

MEMORANDUM

Date: May 26, 2026

To: Water Utility Board

From: Joseph Grande, Water Resources Manager
Krishna Kumar, General Manager

Subject: Water Production Report

BACKGROUND

Board governance policy requires that current and future customers will receive water that meets or exceeds industry-accepted levels of service for fire protection and pressure.

This includes:

1. Water delivered to hydrants at proper flow rates for fire protection.
2. Water delivered to the customer tap at a pressure that meets industry-accepted low, high, and emergency operation criteria.
3. Water used for outdoor irrigation under drought-free conditions.

The Water Resources section of the Utility strives to meet or exceed the expectations laid out above. The April Water Production and Well Utilization reports reflecting these efforts are attached. Because there are no wells off-line for repairs or upgrades, there is no Attachment C this month.

ATTACHMENTS

- A. Water Production Report as of April 30, 2026
- B. Well Utilization Report as of April 30, 2026
- C. Status of Wells Offline for Repairs as of April 30, 2026
