monitoring
3. ☐ Groundwater monitoring 4. ☐ Tightness testing 5. ☐ Line Leak Detector 6. ☐ Not Required NONE

Approval: 1. ☐ Nat'l Std 2. ☐ UL 3. ☐ Other: UNKNOWN | Double Walled: ☐ Yes ☒ No

E. TANK CONTENTS
1. ☐ Diesel 2. ☐ Leaded 3. ☐ Unleaded 4. ☒ Fuel Oil
5. ☐ Gasohol 6. ☐ Other 7. ☐ Empty 8. ☐ Sand/Gravel/Slurry
9. ☐ Unknown 10. ☐ Premix 11. ☐ Waste Oil 12. ☐ Propane
13. ☐ Chemical * _____ _____ _____ 14. ☐ Kerosene 15. ☐ Aviation

* If # 13 is checked, indicate the chemical name(s) or number(s) of the chemical or waste.

If Tank Closed, Give Date (mo/day/yr): June 30 2004 | Has a site assessment been completed? (see reverse side for details) ☒ Yes ☐ No

If installation of a new tank is being reported, indicate who performed the installation inspection:
1. ☐ Fire Department 2. ☐ DILHR 3. ☐ Other (identify) _____

Name of Owner or Operator (please print): ART VOIT SR. | Indicate Whether: ☒ Owner or ☐ Operator

Signature of Owner or Operator: Arthur J. Voit | Date Signed: 06-30-2004

SBD-7437 (R. 05/94)

IMPORTANT: Complete as many items on this form as possible. Failure to provide sufficient information may cause you to fall under additional regulations.

Complete one form for each site closure.

The information you provide may be used for secondary purposes [Privacy Law, s.15.04 (1)(m)].

B. TEMPORARILY OUT OF SERVICE	Remover Verified	Inspector Verified	NA
Written inspector approval of temporary closure obtained, which is effective until (provide date) _____	☐ Y ☐ N	☐	☒
1. Product Removed			
a. Product lines drained into tank (or other container) and resulting liquid removed, AND	☐ Y ☐ N	☐	☒
b. All product removed to bottom of suction line, OR	☐ Y ☐ N	☐	☒
c. All product removed to within 1" of bottom.	☐ Y ☐ N	☐	☒
2. Fill pipe, gauge pipe, tank truck vapor recovery fittings, and vapor return lines capped.	☐ Y ☐ N	☐	☒
3. All product lines at the islands or pumps located elsewhere are removed and capped, OR	☐ Y ☐ N	☐	☒
4. Dispensers/pumps left in place but locked and power disconnected.	☐ Y ☐ N	☐	☒
5. Vent lines left open.	☐ Y ☐ N	☐	☒
6. Inventory form filed indicating temporary closure.	☐ Y ☐ N	☐	☒
C. CLOSURE BY REMOVAL			
1. Product from piping drained into tank (or other container).	☒ Y ☐ N	☐	☐
2. Piping disconnected from tank and removed.	☒ Y ☐ N	☐	☐
3. All liquid and residue removed from tank using explosion proof pumps or hand pumps.	☒ Y ☐ N	☐	☐
4. All pump motors and suction hoses bonded to tank or otherwise grounded.	☒ Y ☐ N	☐	☐
5. Fill pipes, gauge pipes, vapor recovery connections, submersible pumps and other fixtures removed. ..	☒ Y ☐ N	☐	☐
NOTE: DROP TUBE SHOULD NOT BE REMOVED IF THE TANK IS TO BE PURGED THROUGH THE USE OF AN EDUCTOR.			
6. Vent lines left connected until tanks purged.	☒ Y ☐ N	☐	☐
7. Tank openings temporarily plugged so vapors exit through vent.	☒ Y ☐ N	☐	☐
8. Tank atmosphere reduced to 10% of the lower flammable range (LEL) - see Section F.	☒ Y ☐ N	☐	☐
9. Tank removed from excavation after PURGING/INERTING; placed on level ground and blocked to prevent movement.	☒ Y ☐ N	☐	☐
10. Tank cleaned before being removed from site.	☒ Y ☐ N	☐	☐

- CONTINUE ON NEXT PAGE -

C. CLOSURE BY REMOVAL (continued)

	Remover Verified	Inspector Verified	NA
11. Tank labeled in 2" high letters after removal but before being moved from site.	☐Y ☐N	☐	☐
NOTE: COMPLETE TANK LABELING SHOULD INCLUDE WARNING AGAINST REUSE; FORMER CONTENTS; VAPOR STATE; VAPOR FREEING TREATMENT; DATE.			
12. Tank vent hole (1/8" in uppermost part of tank) installed prior to moving the tank from site.	☑Y ☐N	☐	☐
13. Form ERS-7437 or ERS-8731 filed by owner with the Dept. of Commerce indicating closure by removal.	☑Y ☐N	☐	☐
14. Site security is provided while the excavation is open.	☑Y ☐N	☐	☐

D. CLOSURE IN PLACE

NOTE: CLOSURES IN PLACE ARE ONLY ALLOWED WITH THE PRIOR WRITTEN APPROVAL OF THE DEPARTMENT OF COMMERCE OR LOCAL AGENT.

1. Product from piping drained into tank (or other container).	☐Y	☐N	☐	☑
2. Piping disconnected from tank and removed.	☐Y	☐N	☐	☑
3. All liquid and residue removed from tank using explosion proof pumps or hand pumps.	☐Y	☐N	☐	☑
4. All pump motors and suction hoses bonded to tank or otherwise grounded.	☐y	☐N	☐	☑
5. Fill pipes, gauge pipes, vapor recovery connections, submersible pumps and other fixtures removed.	☐Y	☐N	☐	☑
NOTE: DROP TUBE SHOULD NOT BE REMOVED IF THE TANK IS TO BE PURGED THROUGH THE USE OF AN EDUCTOR - EDUCTOR OUTPUT 12 FT. ABOVE GRADE.				
6. Vent lines left connected until tanks purged.	☐Y	☐N	☐	☑
7. Tank openings temporarily plugged so vapors exit through vent.	☐Y	☐N	☐	☑
8. Tank atmosphere reduced to 10% of the lower flammable range (LEL) see Section F.	☐Y	☐N	☐	☑
9. Tank properly cleaned to remove all sludge and residue.	☐Y	☐N	☐	☑
10. Solid inert material (sand, cyclone boiler slag, pea gravel recommended) introduced and tank filled.	☐Y	☐N	☐	☑
11. Vent line disconnected or removed.	☐Y	☐N	☐	☑
12. Inventory form filed by owner with the Department of Commerce indicating closure in place.	☐Y	☐N	☐	☑

E. CLOSURE ASSESSMENTS

NOTE: DETERMINE IF A CLOSURE ASSESSMENT IS REQUIRED BY REFERRING TO COMM 10.

1. Individual conducting the assessment has a closure assessment plan (written) which is used as the basis for their work on the site.	☑Y	☐N	☐	☐
2. Do points of obvious contamination exist?	☐Y	☑N	☑ SKB	☐
3. Are there strong odors in the soils?	☐Y	☑N	☑ SKB	☐
4. Was a field screening instrument used to pre-screen soil sample locations?	☐Y	☑N	☑ SKB	☐
5. Was a closure assessment omitted because of obvious contamination?	☐Y	☑N	☑ SKB	☐
6. Was the DNR notified of suspected or obvious contamination?	☐Y	☑N	☑ SKB	☑

Agency, office and person contacted: _____

7. Contamination suspected because of: ☐Odor ☐Soil Staining ☐Free Product ☐Sheen on Groundwater ☐Field Instrument Test

F. METHOD OF ACHIEVING 10% LEVEL DESCRIPTION

☐Eductor Or Diffused Air Blower
Eductor driven by compressed air, bonded and drop tube left in place; vapors discharged minimum of 12 feet above ground. Diffused air blower bonded and drop tube removed. Air pressure not exceeding 5 psig.

☐Dry Ice
Dry Ice introduced at 1.5 pounds per 100 gallons of tank capacity. Dry ice crushed and distributed over the greatest possible tank area. Dry ice evaporated before proceeding.

☑Inert Gas (CO/2 or N/2) NOTE: INERT GASSES PRODUCE AN OXYGEN DEFICIENT ATMOSPHERE. THE TANK MAY NOT BE ENTERED IN THIS STATE WITHOUT SPECIAL EQUIPMENT.
Gas introduced through a single opening at a point near the bottom of the tank at the end of the tank opposite the vent. Gas introduced under low pressure not to exceed 5 psig to reduce static electricity. Gas introducing device grounded.

☑Tank atmosphere monitored for flammable or combustible vapor levels.
Calibrate combustible gas indicator. Drop tube removed prior to checking atmosphere. Tank space monitored at bottom, middle and upper portion of tank. Readings of 10% or less of the lower flammable range (LEL) obtained before removing tank from ground.

Re: Customer ID: 41945
Examination for Site Assessor Certification

Congratulations, you have passed all examination requirements for the credential listed in the regarding line above.

To obtain this credential send a check for $50.00 and a copy of this letter to the address listed above. Make checks payable to Department of Commerce. The credential fee has been prorated to reflect a portion of the entire credential fee if the credential expires on a specific date. If the credential fee is not received by the department within three months of this notice, the department will require the applicant to submit a new application and retake the exam.

Upon receipt of the credential fee, the credential card will be mailed to you within 15 business days. If you need the credential immediately, please call the Environmental & Regulatory Services Division at 201 W. Washington Ave, Third Floor in Madison Wisconsin between the business hours of 7:45 a.m. and 4:30 p.m.

Please refer to your initial application or chapter Comm 5 for detailed information about renewal and/or continuing education requirements. A renewal notice will be mailed to the last address the department has on file for you, at least 30 days prior to your renewal date.

Please notify the Credential Analyst of changes in name, address and phone number to ensure proper delivery of future mail. Mailings sent from this office and not forwarded to a current address are not the responsibility of the department.

If you have any questions, please call (608) 266-7874.

NOTIFICATION TO UPGRADE TANK OR REMOVE

FAX TO: TARLETON INSPECION
920-855-2764

ILHR 10 Notification Record

Date: 06-21-04

Location of Installation/Closure:
Company/Owner Name: E. C VOIT
Company Contact Person: ART VOIT SR.
Address: 3450 Milwaukee St.
City/Town: MADISON
Telephone Number: 608-244-0777

Name of Contractor: BACHMANN CONST CO. INC.
Address: 1201 S. STOUGHTON RD
City/Town: MADISON
Telephone Number: 608-222-8869
FAX Number: 608-222-8618
On site Certified project supervisor: AL BACHMANN

Expected date to begin work: 06-29-04

Project will involve: Removal of 2000gal Fuel Oil TANK.

Inspection Summary:

- ☐ No violations noted.
- ☐ Violations are noted and corrections were made immediately.
- ☐ Discrepancies are noted and instructions for correction are provided.

Blooming Grove
7000 Gallon Boiler Tank
for Heating water

- ☒ Violations are noted and this is an Administrative Order requiring compliance. *Administrative Order # 72.72704

*This Department order is issued as a result of an inspection conducted for the items listed on this report. You are hereby ordered to have the listed violations corrected to conform to the indicated administrative codes or statutory requirements. These violations must be corrected by the compliance date indicated and the inspector who signed the report must be notified in writing of the corrective actions taken and to request a re-inspection. If you fail to comply, this order is enforceable in circuit court pursuant to s. 101.021(13), Stats., with forfeitures ranging from $10 to $100 per day for each violation. In addition, the Department may attach a notice of violation to the deed for the property on which the violations occur. Failure to comply with this order may result in the subject tank system Red-tagged for non-compliance and prohibited from being operated until the department has verified code compliance.

ISPC #	Code Section & Non-Compliance Items	Compliance Date
	Tank not brought to 1998 standards	
	-No overfill protection	
	-No spill protection	
	- No Leak detection since 1998	
	- No CP protection	
	Tank must be removed by June 30, 2004 or have	June 30, 04
	a WI certified Installer submit plans by June 30, 2004	
	to Dept. of Commerce to bring the system up to code	

Note:

Agency: 72

Notice of Appeal Rights: You may file a written request for a hearing to contest issuance of an Administrative Order, or any of its terms, with the Department within 15 calendar days after the date of an Administrative Order. All hearing requests shall be filed either by delivery to the office of the Division Administrator, Environmental and Regulatory Services Division, 201 W. Washington Avenue, Madison, Wisconsin, or by certified mail addressed to the Division Administrator, Environmental and Regulatory Services Division P.O. Box 14427, Madison, WI 53708-0427. If a hearing is requested, an Administrative Order shall not become effective until the administrative law judge has issued a decision affirming or modifying the order. This notice is provided pursuant to s. 227.48(2), Wis. Stats.

...ied in 2" high letters after removal but before being moved from site.	☐Y ☐N	☐	☐
NOTE: COMPLETE TANK LABELING SHOULD INCLUDE WARNING AGAINST REUSE; FORMER CONTENTS; VAPOR STATE; VAPOR FREEING TREATMENT; DATE.			
12. Tank vent hole (1/8" in uppermost part of tank) installed prior to moving the tank from site.	☒Y ☐N	☐	☐
13. Form ERS-7437 or ERS-8731 filed by owner with the Dept. of Commerce indicating closure by removal.	☒Y ☐N	☐	☐
14. Site security is provided while the excavation is open.	☒Y ☐N	☐	☐

D. CLOSURE IN PLACE

NOTE: CLOSURES IN PLACE ARE ONLY ALLOWED WITH THE PRIOR WRITTEN APPROVAL OF THE DEPARTMENT OF COMMERCE OR LOCAL AGENT.

1. Product from piping drained into tank (or other container).	☐Y ☐N	☐	☒
2. Piping disconnected from tank and removed.	☐Y ☐N	☐	☒
3. All liquid and residue removed from tank using explosion proof pumps or hand pumps.	☐Y ☐N	☐	☒
4. All pump motors and suction hoses bonded to tank or otherwise grounded.	☐y ☐N	☐	☒
5. Fill pipes, gauge pipes, vapor recovery connections, submersible pumps and other fixtures removed.	☐Y ☐N	☐	☒
NOTE: DROP TUBE SHOULD NOT BE REMOVED IF THE TANK IS TO BE PURGED THROUGH THE USE OF AN EDUCTOR - EDUCTOR OUTPUT 12 FT. ABOVE GRADE.			
6. Vent lines left connected until tanks purged.	☐Y ☐N	☐	☒
7. Tank openings temporarily plugged so vapors exit through vent.	☐Y ☐N	☐	☒
8. Tank atmosphere reduced to 10% of the lower flammable range (LEL) see Section F.	☐Y ☐N	☐	☒
9. Tank properly cleaned to remove all sludge and residue.	☐Y ☐N	☐	☒
10. Solid inert material (sand, cyclone boiler slag, pea gravel recommended) introduced and tank filled.	☐Y ☐N	☐	☒
11. Vent line disconnected or removed.	☐Y ☐N	☐	☒
12. Inventory form filed by owner with the Department of Commerce indicating closure in place.	☐Y ☐N	☐	☒

E. CLOSURE ASSESSMENTS

NOTE: DETERMINE IF A CLOSURE ASSESSMENT IS REQUIRED BY REFERRING TO COMM 10.

1. Individual conducting the assessment has a closure assessment plan (written) which is used as the basis for their work on the site.	☒Y ☐N	☐	☐
2. Do points of obvious contamination exist?	☐Y ☒N	☐ SKB	☐
3. Are there strong odors in the soils?	☐Y ☒N	☐ SKB	☐
4. Was a field screening instrument used to pre-screen soil sample locations?	☐Y ☒N	☐ SKB	☐
5. Was a closure assessment omitted because of obvious contamination?	☐Y ☒N	☐ SKB	☐
6. Was the DNR notified of suspected or obvious contamination?	☐Y ☒N	☐ SKB	☒
Agency, office and person contacted:			

7. Contamination suspected because of: ☐Odor ☐Soil Staining ☐Free Product ☐Sheen on Groundwater ☐Field Instrument Test

F. METHOD OF ACHIEVING 10% LEVEL DESCRIPTION

☐Eductor Or Diffused Air Blower
Eductor driven by compressed air, bonded and drop tube left in place; vapors discharged minimum of 12 feet above ground.
Diffused air blower bonded and drop tube removed. Air pressure not exceeding 5 psig.

☐Dry Ice
Dry Ice introduced at 1.5 pounds per 100 gallons of tank capacity. Dry Ice crushed and distributed over the greatest possible tank area.
Dry Ice evaporated before proceeding.

☒Inert Gas (CO/2 or N/2) NOTE: INERT GASSES PRODUCE AN OXYGEN DEFICIENT ATMOSPHERE. THE TANK MAY NOT BE ENTERED IN THIS STATE WITHOUT SPECIAL EQUIPMENT.
Gas introduced through a single opening at a point near the bottom of the tank at the end of the tank opposite the vent.
Gas introduced under low pressure not to exceed 5 psig to reduce static electricity. Gas introducing device grounded.

☒Tank atmosphere monitored for flammable or combustible vapor levels.
Calibrate combustible gas indicator. Drop tube removed prior to checking atmosphere. Tank space monitored at bottom, middle and upper portion of tank. Readings of 10% or less of the lower flammable range (LEL) obtained before removing tank from ground.

ACTIVITY DETAILS

CONTINUING OBLIGATIONS APPLY

Due to remaining contamination, continuing obligations apply to one or more properties. For information specific to the continuing obligations review the documentation below. Prior to constructing or reconstructing a water supply well, you need to contact DNR for approval of well construction specifications.

IMPACTED ANOTHER PROPERTY OR RIGHT-OF-WAY

A hazardous substance discharge originating from this property has impacted one or more other properties or right-of-ways (ROWS). For more information, please review the documents below. Certain exemptions regarding the cleanup of impacted properties under Wisconsin Stat. Section 292.13 may apply.

DOCUMENTS NEEDED:

Closure Letter, and any conditional closure letter or denial letter issued	X
Copy of most recent deed, including legal description, for all affected properties	X
Certified survey map or relevant portion of the recorded plat map *(if referenced in the legal description)* **for all affected properties**	X
County Parcel ID number, *if used for county*, **for all affected properties**	X
Location Map which outlines all properties within contaminated site boundaries on USGS topographic map or plat map in sufficient detail to permit the parcels to be located easily (8.5x14" if paper copy). If groundwater standards are exceeded, the map must also include the location of all municipal and potable wells within 1200' of the site	X
Detailed Site Map(s) for all affected properties, showing buildings, roads, property boundaries, contaminant sources, utility lines, monitoring wells and potable wells. (8.5x14", if paper copy). This map shall also show the location of all contaminated public streets, highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding ch. NR 140 ESs and soil contamination exceeding ch. NR 720 generic or SSRCLs.	X
Tables of Latest Groundwater Analytical Results (no shading or cross-hatching)	X
Tables of Latest Soil Analytical Results (no shading or cross-hatching)	X
Isoconcentration map(s), *If required for site investigation (SI)* (8.5x14" if paper copy). The isoconcentration map should have flow direction and extent of groundwater contamination defined. If not available, include the latest extent of contaminant plume map.	
GW: Table of water level elevations, with sampling dates, and free product noted if present	X
GW: Latest groundwater flow direction/monitoring well location map (should be 2 maps if maximum variation in flow direction is greater than 20 degrees)	X
SOIL: Latest horizontal extent of contamination exceeding generic or SSRCLs, with one contour	X

Madison, WI 53714

Subject: Final Case Closure for Seversin's Unocal 76 Service Station, 3401 Milwaukee Street, Madison

Dear Mr. Seversin:

On September 7-8, 2005, the South Central Region Closure Committee reviewed your request for closure of the case described above. The Closure Committee reviews environmental remediation cases for compliance with state rules and statutes to maintain consistency in the closure of these cases. On September 14, 2005, you were notified that the Closure Committee had granted conditional closure to this case.

On December 23, 2005, the Department received correspondence indicating that you have complied with the requirements of closure. Documentation was received for the proper abandonment of the monitoring wells, vapor extraction or investigation wells and recovery wells at the site in compliance with ch. NR 141, Wisconsin Administrative Code. Based on the correspondence and data provided, it appears that your case has been remediated to Department standards in accordance with s. NR 726.05, Wis. Adm. Code. The Department considers this case closed and no further investigation, remediation or other action is required at this time.

Residual soil contamination remains at eastern portions of the site as indicated in the information submitted to the Department of Natural Resources. If soil is excavated in the future, the property owner at the time of excavation will be required to sample and analyze the excavated soil to determine whether the contamination still remains. If contamination remains, all current and future owners and occupants of the property need to be aware that excavation of the contaminated soil may pose an inhalation or other direct contact hazard at the time of excavation. **Special precautions may need to be taken during excavation activities to prevent a direct contact health threat to humans.** Based upon the results of sample analysis, the current owner will also have to properly store, treat, or dispose of any excavated materials, in accordance with state and federal laws.

Your site will be listed on the DNR Remediation and Redevelopment GIS Registry of Closed Remediation Sites. Information that was submitted with your closure request application will be included on the GIS Registry. To review the sites on the GIS Registry web page, visit http://dnr.wi.gov/org/aw/rr/gisregdex.htm. If your property is listed on the GIS Registry and you intend to construct or reconstruct a well, you will need Department approval. Department approval is required before construction or reconstruction of a well on a property listed on the GIS Registry, in accordance with s. NR 812.09(4)(w). To obtain approval, Form 3300-254 needs to be completed and submitted to the DNR Drinking and Groundwater program's regional water supply specialist. This form can be obtained on-line http://www.dnr.state.wi.us/org/water/dwg/3300254.pdf or at the web address listed above for the GIS Registry.

Your site was closed with the requirement that a deed restriction for maintaining the impervious cap on the areas of contaminated soil be recorded at the county Register of Deeds office, and that maintenance of the impervious cap be conducted as described in the maintenance and inspection plan. The maintenance plan and inspection log

are to be kept up-to-date and on-site, and the inspection log need only be submitted to the Department upon request. A copy of the deed restriction can be found in the Department's regional files, or can be viewed on the GIS Registry for this site, at http://dnr.wi.gov/org/aw/rr/gis/index.htm.

Please be aware that this case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety or welfare, or the environment.

We appreciate your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at (608) 275-3297.

Sincerely,

Wendell Wojner
Hydrogeologist
Bureau for Remediation & Redevelopment

Mr. Ron Smith
Smith's Automotive Center
231 North Fair Oaks
Madison, WI 53714

SUBJECT: Closure Request, Smith Automotive Center, Madison, WI

Dear Mr. Smith:

On September 6, 1994, the above named site was reviewed by the Southern District Closure Committee. The information submitted by Advent Environmental Services, Inc., was reviewed. The removal of a 560 gallon waste oil tank resulted in the discovery of subsurface contamination. The file information showed that a series of soil borings were performed at different times at your site in order to determine the extent of contamination. The results of sampling showed that the contamination had been addressed according to Department guidelines.

Based on this information, it appears as though this site has been remediated to acceptable Department standards. Therefore, closure of this site has been granted and no further action is necessary at this time. You should be aware that, if in the future, the Department receives information which demonstrates that additional work is necessary, the Department has the authority to require further action.

You should note that this letter does not constitute Department "certification" under s. 144.765(2)(a) Stats., as created by 1993 Wisconsin Act 453 (May 12, 1994). Persons who meet the definition of "purchaser" in Section 144.765(1)(c) must receive Department preapproval prior to conducting a site investigation in order to be eligible for liability exemption under s. 144.765 Stats. The Department appreciates your efforts to protect and restore the environment at this site.

If you have any questions regarding this determination I may be contacted at the number shown below.

Sincerely,

Wendell J. Wojner
LUST Coordinator

CORRESPONDENCE/MEMORANDUM

State of Wisconsin

DATE: September 6, 1994 FILE REF: 1689

TO: Closure Committee

FROM: WJ Wojner

SUBJECT: Smith's Service Center

Removed a 560 gallon waste oil tank and found elevated TRPH on 10/26/92. Tried to determine background because neighboring property has history of using waste oil for cement from work. Sample collected on the adjacent property was higher than near tank. Collected 4 soil samples. Did not encounter groundwater. Claimed that the tank was in good shape and there was no evidence of staining or problem in the excavation. First samples documented a problem of contamination but used TRPH and Precision Analytical Lab, second sample was for DRO but still used PAL, third samples used right lab but question location.

Ms. Marilyn Janke
Wisconsin Department of Natural Resources
Southern District
3911 Fish Hatchery Road
Fitchburg, WI 53711

re: Site closure for the Smith's Service Center site, 231 North Fair Oaks, Madison, WI 53714-1641.
Advent Project No. No. 96850.01

Dear Ms. Janke:

This letter requests a site closure for the Smith's Service Center site. Through the first stage of the site investigation, a background sample from the adjacent property yielded a higher total recoverable petroleum hydrocarbon (TRPH) concentration than the tank bed samples. The following stages of the site investigation consisted of four borings that demonstrated that the contaminants in the tank bed were relatively localized. The contamination on the Smith's Service Center site is present at concentrations below the NR 720 guidelines.

On October 26, 1992, a 560-gallon waste oil underground storage tank (UST) was removed from the Smith's Service Center site. The tank and piping were in good condition and there were no indications of contamination at the site. Laboratory analyses of soil samples collected at the time of the tank pull detected elevated levels of TRPHs.

The elevated TRPH results prompted the Department of Natural Resources (DNR) to request a background TRPH sample. This sample was collected on the adjacent property and the result was higher than that of the closure samples. This data suggested that there may be an off-site influence impacting the site. The site history revealed that the neighboring property had been used for spraying waste oil on cement forms for many years.

Advent collected four additional soil samples and had them analyzed for diesel range organics (DROs) and one sample analyzed for petroleum volatile organic compounds (PVOCs). Three of the samples were collected by hand auger and a geo-probe unit obtained the fourth sample because subsurface conditions prevented hand augering.

The sampling location information and the analytical results are summarized in Table 1. Copies of all the laboratory data are attached. Figure 1 identifies the site features and the soil boring/soil sample locations. Site photographs, soil boring logs(WDNR Form 4400-122) and drillhole abandonment Forms (WDNR Form 3300-5W) are also attached. The soils encountered in the four additional borings consisted of sands within the tank bed area and clays surrounding the tank bed area. A sample could not be obtained from the southern edge of the tank bed due to subsurface obstructions. The contaminant levels present appear localized. With the DRO concentrations present within the soil types and the lack of PVOCs present, the levels of contamination do not appear significant.

No groundwater was encountered in any of the hand auger/geo-probe boreholes or in the tank bed excavation. The low levels of petroleum compounds detected in the soil suggest that groundwater has not likely been impacted.

The presence of petroleum contaminants at the Smith's Service Center site does not appear significant. The levels detected by laboratory analysis do not exceed the closeout guidelines described in NR 720. Advent recommends no additional investigative work and requests closure for the Smith's Service Center site.

If you have any questions or comments, please feel free to contact me directly at (414) 238-1874 ext. 3013.

Sincerely,

ADVENT ENVIRONMENTAL SERVICES, INC.

Madison , WI 53704

Subject: Phase II Assessment Report and Limited Liability Clarification for the Property located at 513 Jacobson Ave. (3651 Commercial Ave.)

Dear Mr. Nelson:

The Wisconsin Department of Natural Resources has reviewed the Phase II environmental assessment report submitted by BT Squared for the property at 5523 Jacobson Ave. The report was completed in May 2000 and submitted to the WDNR in June 2000 and July 2002.

The Phase II environmental report has been reviewed by a WDNR project manager and the South Central Region Closure Committee. The South Central Region Closure Committee reviewed the file for the site on July 24, 2002. The closure committee reviews closure requests and environmental assessments for consistency in application of environmental standards for properties requiring and/or requesting such review.

Portions of this property are wooded vacant land and have reportedly not ever been developed. A Sinclair gas station and/or lubrication warehouse was located on the northeast corner of the property in the 1950's. Two 1,000 gallon USTs that were associated with the station operation were reportedly removed in the 1960's. The western portion of the property was filled with concrete and asphalt from road construction activities in the 1950's. The parcel is bounded by railroad property to the east/northeast.

In April 2000, phase II site assessment work was conducted by BT Squared. Nine test pits were excavated and soil and groundwater samples were collected from the test pits. Soil at the site consists of silty sand and fill material. Groundwater was encountered at depths from 5-11 feet BGS. Soil samples were analyzed for gasoline range organics (GRO), diesel range organics (DRO), petroleum volatile organics (PVOCs); a few samples were analyzed for volatile organic compounds (VOCs) and polyaromatic compounds (PAHs).

There was no detection of PVOCs in soil samples collected from test pits located in the area of the former Sinclair Building TP1-7; no GRO or VOCs were detected in TP-3 and 5, indicating no identified petroleum contaminants in the area of the former Sinclair station.

Test Pits TP-8 and 9, located in the area of where a black sand was uncovered, detected DRO (250 ppm); napthalene (209 & 236 ppb) and 8 PAH compounds above the non-industrial guidance standards. The detected contaminates were found at depth of 3-7 feet BGS. A sample collected from test pit 9 at a depth of 10 ft BGS showed no detection of contaminants.

There was no detection of VOCs in the groundwater from samples collected from two of the test pits, TP-3 and TP-5.

The results of the Phase II investigation indicates that residual soil contamination remains in the test pits TP-8 and TP-9 at depths 3-7 feet below ground surface (BGS). The contaminants that remain are DRO and PAHs. A soil sample collected from a depth of 10 ft BGS at test pit TP-9 showed no detect for contaminants, indicating the residual soil contamination appears to be limited to an interval of 3-9 ft BGS.

The WDNR has determined that, based upon the information provided to the Department, no further action is necessary at the site. However, if the residual contamination is uncovered or removed in any way, the soil will need to be analyzed and disposed of as a sold waste.

Please be aware that this case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety or welfare, or the environment.

If you have any questions regarding this determination, please call me at the telephone number shown below.

Sincerely,

Dino Tsoris, P.G.

Environmental Engineering and Scien

LETTER OF TRANSMITTAL

TO:	Arnold and Company
	6417 Normandy Lane
	Madison, Wi 53719

DATE:	September 29, 2000	JOB # 1750
ATTENTION:	Bill Arnold	
RE:	HFHDC Commercial Avenue Property.	

WE ARE SENDING YOU:

QTY.	DATE	DESCRIPTION
5	9/25/00	Laboratory Analytical Data Summary Tables
2	9/27/00	Site Figures
14		Geoprobe boring logs

THESE ARE TRANSMITTED AS CHECKED BELOW:

___ For approval ___ As requested ____ For your file

_X_ For your use ___ For review and comment ____ For signature

Enclosed are updated tables and figures that include the additional results obtained since we submitted our original letter to WDNR. The results indicate that the majority of the property west of Stock Avenue is contaminated with polycyclic aromatic hydrocarbons (PAHs) at concentrations above Wisconsin Department of Natural Resources draft soil standards for non-industrial property at depths ranging from the ground surface to 7 feet below grade. Several of the detected PAHs were present at concentrations above industrial direct contact standards. If we wanted to remove all of the soil contamination within the property boundaries we would need to excavate and replace approximately 6,000 cubic yards, or 8,400 tons of contaminated soil. The cost of such a remediation project would likely exceed $300,000. We would also need to conduct a groundwater investigation to identify whether the PAHs in soil have impacted groundwater quality. Results from two groundwater samples collected from geoprobe borings suggest that some impact has occurred, although sediment in the samples may have affected the laboratory results.

Please feel free to call me at (608) 224-2830 if you have any questions regarding the enclosed results.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by SCS Engineers were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by SCS Engineers were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Re: **Phase 1 Environmental Site Assessment of the Commercial Property at Furey Avenue and Jacobson Avenue, Madison, Wisconsin**

Dear Mr. Gebhardt:

This letter is a report of my findings from the Phase 1 Environmental Site Assessment of commercial property located at the southeast corner of the intersection of Furey Avenue and Jacobson Avenue, Madison, Wisconsin (see Figure 1 and Appendix A). The purpose of the environmental site assessment was to research the history of the property and surrounding area to determine the likelihood of the property being contaminated from activities conducted on-site or in the immediately surrounding area.

Copies of selected photographs taken during a visit to the subject property and historic aerial photographs of the property are also included in this report.

EXECUTIVE SUMMARY

The subject property was visited on March 29, 1994. During the site visit, the on-site building was inspected for the presence of potential asbestos-containing materials (ACM) and hazardous materials and a walk of the property was conducted to identify any obvious items of potential environmental concern. Adjacent land uses were also noted and photographs were taken to document key observations. Documents showing the property's ownership history and plat maps of land that includes the subject property were acquired from the Dane County Register of Deeds Office and old Madison City Directories and Madison Telephone Directories were reviewed at the Main Public Library to identify former occupants at the property. A file on the property's assessment history was reviewed and a parcel map of the property and surrounding area was acquired at the City of Madison Assessor's Office and permits issued by the City of Madison for the property were reviewed at the City of Madison Planning and Development Department. Aerial photographs of the property from 1937, 1950, 1955, 1962, 1968, 1976, 1980, 1986 and 1990 were also acquired from the University of Wisconsin Geography Department Map Library and the City of Madison Engineer's Office and viewed for evidence of past property uses of potential environmental concern. Individuals questioned about the subject property's land use history included 1) Antonia Roth, an 85-year old lady who has lived at 601 Jacobson Avenue, across Furey Avenue from the subject property, for over 60 years, 2) Harold Bohne, Jr., a 40-year old man, who grew up in and now owns the duplex building at 506/508 Jacobson Avenue immediately west of the subject property, 3) Harold Bohne, Sr., a 63-year old man, who built the duplex building at 506/508 Jacobson Avenue and lived at 508 Jacobson Avenue immediately west of the subject property from 1959 until 1987, and 4) Ed Rodell, who has been operating a body shop in the building at the property since late 1990.

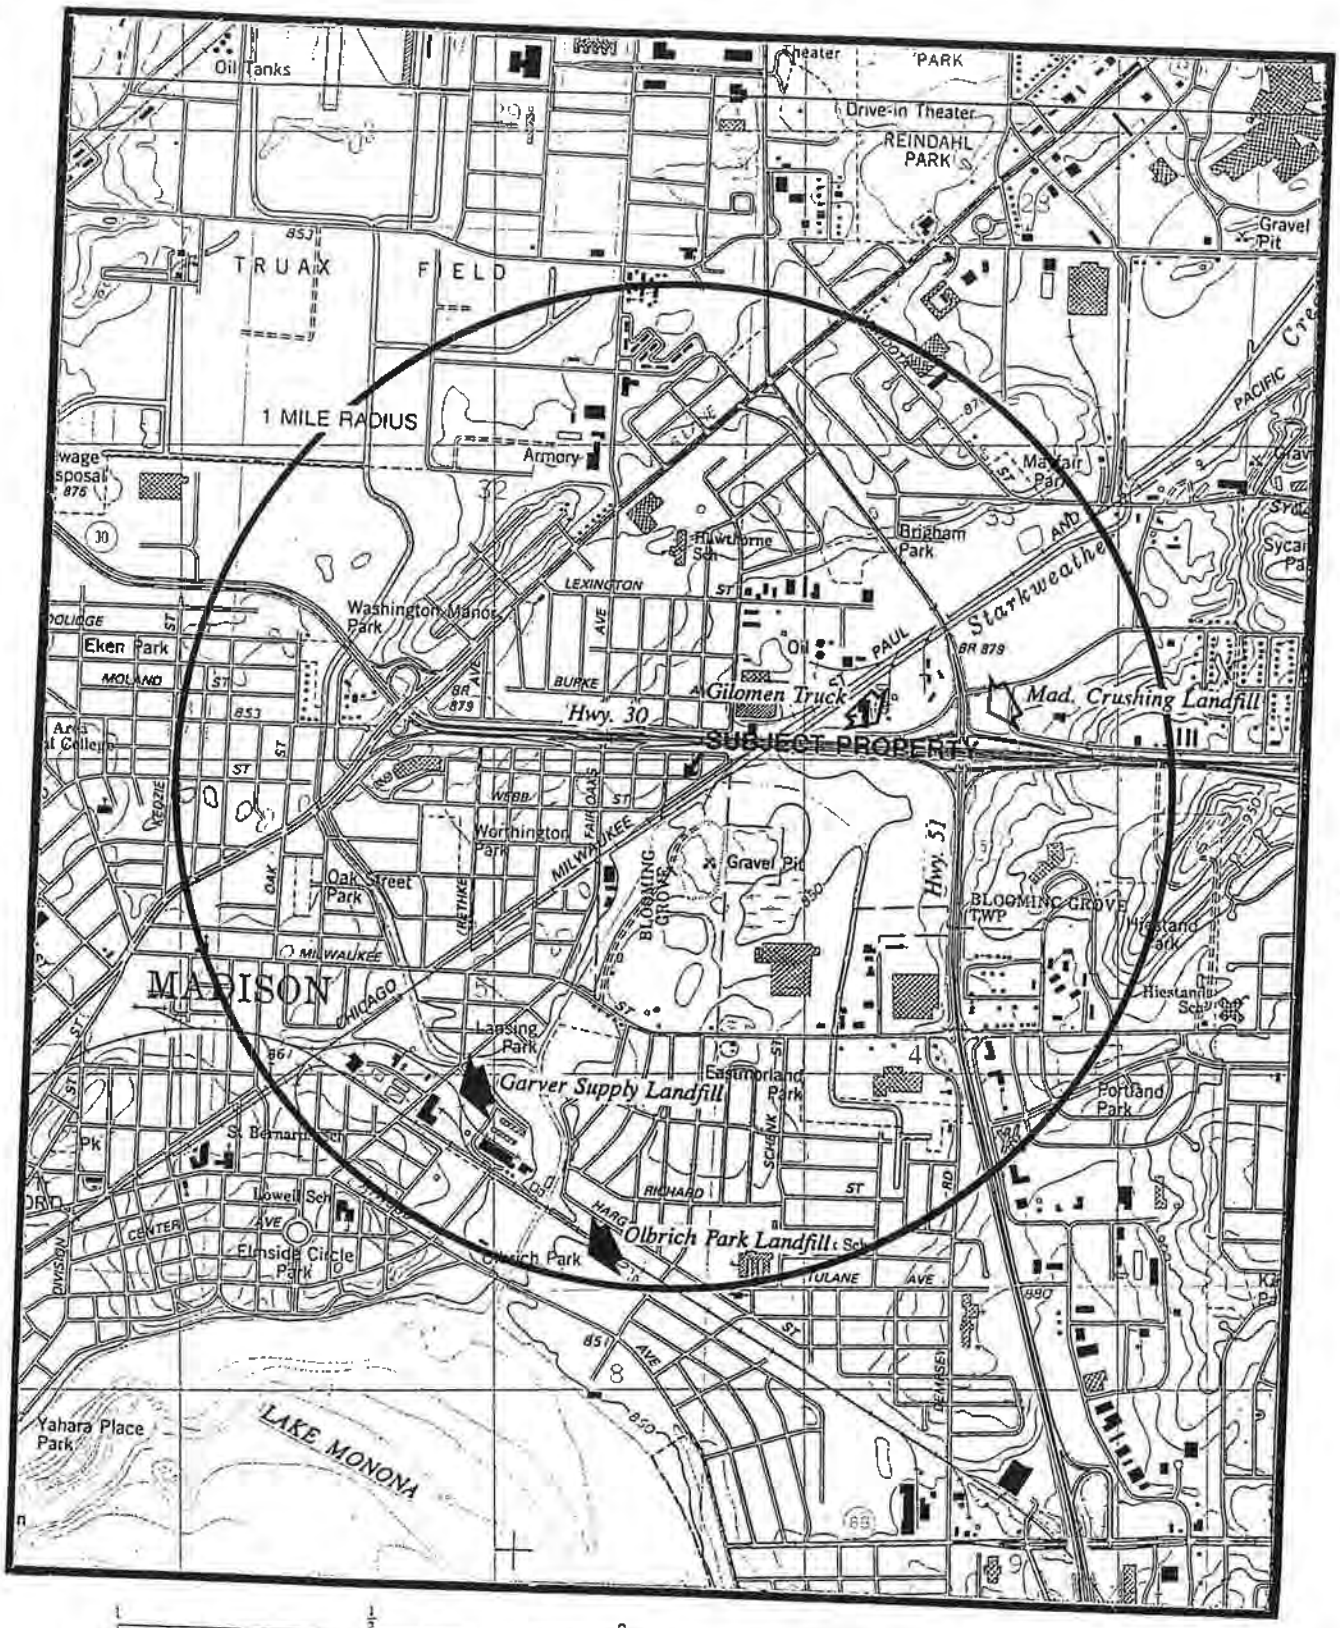

Figure 1
Site Location

Environmental agency information was reviewed to determine if there are any contaminated properties in the vicinity of the subject property that might represent an environmental threat to the property. Specifically, Wisconsin Department of Natural Resources (WDNR) and U.S. Environmental Protection Agency (USEPA) information on active and abandoned landfills, known contaminated sites, spills of hazardous substances and permitted hazardous waste facilities was reviewed. Inquiries were also made to 1) determine whether a Madison Gas and Electric Company (MG&E) pole-mounted electrical transformer at the property might contain polychlorinated biphenyls (PCBs), 2) learn whether the Wisconsin Department of Industry, Labor and Human Relations (WDILHR) has any record of underground petroleum storage tanks having ever been located at the subject property or at any adjacent properties, and 3) research whether the WDNR has a Well Constructor's Report for a former on-site private water supply well at the subject property.

From these research activities, it appears that prior to about 1960, the subject property was a marshy area and the ground level of the property was about six feet below the level of Jacobson Avenue. A small house was located at the northwest corner of the subject property from the early 1930's to about the mid-1940's. It is unknown how the house was heated but a longtime neighbor thought that it was probably heated by coal. The house also reportedly had a sand point (driven) well which is no longer evident at the property. During the early 1960's, a subsequent owner of the property reportedly filled it in with concrete and asphalt from old roads, curbing and sidewalks. Such material is typically inert and does not represent an environmental contamination concern for the property. The same owner that filled in the property reportedly constructed a foundation for a possible storage building in the early 1960's at the northwest corner of the property but no building was ever erected on the foundation. Construction of the foundation may have destroyed any evidence of the former sand point well that was probably once located at the northwest corner of the property.

The concrete block building at the east end of the property was constructed sometime between 1962 and 1965 and has reportedly been an unoccupied storage building for all of its life except for about six years when it was used as an automobile repair building and as an automobile body shop. An oil-burning furnace and above ground fuel oil storage tank were located in the basement of the building on a concrete floor until 1990 when the furnace was replaced with a gas furnace and the tank was removed. Because the building has primarily been an unoccupied storage building for most of its life, the former oil-burning furnace was probably not used very often and therefore, fuel oil was probably not delivered to the tank very often. The former site of the fuel oil tank fill pipe was covered over with about three feet of gravel and a layer of asphalt in 1992 when a new asphalt parking lot was installed along the west side of the building. The present tenant of the concrete block building, who has been operating an automobile body shop in the building since late 1990, reported that there was no visual evidence of any significant past spillage of fuel oil in the area of the former fuel oil fill pipe when he first occupied the property in late 1990. The present tenant of the concrete block building and a former tenant who leased the building for about 6 to 8 years during the 1980's both reported that, with the exception of the concrete and asphalt materials used to fill in the property, they never saw any evidence of intentional spillage or disposal of materials at the subject property. A tour of the building and interview of the tenant now operating an automobile body shop in the building did not identify any potential asbestos-containing materials in the building or any other items of potential environmental contamination concern. Litter including a few tires, beer cans, paper, plastic bags and piping from a neighborhood clothes line were observed at the property but none of the litter

items represent an environmental contamination concern to the property. No underground storage tanks have apparently been located at the subject property and the only above ground tank at the property was the former fuel oil tank on a concrete floor in the basement of the building. Lastly, a discussion with MG&E staff and a review of WDILHR, WDNR and USEPA information determined that there are no known environmental concerns associated with the property or any property in the vicinity of the subject property that is considered to be an environmental threat to the subject property. Based on these findings, **it is my professional opinion that no additional investigation into the property's environmental status is warranted.**

Below is a detailed discussion of the background and findings of this study.

BACKGROUND

Otto Gebhardt III currently owns the subject property and is now seeking a loan from McFarland State Bank to construct an office/apartment building at the property. As one of the conditions of the loan, McFarland State Bank indicated that a Phase 1 Environmental Site Assessment of the subject property must be completed to evaluate whether certain environmental liabilities might be associated with the subject property. Therefore, Midwest Environics, Inc. was retained to conduct the Phase 1 Environmental Site Assessment. The site visit to the property was conducted on March 29, 1994 by Dennis E. Strutz, Midwest Environics' Senior Environmental Specialist.

The subject property is Parcel 0710-051-0102-8 which includes Lots 425, 426, 427, 428 and 429 of the Clyde A. Gallagher Park Subdivision, Lot 522 of the First Addition to the Clyde A. Gallagher Park Subdivision, part of the vacated northwesterly half of Webb Avenue and the southerly half of vacated Furey Avenue, all being a part of the NE ¼ of the NE ¼ of Section 5, Township 7 North, Range 10 East in the City of Madison (see Appendix A; Note that the parcel map was corrected to include that part of the vacated south side of Furey Avenue which is part of the subject property).

Phase 1 Environmental Site Assessment activities included the following:

- Touring the building and walking the grounds of the property.
- Reviewing plat maps acquired from the Dane County Register of Deeds Office (608-266-4144) and a parcel map acquired from the City of Madison Assessor's Office (608-266-4531; see Appendix A).
- Reviewing the history of property ownership as described in documents (see Appendix B) acquired from the Dane County Register of Deeds Office (608-266-4144).
- Reviewing the City of Madison's assessment file for the subject property at the City of Madison Assessor's Office and copying information from the file (see Appendix C).
- Reviewing Madison City Directories from 1931 through 1992 at the main Madison Public Library to identify past occupants of the subject property,

reviewing Madison City Directories from 1943 through 1992 to identify any long-time neighbors and reviewing Madison Telephone Directories for 1965, 1966 and 1986 of previous businesses that leased the concrete building at the property (see Appendix D).

- Reviewing permits issued by the City of Madison for the subject property at the City of Madison Planning and Development Department (608-266-4551) and copying selected documents (see Appendix E).

- Discussing the property's land use history with

  — Antonia Roth (608-244-3935) of 601 Jacobson Avenue, Town of Blooming Grove, Dane County, Wisconsin, who has lived across Furey Avenue from the subject property for over 60 years,

  — Harold Bohne, Jr. (608-241-1622) of 508 Jacobson Avenue, Town of Blooming Grove, Dane County, Wisconsin, who has lived at his home across Jacobson Avenue from the subject property since 1959,

  — Harold Bohne, Sr. (608-249-6347) of 4052 Highway 19, DeForest, Wisconsin, who built the duplex at 506/508 Jacobson Avenue to the west of the subject property in 1959 and lived at 508 Jacobson Avenue from 1959 until 1987 when he sold the duplex building to his son, Harold Bohne, Jr., and

  — Ed Rodell (608-244-3199) who operates Rodell Auto, an automobile body shop at 3533 Furey Avenue, Madison, Wisconsin, in the concrete block building located on Lot 522 of the First Addition to the Clyde A. Gallagher Park Subdivision at the east end of the subject property.

- Reviewing historic aerial photographs of the property from 1937, 1950, 1955, 1962, 1968, 1976, 1980, 1986 and 1990 that were acquired from the University of Wisconsin Geography Department Map Library (608-262-1471), Madison, Wisconsin and the City of Madison Engineer's Office (608-266-4751). Copies of these aerial photographs are included in this report in Appendix F.

- Determining whether a pole-mounted electrical transformer at the property might contain PCBs in a discussion with Tim Freund (608-252-7321), Environmental Technologist with MG&E, the owner of the transformer.

- Reviewing the current WDILHR listing of registered underground storage tanks in Dane County, Wisconsin to determine whether WDILHR has any record of underground storage tanks having ever been located at the subject property or at any of the properties located adjacent to the subject property.

- Researching the availability of a Well Constructor's Report for a former on-site private water supply well with Phyllis Ziehr (608-275-3298), Water Supply Specialist with the WDNR Southern District Headquarters, Bureau of Water Supply, Fitchburg, Wisconsin.

- Reviewing the WDNR June, 1993 "Registry of Waste Disposal Sites in Wisconsin", the WDNR February 10, 1992 "Wisconsin Remedial Response Site Evaluation Report", a WDNR November 1990 "List of Superfund Sites in Wisconsin" [i.e. Wisconsin Sites on the National Priority List (NPL)] and the WDNR November 1990 list of "Wisconsin Sites Nominated to EPA for Inclusion on the NPL" for the proximity of landfills, other waste disposal sites and known contaminated properties relative to the subject property.

- Reviewing a December 1, 1992 "WDNR Spills Summary Report" that lists reported spills that occurred from January 1978 to August 31, 1992 to determine if any spills have been reported in the vicinity of the subject property. In addition, the WDNR's files of Toxic and Hazardous Spill Report Forms for spills reported for the remainder of 1992 through January 2, 1993 were reviewed at the WDNR Southern District Headquarters Office, Fitchburg, Wisconsin to determine if any spills have been reported in the vicinity of the subject property since the end of April, 1992.

- Reviewing a February 24, 1994 "WDNR Southern District Emergency and Remedial Response Program (ERRP) Case Tracking System List" and a February 24, 1994 "WDNR Southern District Leaking Underground Storage Tank (LUST) Case Tracking System Facility Listing" to determine if there are any listings of contaminated sites within about one-quarter of a mile of the subject property.

- Reviewing a June 28, 1993 USEPA listing of Resource Conservation and Recovery Act (RCRA) hazardous waste transporters and Treatment, Storage and Disposal (TSD) facilities in Wisconsin to determine if any permitted hazardous waste TSD facilities are located within one mile of the subject property.

No environmental sampling was conducted as part of this study.

FINDINGS

Location

1. The subject property (see Photos 1 - 6) has been assigned the street address 509 Jacobson Avenue and consists of about 0.84 acres at the southeast corner of Jacobson Avenue and Furey Avenue (see Figure 1 and Appendix A). One building is located at the far east end of the subject property and Rodell Auto, which is leasing the building from Otto Gebhardt III, uses the mailing address of 3533 Furey Avenue for the building (see Photos 5 and 6). Land to the west and north of the all but the eastern end of the subject property is in the Town of Blooming Grove while

land to the northeast, east and south of the property is in the City of Madison. West of the property (across Jacobson Avenue) is a duplex home at 506/508 Jacobson, a single family home at 520 Jacobson Avenue and a single family home at the southwest corner of Jacobson Avenue and Furey Avenue with the address 3513 Furey Avenue (see Photo 7). Northwest of the property at the northwest corner of Jacobson Avenue and Furey Avenue is a single family home at 3516 Furey Avenue (see Photo 8). North of the property (across Furey Avenue) is a duplex home at 601/603 Jacobson Avenue at the northeast corner of Jacobson Avenue and Furey Avenue (see Photos 9 and 10) and vacant land (north of the concrete building at the subject property; see Photo 11). East of the property is vacant land and railroad tracks (see Photo 12). The railroad tracks also parallel the entire southern side of the subject property (see Photo 13).

Property History

2. The following summary of the property's ownership history is based on a review of documents dating back to 1925 (see Appendix B) that were acquired from the Dane County Register of Deeds Office in Madison, Wisconsin:

1925 - August 5; Clyde A. Gallagher, Adolph H. Jacobson and Rose Jacobson had land in the NE ¼ of Section 5, Township 7 North, Range 10 East (which included Lots 425, 426, 427, 428 and 429 of the subject property) and land in the SE ¼ of Section 32, Township 8 North, Range 10 East surveyed and platted as the Clyde A. Gallagher Park Subdivision (see Appendix A).

1925 - November 16; Clyde A. Gallagher, Adolph H. Jacobson and Rose Jacobson had additional land in the NE ¼ of Section 5, Township 7 North, Range 10 East (which included Lot 522 of the subject property) and land in the SE ¼ of Section 32, Township 8 North, Range 10 East surveyed and platted as the First Addition to the Clyde A. Gallagher Park Subdivision (see Appendix A).

1928 - June 1; The Clyde A. Gallagher Corporation deeded Lot 522 of the First Addition to the Clyde A. Gallagher Park Subdivision to Ray M. Tierney.

1931 - June 9; Due to the non-payment of taxes, Lots 425, 426, 427, 428 and 429 of the Clyde A. Gallagher Park Subdivision were sold by the Treasurer of Dane County at public auction to William Judd.

1954 - May 24; William Judd and his wife, Ann Judd, deeded Lots 425, 426, 427, 428 and 429 of the Clyde A. Gallagher Park Subdivision in the Town of Blooming Grove to Raymond J. Smail and his wife, Buelah Jean Smail.

1956 - August 15; Raymond J. Smail and his wife, Buelah Jean Smail, deeded Lots 425, 426, 427, 428 and 429 of the Clyde A. Gallagher Park Subdivision in the Town of Blooming Grove to Richard J. Nelson and his wife, Kathryn C. Nelson.

1958 - May 7; Marie Boltz deeded Lot 522 of the First Addition to the Clyde A. Gallagher Park Subdivision to Richard J. Nelson. There was no copy of a

Final Judgment for the Estate of Raymond J. Tierney in the Register of Deeds Office but a notation on the May 7, 1958 deed states that, *"The grantor herein is the residuary devisee and legatee under the last will and testament of Raymond M. Tierney, also known as Ray M. Tierney, deceased."* The wording in the notation means that the last will and testament of Raymond M. Tierney had bequeathed Lot 522 to Marie Boltz. After Lot 522 was deeded to Richard J. Nelson, he owned all of the land that now comprises the subject property except for part of the vacated northwesterly half of Webb Avenue and the southerly half of vacated Furey Avenue.

1966 - November 18; Richard J. Nelson and his wife, Kathryn C. Nelson, deeded Lots 425, 426, 427, 428 and 429 of the Clyde A. Gallagher Park Subdivision, in the City of Madison; and Lot 522 of the First Addition to the Clyde A. Gallagher Park Subdivision, in the City of Madison, to the Milwaukee Land Company, an Iowa Corporation. Based on this document, it appears that land which included all of the platted lots of the subject property was annexed by the City of Madison sometime between the late 1950's and November, 1966.

1990 - May 31; The Milwaukee Land Company deeded the subject property to Otto Gebhardt III.

3. A review of the City of Madison's assessment file for the subject property determined the following (see Appendix C):

A. There is a one-story building on Lot 522 of the First Addition to the Clyde A. Gallagher Park Subdivision, at the far east end of the subject property. The building has concrete block exterior walls, a concrete floor, and a partial basement and contains about 1706 square feet on the first floor and about 256 square feet in the partial basement. There is no indication of when the building was constructed.

B. A May 19, 1980 letter from the Milwaukee Land Company to the Office of the Mayor of the City of Madison indicates that the Milwaukee Land Company was then the owner of three adjacent parcels of land which included the subject property. The letter states that, *"Through the years we have, on several occasions, attempted to have the various streets abutting these properties vacated so that the property could be unified and developed for commercial purposes. We feel that this is the only practical solution to the marketing of this property as we have not been successful on several different occasions in selling the properties either 'piecemeal' or all three parcels to one developer. Although we have had several interested parties in acquiring the property for commercial development, each has backed away primarily because of the problems associated with the street vacation."* The letter concluded with requesting that the City of Madison consider annexing parts of Webb Avenue along the south side of the subject property, Furey

Avenue along the north side of the property and all of Stock Avenue to the northeast of the subject property. The letter stated that if Madison annexed the requested streets, the Milwaukee Land Company would immediately petition the City of Madison for the vacation of the streets.

C. Notes in the file concerning the Milwaukee Land Company property state that, *"Trying to annex to city; streets in Town [Town of Blooming Grove]"*. There is another note that apparently refers to the concrete block building now located on Lot 522 of the First Addition to the Clyde A. Gallagher Park Subdivision. The note states that, *"Building used for storage. $115 - $130 per month. Owner pays taxes."* Therefore, it appears that in about 1980, the building at the subject property was used for storage only.

D. The City of Madison annexed the street areas and formally vacated the street areas in May, 1984.

E. Parcel 0710-051-0102-8 (i.e. the subject property; see Appendix A) was part of Parcel 0710-051-0101-0 which had all been owned by the Milwaukee Land Company until the subject property was sold it to Otto Gebhardt III on May 31, 1990. Former occupants of Lots 554, 555, 556 and 557 of the First Addition to the Clyde A. Gallagher Park Subdivision, which are located to the northeast of the subject property (see Appendix A), included a Sinclair Oil gas station which had two pumps and two 1,000-gallon underground storage tanks. File information indicates that the gas station equipment was gone by June 29, 1965, that one of the five gas station buildings was gone by June 29, 1965 and that the remaining four small gas station buildings that had been at the property were torn down by May 1, 1967. Notations on the property card also indicate that John Herheim & Sons, Inc. sold Lots 554, 555, 556 and 557 of the First Addition to the Clyde A. Gallagher Park Subdivision to the Milwaukee Land Company in 1966 and that John Herheim & Sons, Inc. were cement contractors.

F. File information indicates that the legal description of the subject property was in error when the Milwaukee Land Company deeded the property to Otto Gebhardt III. The error appears to be in the fact that the southerly half of Furey Avenue to the north of the northern property lines of Lots 425 and 429 of the Clyde A. Gallagher Park Subdivision was included in the legal description of the subject property even though that part of Furey Avenue had not been vacated.

4. The 1931 through 1992 Madison City Directories were reviewed at the main Madison Public Library to identify past occupants of the subject property and the 1943 through 1992 Madison City Directories were reviewed to identify any long-time neighbors. The listed property occupants were as follows: [Note that the list below includes only those years where one or more property occupants changed from the previous year listed.]

Year	Subject Property	3513 Furey Avenue	508 Jacobson Avenue	601 Jacobson Avenue
1931	William Judd (home listed for SE corner of Furey & Jacobson)	—	—	—
1943	No Longer Listed	Vacant	Not Listed	Olyn M. Roth
1946	Not Listed	Frank Evans	Not Listed	Olyn M. Roth
1950	Not Listed	Gerald J. Storms	Not Listed	Olyn M. Roth
1956	Not Listed	Jas. J. Korinek	Not Listed	Olyn M. Roth
1957	Not Listed	Dorel F. Gloyd	Not Listed	Olyn M. Roth & H.C. Bohne
1959	Not Listed	Dorel F. Gloyd	Under Construction	Olyn M. Roth & H.C. Bohne
1960	Not Listed	Dorel F. Gloyd	Harold C. Bohne (bldg. contractor)	Olyn M. Roth
1961	Not Listed	LaVerne Vike	Harold C. Bohne (bldg. contractor)	Olyn M. Roth
1967	Foley Equipment Co. (truck repair)	LaVerne Vike	Harold C. Bohne (bldg. contractor)	Olyn M. Roth
1968	Not Listed	LaVerne Vike	Harold C. Bohne (bldg. contractor)	Olyn M. Roth
1971	Not Listed	LaVerne Vike	Harold C. Bohne (bldg. contractor)	Mrs. Antonia Roth
1974	Not Listed	LaVerne Vike	B&R Builders and Harold C. Bohne	Mrs. Antonia Roth
1979	Not Listed	LaVerne Vike	Harold C. Bohne and Four Season Builders of Madison, Inc.	Mrs. Antonia Roth
1981	Not Listed	Arthur Bennett	Harold C. Bohne and Four Season Builders	Mrs. Antonia Roth
1983	Not Listed	Katherine Olson	Harold C. Bohne and Four Season Builders	Mrs. Antonia Roth
1984	Not Listed	Vacant	Harold C. Bohne and Four Season Builders	Mrs. Antonia Roth
1985	Not Listed	Rebecca Gloyd	Harold C. Bohne and Four Season Builders	Mrs. Antonia Roth
1986	Not Listed	Leon and Joyce Stolen	Harold and Mary Bohne	Mrs. Antonia Roth
1992	Rodell Auto (custom paint and body work)	Leon and Joyce Stolen	Harold and Mary Bohne	Mrs. Antonia Roth

In summary, the Madison City Directories indicate that William Judd had a house at the property during the 1930's, that Foley Equipment Company repaired trucks at the property during 1967 and that Rodell Auto has been operating a body shop at the property since at least 1992. The directories also indicate that Olyn M. Roth and his wife, Antonia Roth, lived at 601 Jacobson Avenue in 1943 and it appears that Mrs. Antonia Roth has lived across the street from the subject property continuously for

about the last 61 years. A person named Harold Bohne has also resided at 508 Jacobson Avenue, to the west of the subject property, since 1960.

The occupations of former owners of the subject property was also checked during the review of the Madison City Directories. While the occupations of all of the former owners were not listed, the following was learned about some of the former property owners:

A. William Judd, who owned Lots 425, 426, 427, 428 and 429 of the Clyde A. Gallagher Park Subdivision from 1931 until 1954, was listed as a fireman in 1931, as a laborer in 1935 and as an assistant engineer in 1937.

B. Raymond J. Smail, who owned Lots 425, 426, 427, 428 and 429 of the Clyde A. Gallagher Park Subdivision from 1954 until 1956, was listed as a city policeman in 1955 and 1956.

C. Raymond M. Tierney, who owned Lot 522 of the First Addition to the Clyde A. Gallagher Park Subdivision from 1928 until 1958, was listed as a mailman from 1933 through 1943.

The occupations of the above three former owners of parts of the subject property imply that they would not have utilized the property for a purpose that would represent a significant environmental contamination concern.

The Madison Telephone Directories for 1965, 1966 and 1986 were reviewed for listings of the two former businesses that leased the concrete block building at the property. Both the 1965 and 1966 telephone directories list the Foley Equipment Company as being located at 3533 Furey Avenue. Four Season Builders of Madison, Inc. is listed in the 1986 telephone directory as being located at 508 Jacobson Avenue, to the west of the subject property, at the home of Harold Bohne (see Appendix D).

5. A review of documents in the records of the City of Madison Planning and Development Department identified the following additional items of interest concerning the subject property (see Appendix E):

A. A May 5, 1987 Code Enforcement Worksheet indicates that a complaint was received that there were then four old cars near the concrete block building at the property. A notation on the worksheet reads, *"Leased to Four Season Bldrs., Inc.; sublet to Jeff Bailey - illegal tenant - they will evict."* A July 2, 1987 notation states that, *"Tenant will be out August 1 - eviction proceedings underway."*

B. A May 26, 1987 Official Notice directed the property owner, Milwaukee Land Company, to 1) *"Remove all unlicensed or inoperable motor vehicles. A junk yard, automotive salvage yard, or vehicle storage lot are not permitted uses in the C-2 and C-3 Zoning District."*, and 2) *"Obtain a Certificate of Occupancy before commencing any future use of the premises."*

C. In a June 19, 1987 letter, the Milwaukee Land Company directed Jeff Bailey to vacate the premises and to remove all equipment and vehicles which had been brought onto the property. Note that Madison Planning and Development Staff stated that the address of the property on this letter is wrong because there has never been a 3521 Furey Avenue.

D. A September 18, 1987 letter to the Milwaukee Land Company indicated that a reinspection of the property on August 25, 1987 revealed that, *"The premises and adjoining street were still occupied by numerous junk cars, unlicensed vehicles, auto parts, and junk."*

E. A January 2, 1992 Code Enforcement Worksheet indicates that a complaint had been received concerning the *"Old warehouse at easterly end of Furey Avenue"* and that an auto body business was operating in the building without the required Certificate of Occupancy. A January 16, 1992 Official Notice directed to the Milwaukee Land Company directed them to, *"Obtain a Certificate of Occupancy for an auto repair garage"* and also stated that a parking lot plan had to be submitted for the property.

F. Two January 30, 1992 letters from CMC Heartland Partners, Chicago, Illinois, indicate that 1) CMC Heartland Partners is the successor in interest to the Milwaukee Land Company, 2) Otto Gebhardt III purchased the subject property from the Milwaukee Land Company in May, 1990, and 3) a Quit Claim Deed issued on February 6, 1991 (to correct the May 30, 1990 Quit Claim Deed legal description of the subject property) had not been filed in the Register of Deeds Office.

G. Correspondence from March, 1992 indicates that Ed Rodell was then the tenant at the subject property.

H. A December 7, 1992 letter from William Foley stated that, *"I, William Foley, operated an auto repair business under the name Foley Equipment Company, at 3533 Furey Ave., Madison, WI. I was at that location from July 1965 through May 1967, which I leased from Richard Nelson."* [Note that because of a breakdown of City equipment, a photocopy of Mr. Foley's short letter is not included in Appendix E. Instead, a handwritten copy of it is included.]

I. A January 6, 1993 Heating Permit was issued to Rodell Auto for the concrete block building at 3533 Furey Avenue, Madison. A block on the form described the work being performed as a *"conversion from L.P."*

6. Mrs. Antonia Roth of 601 Jacobson Avenue, located across vacated Furey Avenue to the north of the subject property, was contacted concerning her knowledge of the subject property's history. Mrs. Roth explained that she is 85 years old and has lived in her home for over 60 years. When asked whether there had ever been a building at the Furey Avenue/Jacobson Avenue corner of the subject property, she stated that William Judd and his family lived in a small *"shacky"* type house there in the 1930's and the building was torn down sometime before 1950. Mrs. Roth said that William Judd was a beekeeper and had bee hives at the subject property. She

also said that Mr. Judd must have had a private drinking water well at the property because the area was not connected to City water when the Judd home was at the subject property. Mrs. Roth also said that she did not know how the Judd home was heated but coal was a strong possibility. In discussing the concrete block building on Lot 522 of the First Addition to the Clyde A. Gallagher Park Subdivision, she said that the only uses of the building that she knew of were 1) as the site of the Foley Equipment Company auto repair business in the mid-1960's, 2) as a storage building until the late 1980's, 3) as an auto repair business operated by Jeff Bailey for a few months in the late 1980's, and 4) as Rodell Auto which has been there the last few years. Mrs. Roth confirmed that Harold Bohne operated Four Season Builders and leased the concrete block building at the property in which he stored rugs, lumber and other building supplies for many years. She also stated that even though junked cars and auto parts were at the property a few years ago, she had never heard of any underground storage tanks or disposal of materials at the subject property.

7. Harold Bohne, Jr. of 508 Jacobson Avenue, located across Jacobson Avenue to the west of the subject property, was contacted to discuss his knowledge of the subject property. Mr. Bohne explained that he is 40 years old and has lived his entire life across the street from the subject property. He said that Mrs. Antonia Roth is his maternal grandmother and that he lived in her house from the time he was born in 1953 until 1959 when construction of his parent's home at 508 Jacobson Avenue was completed. Mr. Bohne added that he purchased his duplex home from his parents in 1987.

In discussing the subject property, Mr. Bohne stated that when he was a boy, there were piles of concrete debris at the property and area children used to climb on the piles. He said that his father, Harold Bohne, Sr., had told him that concrete and asphalt from old roads was brought to the subject property by John Herheim, an area contractor, and is now buried many feet deep over most of the property. When asked if he had ever heard of any disposal of any other materials at the property, any spills of materials there or any underground or above ground storage tanks at the property, Mr. Bohne stated that he had not. He also recalled that his father's business, Four Season Builders, used to lease the concrete block building at the subject property and that his father stored building materials and rugs in the building.

Mr. Bohne was also asked about a concrete foundation at the northwest corner of the subject property and an oval shaped outline of something at the southwest corner of the property in a 1980 aerial photograph of the property. He explained that the concrete foundation now at the northwest corner of the property never had a building on it but he did not know why the foundation was there. Mr. Bohne also explained that the oval shaped outline in the 1980 aerial photograph is from a time when his father used a Bobcat to pile up gravel and dirt at the southwest corner of the property to make an ice skating rink. He recalled that for a few years in the late 1970's until the early 1980's, his father would fill the oval shaped area with enough water to make a small ice skating rink where his mother taught children how to ice skate.

8. Harold Bohne, Sr. was also contacted to discuss his knowledge of the subject property. He explained that he is 63 years old and lived across Jacobson Street from

the subject property from the time his home at 508 Jacobson Avenue was constructed in 1959 until he moved to DeForest, Wisconsin, in 1987. Mr. Bohne said that his wife is a daughter of Mrs. Antonia Roth and grew up in the house at 601 Jacobson Avenue and that he was therefore familiar with the neighborhood even before he built his home at 508 Jacobson Avenue in 1959. Specifically, he remembered the small William Judd house at the northwest corner of the property and knew that the house had a sand point (driven) well and was torn down sometime before 1950. Like Mrs. Antonia Roth, Mr. Bohne also recalled that William Judd used to be a beekeeper and added that the Judd Family now owns the Honey Hill Bee Farm in Stoughton, Wisconsin.

Mr. Bohne stated that Richard Nelson (the person who owned Lots 425, 426, 427, 428 and 429 of the Clyde A. Gallagher Park Subdivision from 1956 to 1966 and Lot 522 of the First Addition to the Clyde A. Gallagher Park Subdivision from 1958 to 1966) was a contractor who sometimes worked for John Herheim & Sons, Inc. who were cement contractors. He noted that before Richard Nelson owned the subject property, it was a marshy area and the ground level was about six feet below the level of Jacobson Avenue. Mr. Bohne said that during the early 1960's, Mr. Nelson filled in the subject property with concrete and asphalt from old roads, curbing and sidewalks. He specifically remembered using a hack saw to cut off rebar which was sticking out of concrete at the property so that neighborhood children would not hurt themselves on the rebar. He also recalled the small gasoline station which John Herheim had at the corner of Stock Avenue and Commercial Avenue to the northeast of the property and said that he knew that the two underground gasoline tanks which had been at that property were removed by the Town of Blooming Grove in the early 1960's.

Mr. Bohne's leasing of the concrete block building at the subject property was also discussed. He stated that he leased the building for about 6 to 8 years in the 1980's and stored building materials such as wood and nails in the building. When asked about Jeff Bailey's use of the property in 1987, he said that Mr. Bailey operated a one-man automobile repair shop in the building for about six months. Mr. Bohne stated that he used to walk his dog past the property every day and would frequently stop in and chat with Mr. Bailey and knew from his frequent visits to the building that Mr. Bailey had a 55-gallon barrel in which he kept waste oil, transmission oil and brake fluid. He also said that he never saw any evidence of any disposal of any materials at the subject property by Mr. Bailey and had never heard of any underground storage tanks being located at the property.

9. During the March 29, 1994 site visit, Ed Rodell, the owner of Rodell Auto, was questioned about his knowledge of the property's history and past activities conducted by Rodell Auto at the property. Mr. Rodell described Rodell Auto as a small automobile body shop. In response to specific questions about the property and activities conducted by Rodell Auto at the property, Mr. Rodell stated the following:

A. Rodell Auto has been leasing the one-story concrete block building at the property since November, 1990. The first floor and a partial basement have a concrete floor and the ceiling of the building is drywall. The building is heated by natural gas and the building is serviced by city water and sewer services.

B. He thought the building was about 30 to 35 years old and had heard that for most of the years, the building was used as a storage warehouse only. He also knew that Foley Equipment Company repaired vehicles in the building for about two years in the 1960's and that Jeff Bailey repaired vehicles in the building for a few months in the late 1980's before he was evicted from the building. Leon Stolen, a neighbor who lived in the house at 3513 Furey Avenue to the west of the property until he passed away about two years ago, told him that no building had ever stood on the foundation that is located at the northwest corner of the subject property.

C. There have been no spills or disposal of materials at the property that Mr. Rodell is aware of. Litter items such as beer cans, old tires, and metal pipes have been found at the property and have probably been thrown on the vacant land by area residents. Mr. Rodell and his employees periodically collect the litter and dispose of it properly.

D. Until about 1990, an oil-burning furnace and above ground fuel oil storage tank were located on the concrete floor in the building's partial basement. The fill pipe for the fuel oil tank was located along the west side of the building over a former gravel parking area along that side of the building. The old furnace was removed and replaced with a gas furnace in late 1990 and propane was used to fuel the gas furnace until the building was connected to natural gas service in January, 1993.

E. When he first occupied the building, there was no visual evidence of spillage near the former fuel oil fill pipe along the west side of the building. In 1992, an asphalt parking lot was completed along the west side of the building and included an initial grading of the land, the application of about three feet of gravel to the area to raise the parking lot to the same level as the building and the application of asphalt over the top of the gravel.

F. When Mr. Rodell first occupied the building at the property, he did not see any areas of the property where vegetation was missing or where it appeared that the soil was stained from the past disposal of waste oil or other materials.

G. Rodell Auto is one of about six body shops that have a contract with the State of Wisconsin to repair damaged state vehicles. Because most of the work is paid for by insurance companies, only enough work to repair the covered damage is typically completed on a vehicle. Shop activities therefore include the repair or replacement of damaged vehicle parts, sanding and spray painting. He explained that about 95 percent of the repair work is body preparation work prior to painting to match the color of the vehicle.

H. Paint thinner solvent is used to thin the paint to the proper viscosity and to clean the paint spraying equipment after painting has been completed. In the last 3-½ years, Rodell Auto has generated less than 55 gallons of waste paint thinner which is kept in a 55-gallon barrel stored on concrete along the south side of the building.

I. No engine repair work, transmission repair work or other type of mechanical repair work is conducted on vehicles at the property. Rodell Auto has also never had a solvents parts washer at the property.

J. Old body parts are temporarily stored along the south side of the building until they can be shipped off-site for recycling or disposal.

K. He has never heard of any underground storage tanks being located at the property, and other than the fuel oil tank which was once in the basement of the concrete block building, has never heard of any above ground tanks being located at the property either.

10. Aerial photographs of the property from 1937, 1950, 1955, 1962, 1968, 1976, 1980, 1986 and 1990 were acquired from the University of Wisconsin Geography Department Map Library and the City of Madison Engineer's Office and viewed for evidence of past property uses of potential environmental concern. Each original aerial photograph was examined using a loupe that provided a ten-times magnification of the photographs and each aerial photograph was enlarged from 300 to 400 percent on a color laser copier.

A review of the nine aerial photographs (see Appendix E) reveals the following information.

A. A small square area at the northwest corner of the subject property in the 1937 aerial photograph is apparently the William Judd house that was located at the property from about the early 1930's until sometime in the 1940's. The former location of the house is also evident in the 1950 aerial photograph. The remainder of the subject property appears to be vacant land in both the 1937 and 1950 aerial photographs.

B. The 1955 aerial photograph shows the subject property at a time when it was reportedly a low area with no structures on it. One can also see the John Herheim & Sons, Inc. property at the east end of Commercial Avenue (to the northeast of the subject property). From the appearance of the Herheim property and because he was reportedly a cement contractor, it appears that Mr. Herheim may have deposited concrete and asphalt from old roads at his property. An active gravel pit can also be seen to the south of the subject property.

C. The 1962 aerial photograph shows the property during the time that Richard Nelson owned it. White areas at the property may be mounds of concrete and asphalt from old roads which Harold Bohne, Sr. reported were disposed at the subject property by Mr. Nelson. Railroad cars can also be seen on the railroad tracks to the south of the subject property in the 1962 aerial photograph.

D. The 1968 shows the concrete block building at the east end of the subject property. Like the 1962 aerial photograph, white areas to the southwest of the building at the property in the 1968 aerial photograph may be mounds of

concrete and asphalt. The 1976 aerial photograph shows the subject property after the mounds were apparently leveled out and covered with some soil which allowed the growth of vegetation.

E. The 1980, 1986 and 1990 aerial photographs show the subject property generally as they appear today. The oval area at the southwest corner of the subject property in the 1980 aerial photograph is the ice rink that Harold Bohne, Sr. reportedly made at the property in the late 1970's. The 1980, 1986 and 1990 aerial photographs also show two loading platforms along the railroad tracks and east of the subject property.

In summary, based on the above research concerning the property's history, it appears that

- from about the early 1930's until sometime in the 1940's, William Judd had a small house at the northwest corner of the property,
- the William Judd house reportedly had a sand point (driven well) and may have been heated by coal,
- during the early 1960's, Richard Nelson reportedly filled in low areas at the subject property with concrete and asphalt from old roads, concrete curbing and sidewalks,
- the concrete block building at the east end of the subject property was constructed sometime between 1962 and 1965,
- from July 1965 through May 1967, William Foley operated the Foley Equipment Company, an automobile repair business, in the concrete block building at the east end of the subject property,
- for about 6 to 8 years during the 1980's, Four Season Builders of Madison, Inc., owned by Harold Bohne, Sr., leased the concrete block building and stored building materials in it,
- for about six months during 1987, Mr. Bohne sublet the concrete building to Jeff Bailey who operated a one-man automobile repair business in the building until he was evicted from the building in about September 1987,
- according to Harold Bohne, Sr., Jeff Bailey collected waste oil, transmission fluid and brake fluid in a 55-gallon barrel in the building at the property,
- the concrete block building was once heated by an oil furnace and the furnace and an above ground fuel oil tank were located on a concrete floor in the building's partial basement until late 1990 when a gas furnace was installed in the building,
- the concrete building was an unoccupied storage building for all but about six years since it was constructed in the early 1960's and it is likely that the old oil-burning furnace was operated only during the times that the building was occupied,
- propane was used to operate the gas furnace in the building until January, 1993 when the building was connected to natural gas service,
- the fill pipe for the former above ground fuel oil tank (which was located in the basement of the building) was located along the west side of the building and there was reportedly no visual evidence of significant past spillage of fuel oil near the pipe,
- construction of an asphalt parking lot in 1992 along the west side of the building caused such disturbance of the area under the former fuel oil tank

fill pipe that any affected soil from any past spills of fuel oil would have been spread out over the parking area,

- other than some litter at the property, there has reportedly been no known spills or disposal of materials at the subject property, and
- there have reportedly been no underground storage tanks at the subject property and the only above ground storage tank that has been at the property was the former fuel oil tank in the basement of the concrete block building.

Observations and Discussions

11. During the March 29, 1994 visit to the subject property, a tour of the building and a walk of the property resulted in the following additional observations:

A. Vehicle body work is done on the concrete floor of the building (see Photo 14). At the time of the site visit, four cars were in the building.

B. Paint colors are mixed and thinned with paint thinner on a workbench at the northeast corner of the building (see Photo 15).

C. Two compressors which operate the paint guns are located in the building's partial basement on a concrete floor (see Photo 16).

D. The natural gas furnace is located along the west wall on the first floor of the building (see Photo 17).

E. The former above ground fuel oil tank was located in a small area under the stairs on a concrete floor in the building's partial basement (see Photo 18). There was no evidence of leakage of fuel oil on the floor from the former tank.

F. The empty former 250-gallon above ground fuel oil tank is still at the property a short distance southwest of the southwest corner of the building (see Photo 19). With the exception of a small amount of surface rust, the tank appeared to be in good physical condition.

G. A small plastic container on concrete near the rear door of the building reportedly contains some waste motor oil from Rodell Auto staff who have changed the oil in their cars inside the building (see Photo 20). There was no evidence of leakage or spillage of waste oil near the plastic container.

H. The 55-gallon barrel for waste paint thinner is also located on concrete near the rear door of the building (see Photo 21). There was no evidence of leakage or spillage near the 55-gallon barrel.

I. Old vehicle body parts, bumpers and empty 5-gallon paint and paint thinner cans are stored along the south side of the building (see Photo 22).

J. A concrete foundation is located near the northwest corner of the subject property (see Photo 23). From conversations with longtime neighbors, no building was ever reportedly constructed on the foundation.

K. Litter observed at the property included a few tires, beer cans, paper, plastic bags and piping from a neighborhood clothes line. None of the litter items represent an environmental contamination concern to the property.

L. A check of the property was conducted for evidence of fill or vent pipes that might indicate the presence of underground storage tanks and no such evidence was observed. In addition, there was no evidence of any private water supply wells at the subject property.

M. An MG&E pole-mounted electrical transformer was observed on Pole Number 26Y3-F1 along the west side of the subject property (see Photo 24). There was no evidence of leakage from the pole-mounted transformer and there were no pad-mounted electrical transformers at the subject property.

In summary, the only item of potential environmental concern observed during the March 29, 1994 site visit was one possible PCB-containing MG&E pole-mounted electrical transformer.

12. Tim Freund, Environmental Technologist with MG&E, was contacted to determine whether the pole-mounted electrical transformer on Pole Number 26Y3-F1 along the west side of the subject property might contain PCBs. According to Mr. Freund, the manufacture of electrical transformers containing PCBs was not allowed after February, 1978. The USEPA Toxic Substances Control Act regulations define transformers that contain less than 50 parts-per-million (PPM) PCBs as non-PCB transformers and transformers that contain from 50 to 500 PPM PCBs as PCB-Contaminated. He stated that it is MG&E policy to classify all oil-filled electrical equipment that was purchased before 1979 and which have not been tested, as PCB-Contaminated. After checking their records, Mr. Freund reported that the pole-mounted transformer at the subject property is a 15 kilovolt-ampere (KVA) unit that MG&E purchased in 1955 and the transformer has not been tested for PCBs. He further stated that if a customer wishes to determine whether a transformer at their property contains PCBs, MG&E will test the transformer for a charge of $50. If the analysis confirms that the transformer contains greater than 500 PPM PCBs, MG&E will reimburse the $50 charge and replace the transformer with a non-PCB unit. While testing would confirm the concentration, if any, of PCBs in the pole-mounted transformer along the west side of the subject property, no evidence of leakage from the unit was observed during the March 29, 1994 site visit.

13. A review of the current WDILHR listing of registered underground storage tanks in Dane County, Wisconsin determined that WDILHR has no record of underground storage tanks having ever been located at the subject property or at any of the properties adjacent to the subject property.

14. Phyllis Ziehr, Water Supply Specialist with the WDNR Bureau of Water Supply, Madison, Wisconsin, was contacted concerning a Well Constructor's Report for the sand-point water supply well that William Judd reportedly had at the subject property. According to Ms. Ziehr, submittal of Well Constructor's Reports has been required since 1936 for all private and municipal water wells. After reviewing the WDNR's records, Ms. Ziehr reported that no Well Constructor's Report exists for the subject property. This was not surprising since it appears that the William

Judd house existed at the property in 1931 and therefore, the was was probably installed years before 1936.

Review of WDNR and USEPA Information

15. A review of the WDNR June, 1993 "Registry of Waste Disposal Sites in Wisconsin" determined that there are four inactive sites located within one mile of the subject property (see Figure 1). The four sites include 1) the closed City of Madison Olbrich Park Landfill in the SE ¼ of Section 5, Township 7 North, Range 10 East, located about nine-tenths of a mile south of the subject property, 2) the closed Garver Supply Landfill in the NW ¼ of the SE ¼ of Section 5, Township 7 North, Range 10 East, located about seven-tenths of a mile southwest of the property, 3) the closed Madison Crushing and Excavating Site in the SW ¼ of the SE ¼ of Section 33, Township 8 North, Range 10 East, located about six-tenths of a mile northeast of the property, and 4) the Gilomen Truck and Equipment Site in the SE ¼ of the SW ¼ of Section 33, Township 8 North, Range 10 East, located about four-tenths of a mile northeast of the property.

    Undifferentiated wastes were disposed at the City of Madison Olbrich Park Landfill from 1946 to 1951. The years of operation of the Garver Supply Landfill are unknown but it is known that only construction and demolition debris were disposed at the site. Demolition debris only was disposed at the Madison Crushing and Excavating Site which has been closed since 1984 and refuse salvage wastes were disposed at the Gilomen Truck and Equipment Landfill which has been closed since 1972. No ground water contamination problems have been detected at any of the old, closed disposal sites. In summary, based on 1) the distance separating the four closed disposal sites from the subject property, 2) the fact that demolition debris is typically inert waste that does not cause environmental contamination, and 3) the fact that no ground water contamination has been detected at the four old waste disposal sites, the sites are not considered to be a reasonable environmental threat to the subject property. In addition, none of the four waste disposal sites are listed in the WDNR February 10, 1992 "Wisconsin Remedial Response Site Evaluation Report" which *"presents a compilation of sites or facilities which cause, or have the potential to cause, some type of environmental pollution."* A review of the WDNR November 1990 "List of Superfund Sites in Wisconsin" [i.e. Wisconsin Sites on the National Priority List (NPL)] and the WDNR November 1990 list of "Wisconsin Sites Nominated to EPA for Inclusion on the NPL" determined that there are no such sites listed within a one mile radius of the subject property.

16. A review of the December 1, 1992 "WDNR Spills Summary Report" that lists reported spills that occurred from January 1978 to August 31, 1992 identified no spill sites in the vicinity of the subject property. In addition, a review of the WDNR's Toxic and Hazardous Spill Report Forms for spills reported for the remainder of 1992 through January 2, 1993 at the WDNR Southern District Headquarters Office, Fitchburg, Wisconsin, did not identify any additional reported spills in the vicinity of the subject property since the end of August, 1992.

17. A review of a February 24, 1994 "WDNR Southern District Emergency and Remedial Response Program (ERRP) Case Tracking System List" and a February 24, 1994 "WDNR Southern District Leaking Underground Storage Tank (LUST)

Case Tracking System Facility Listing" did not identify any listed sites within about one-quarter of a mile of the subject property where environmental contamination has been detected.

18. A review of a June 28, 1993 USEPA listing of Resource Conservation and Recovery Act (RCRA) hazardous waste transporters and Treatment, Storage and Disposal (TSD) facilities in Wisconsin determined that there are no permitted hazardous waste TSD facilities located within one mile of the subject property.

CONCLUSIONS

From these research activities, it appears that prior to about 1960, the subject property was a marshy area and the ground level of the property was about six feet below the level of Jacobson Avenue. A small house was located at the northwest corner of the subject property from the early 1930's to about the mid-1940's. It is unknown how the house was heated but a longtime neighbor thought that it was probably heated by coal. The house also reportedly had a sand point (driven) well which is no longer evident at the property. During the early 1960's, a subsequent owner of the property reportedly filled it in with concrete and asphalt from old roads, curbing and sidewalks. Such material is typically inert and does not represent an environmental contamination concern for the property. The same owner that filled in the property reportedly constructed a foundation for a possible storage building in the early 1960's at the northwest corner of the property but no building was ever erected on the foundation. Construction of the foundation may have destroyed any evidence of the former sand point well that was probably once located at the northwest corner of the property.

The concrete block building at the east end of the property was constructed sometime between 1962 and 1965 and has reportedly been an unoccupied storage building for all of its life except for about six years when it was used as an automobile repair building and as an automobile body shop. An oil-burning furnace and above ground fuel oil storage tank were located in the basement of the building on a concrete floor until 1990 when the furnace was replaced with a gas furnace and the tank was removed. Because the building has primarily been an unoccupied storage building for most of its life, the former oil-burning furnace was probably not used very often and therefore, fuel oil was probably not delivered to the tank very often. The former site of the fuel oil tank fill pipe was covered over with about three feet of gravel and a layer of asphalt in 1992 when a new asphalt parking lot was installed along the west side of the building. The present tenant of the concrete block building, who has been operating an automobile body shop in the building since late 1990, reported that there was no visual evidence of any significant past spillage of fuel oil in the area of the former fuel oil fill pipe when he first occupied the property in late 1990. The present tenant of the concrete block buildings and a former tenant who leased the building for about 6 to 8 years during the 1980's both reported that, with the exception of the concrete and asphalt materials used to fill in the property, they never saw any evidence of intentional spillage or disposal of materials at the subject property. A tour of the building and interview of the tenant now operating an automobile body shop in the building did not identify any potential asbestos-containing materials in the building or any other items of potential environmental contamination concern. Litter including a few tires, beer cans, paper, plastic bags and piping from a neighborhood clothes line were observed at the property but none of the litter items represent an environmental contamination concern to the property. No underground

storage tanks have apparently been located at the subject property and the only above ground tank at the property was the former fuel oil tank on a concrete floor in the basement of the building. Lastly, a discussion with MG&E staff and a review of WDILHR, WDNR and USEPA information determined that there are no known environmental concerns associated with the property or any property in the vicinity of the subject property that is considered to be an environmental threat to the subject property. Based on these findings, **it is my professional opinion that no additional investigation into the property's environmental status is warranted.**

Please call me if you have any questions concerning this letter report.

Sincerely,

MIDWEST ENVIRONICS, INC.

Resumes of Project Team

JACLYN RENNEBOHM

Education

B.S., Geology, University of Wisconsin – Madison, 2015

Specialty Certifications

Nuclear Density Testing
HAZWOPER 40-Hour Certification
MSHA 30 CFR Part 46 Certification
Tank-System Site Assessor Certification

Professional Experience

Ms. Rennebohm is a recent graduate of the University of Wisconsin – Madison and has been working in the geological industry for 4 years. Her areas of expertise include soil, groundwater, and vapor investigation and remediation; Phase 1 Environmental Site Assessments (ESAs); brownfield redevelopment; solid waste landfill monitoring; construction oversight; and emergency spill response. Ms. Rennebohm is experienced in Phase 1 and Phase 2 ESAs, materials management oversight and planning, and soil and groundwater sampling. She has worked with local government agencies, private entities and developers, and solid waste facilities in Wisconsin, Iowa, and Illinois.

Brownfield Redevelopment

Madison, Wisconsin, Community-Wide Site Assessment. Performed field oversight, sampling, and report preparation for several sites under a $400,000 USEPA brownfield site assessment grant.

Jefferson County, Wisconsin, County-Wide Site Assessment. Performed field oversight and sampling and co-authored successful WDNR closure request for site under a $200,000 USEPA brownfield site assessment grant.

Madison, Wisconsin, 704 Williamson Street. Assisted with workplan preparation, performed soil and groundwater sampling, assisted in preparation of material management plan, provided oversight during remedial soil excavation, and co-authored successful WDNR closure request for a former printing facility that has now been successfully redeveloped for residential and commercial use.

Madison, Wisconsin, Garver Feed Mill. Performed soil and groundwater sampling for material management planning at the Garver Feed Mill site.

Madison, Wisconsin, 131 S Fair Oaks Ave. Performed a Phase 2 ESA and oversight during remedial soil excavation on a former petroleum leaking underground storage tank site that has been successfully redeveloped for residential and commercial use.

Madison, Various Sites. Performed Phase 1 ESAs, Phase 2 ESAs, remedial excavation oversight, and co-authored successful WDNR site closure requests at numerous sites with historic urban fill, petroleum, chlorinated solvent, per- and polyflouroalkyl substances (PFAS), and/or other hazardous materials contamination in the City of Madison, Dane County, and various other sites throughout Wisconsin.

Solid Waste Services

Dane County Landfills (Truax, Verona, and Rodefeld). Performed field work associated with groundwater sampling events to satisfy state permit programs. Co-author quarterly monitoring reports submitted to the WDNR's Groundwater and Environmental Monitoring System (GEMS) database.

Wisconsin and Iowa, Multiple Sites. Coordinated and performed fieldwork associated with monitoring well installation, monitoring well abandonment, and groundwater sampling at several coal combustion residual landfills and impoundments. Work performed was to satisfy state permit programs and the federal CCR Rule. Assist in preparation of semiannual and annual groundwater quality reports.

Emergency Spill Response

Aided in the cleanup and reporting of hazardous substance spills throughout Wisconsin. Performed soil sampling and analysis, excavation oversight, and waste profiling services on sites needing additional work in order to comply with regulatory statues.

Publications and Presentations

DeBruyne, J. and Stewart, E., The Sedimentologic and Petrologic Characterization of the Waterloo Quartzite, Dodge County, WI, Wisconsin Geological and Natural History Survey, Madison, WI, May 2015.

Stewart, E., DeBruyne, J., Zambito IV, J., McLaughlin, P., and Dehler, C., New Detrital Zircon Age Data From Baraboo Interval Quartzites, Southern Wisconsin, GSA North-Central Section – 49th Annual Meeting, Madison, WI, May 2015.

TONY J. KOLLASCH

Education

B.S., Geological Engineering and Geology and Geophysics, University of Wisconsin-Madison, 1996

M.B.A., Business Administration, Edgewood College, 2016

Specialty Certifications

Certified Site Assessor, Wisconsin

Professional Experience

Mr. Kollasch utilizes his background in geological engineering and geology to link investigation and remediation solutions to meet the needs of clients. Tony has 23 years of geology and engineering experience, and his technical expertise emphasizes site assessment for case closure and redevelopment of properties. His project experience includes environmental due diligence including Phase 1 and Phase 2 Environmental Site Assessments (ESAs), brownfields redevelopments, underground storage tank (UST) closure assessments, and site characterization and remediation. He has worked in Wisconsin and nine other states on a wide variety of due diligence, investigation, remediation, and redevelopment projects.

Environmental Due Diligence

Various. Completed hundreds of Phase 1 ESAs, including ASTM scope items and non-ASTM scope items including asbestos, wetlands, radon, floodplains, earthquake potential, emerging contaminants such as PFAs, and water damage (potential mold issues). Identified and utilized new technologies to more effectively and efficiently collect and present available environmental data.

Brownfield Redevelopment

Madison, Wisconsin, Multiple Properties. Project redevelopments, in the downtown and focused on the isthmus. Involvement stretched from completing Phase 1 and Phase 2 activities, material management planning including permitting and landfill profiling, and remedial activity oversight. Assisted with obtaining funding through Petroleum Environmental Cleanup Fund Act (PECFA), Wisconsin Department of Natural Resources brownfields grants, USEPA brownfields grants, WEDC brownfields grants, and other funding programs. Generally, projects involved due diligence and investigation related to aging commercial and industrial properties in an urban environment. During redevelopment, managed impacted soil and groundwater and addressed real-time discoveries, including undocumented historical USTs, high concentrations meeting hazardous criteria, and industrial fill and waste content.

Milwaukee, Wisconsin. Performed site investigation and developed strategic remedial options for redevelopment as a residential complex for a former barrel-plating site.

Beloit, Wisconsin. Performed and managed investigation and remediation activities related to the sale and repurposing of a riverfront power plant, and siting a new building on a rail line at a large manufacturing operation.

Prairie du Chien, Wisconsin. Managed the investigation and cleanup of a former gas station property for reuse as a parking lot by the local library. Project reimbursement through PECFA.

Chilton, Wisconsin. Managed investigation and cleanup at a cooperative facility where nutrient and pesticide releases had impacted the soil. Processed the site through the Wisconsin Agrichemical Chemical Cleanup Program (ACCP) reimbursement fund.

Chicago, Illinois. Helped manage a multi-year phased site investigation, remediation, and environmental coordination with construction oversight process with detailed City department input at an industrial laundry facility. Purchase price was reduced by multiple millions related to environmental and structural concerns identified.

Belvidere, Illinois. Utilized municipal grant awards from the USEPA and Illinois Environmental Protection Agency (IEPA) to address a former riverfront iron foundry and salvage yard in Belvidere, Illinois. Work included Phase 1 and Phase 2 ESAs and remedial action plans at multiple properties for residential redevelopment.

Waukegan, Illinois. Utilized grant awards from the USEPA and IEPA to address multiple brownfields properties for the City of Waukegan, Illinois. Work under the grants included completing detailed Phase 2 ESAs.

Robbins, Illinois. Completed ESA from historical records and site characterization for an unlicensed junkyard redevelopment as a health clinic. Thorough investigation and coordination with the proposed new construction plans were crucial to obtaining a No Further Action letter through the Site Remediation Program.

Worked on over 65 projects pursuing redevelopment for sites throughout Wisconsin and Illinois. Project work has included Phase 1 and Phase 2 ESAs, focused site investigations, remedial action plans, and state reimbursement budgets and claims.

Soil and Groundwater Investigation and Remediation

Illinois, Michigan, Wisconsin, Various. Worked on over 180 projects associated with petroleum site investigation and remediation at various sites in Wisconsin, Michigan, and Illinois. Projects involved performing site investigation activities and preparation of site investigation reports, remedial action plans, design documents, remediation contracting, and operation, maintenance, and monitoring of remediation systems.

Remediation efforts included the use of passive and active techniques to remove liquid petroleum from the subsurface while maximizing cost effectiveness and complying with state regulations for free product removal at various sites in Illinois and Michigan. Active technologies included enhanced fluid recovery and pump and treat groundwater systems. Assisted in the creation and implementation of free product abatement plans for both states, covering a total of over 100 sites.

Publications and Presentations

"Brownfields Redevelopment Case Studies," FET Brownfields Updates seminar, Madison, Wisconsin, February 2019.

Instructor, Hazardous Materials Refresher Training, Cuyahoga National Park, March 2019.

Professional Experience

Ms. Socha is a project manager and geologist, with expertise in brownfields site investigation and remediation; property due diligence; grant support services; and interaction with regulators, investors, and other involved parties. Since 1985, she has designed, implemented, and managed geologic and hydrogeologic investigations and remedial actions at contaminated sites in Wisconsin, Minnesota, and Illinois. She has current OSHA health and safety training.

Brownfield Redevelopment Services

Several Locations, Wisconsin. Project Manager and senior review for Phase 1 and 2 environmental site investigations (ESAs), in Madison, Wisconsin, Dane County and locations throughout Wisconsin. Coordinated Phase 2 ESAs, including evaluations of soil, groundwater, waste, building materials, and site activities. Performed site investigations to define the extent of known contamination for regulatory and cost liability assessment purposes. Estimated remediation costs and conducted full service remediation through to final closure

Madison, Wisconsin, 1000 Block E. Washington Ave. Successfully assisted client to obtain a $500,000 WEDC brownfields grant for demolition and soil, groundwater, and vapor management during construction of an 11-story retail, office, parking, and residential facility. Prepared grant draw resulting in 100 percent payment of the award. Evaluated remediation options, minimized costs and risks associated with contamination. Prepared a materials management plan including re-use of contaminated soil. Supervised personnel during investigations, tank removals, and remedial soil excavations. Interacted with investors, WEDC staff, architect, and construction contractors. Prepared the remediation documentation report and case closure request for the project.

Maple Bluff, Wisconsin, N. Sherman Ave. Assisted owner in successfully applying for a $391,000 WEDC brownfield grant for building demolition and management of contaminated soil, groundwater, and vapor during construction of a commercial facility. Interacted with WEDC staff, architect, and construction contractors. Supervised personnel during investigations, soil segregation, tank removals, and remedial soil excavations. Prepared materials management plan and remediation documentation report.

Milwaukee, Wisconsin, Hubbard Street Apartments. Provided project management and technical services for redevelopment of a site contaminated industrial fill soils into a 6-story residential complex. Led technical aspects including contamination characterization, analysis of soil reuse and disposal options, documentation of contaminated soil removal during construction, and preparation of the remedial action documentation report and site closure request. Remediation was coordinated with redevelopment activities to minimize cost and meet tight construction timelines.

Green Bay, Wisconsin, Flats on the Fox. Provided project management and technical services for redevelopment of an abandoned commercial site along the Fox River. The site with petroleum and chlorinated solvent contamination was redeveloped into a 7-story residential complex. Led technical aspects of the project including soil and groundwater contamination characterization, analysis of soil reuse and disposal options, documentation of contaminated soil removal during construction, and preparation of the remedial action documentation report and site closure request. The remedial soil excavation was coordinated with the redevelopment contractor to minimize costs.

Milwaukee, Wisconsin, Castings Place. Provided project management and technical services for redevelopment was a former foundry and auto body garage site. The site with contaminated industrial fill soils and petroleum contamination was redeveloped into a 7-story residential complex. Led technical aspects including contamination characterization, analysis of soil reuse and disposal options, documentation of contaminated soil removal during construction, and preparation of the remedial action documentation report, and site closure request. Contractors were assisted during construction with soil segregation to cost effectively handle contaminated soil. Excavation for underground parking and foundation structures produced 18,000 tons of soil in a three month period that was disposed of under manifest from three separate disposal facilities. The site received closure with no additional remedial activities for soil or groundwater contamination.

Madison, Wisconsin, Park Central. Provided project management and technical services for redevelopment of a former taxi-cab depot. The site with contaminated industrial fill soils and petroleum contamination was redeveloped into a residential complex. Led technical aspects of the project including contamination characterization, analysis of soil reuse and disposal options, documentation of contaminated soil removal during construction, and preparation of the remedial action documentation report and site closure request. Contractors were assisted with soil segregation to cost effectively handle contaminated soil. Excavation for underground parking and foundation structures produced 11,000 tons of soil that were biotreated and disposed. Possible impacts from vapors associated with petroleum contaminated soil were mitigated by a venting system for the foundation underdrain. The site received closure with no additional remedial activities for soil or groundwater contamination.

Madison, Wisconsin, City Row. Provided project management and technical services for redevelopment of a block of deteriorating residential properties with contaminated near surface soils and fuel oil contamination. The site was redeveloped into a residential complex. Led technical aspects including contamination characterization, analysis of soil reuse and disposal options, documentation of contaminated soil removal during construction, and preparation of the remedial action documentation report and site closure request. Contractors were assisted with soil segregation to cost effectively handle contaminated soil. Excavation for underground parking and foundation structures produced 2,500 tons of soil that were biotreated and disposed. The site received closure with no additional remedial activities for soil or groundwater contamination.

Wisconsin State Agency – Soil and Groundwater Investigation & Remediation

Southern and Central Wisconsin, Various Sites. Managed and led technical aspects of more than 25 investigation and remediation projects under the Wisconsin petroleum environmental cleanup fund

act (PECFA). Aspects of the projects included work plan preparation; site investigation; remedial action options analysis; soil and groundwater remediation pilot testing; preparation of plans, specifications, and bidding documents for remedial soil excavations; and construction of engineered remedial systems including groundwater pump and treat and multi-phase extraction. Managed projects through operation and maintenance (O&M) phases to site closure. Managed financial aspects of the projects to maximize cost reimbursements from the PECFA program.

Madison Wisconsin, Former Paul's Classic Cleaners. Managed and led technical aspects of an investigation and remediation project under the Wisconsin dry cleaners environmental repair fund (DERF). Aspects included work plan preparation, site investigation, remedial action options analysis, groundwater remediation pilot testing including ozone injection, preparation of plans and specifications, and bidding documents for construction of a remedial system consisting of multi-phase extraction. Managed financial aspects of the projects to maximize cost reimbursements from the DERF program.

Southern Wisconsin, Various Sites. Managed more than 45 Work Orders from the Wisconsin Department of Transportation for site investigations, hazardous materials characterization, preparation of special provisions, soil excavation documentation, underground tank removal, and construction emergencies. Prepared construction plans and specifications special provisions including materials management and handling plans for petroleum contaminated soil and groundwater.
